## What is this product?

#### Type

UCITS

#### Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

#### Objectives

The sub-fund's objective is to seek capital appreciation by creating a professionally managed portfolio consisting of what in the opinion of the Management Company, are international and diversified securities of unique franchise companies bought at a reasonable price.

The Management Company intends investing on a global basis in shares or equity linked securities including depositary receipts and preferred stock, issued by companies quoted or traded on Regulated Markets. The sub-fund may invest directly in China A-Shares via Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect.

Investing is according to the portfolio managers of the Management Company about selecting unique companies, orderly sticking to the investment process, being free from any benchmarking constraints. They thus actively and rigorously select only 20 to 30 stocks across the globe, all leaders in their respective fields, that they patiently wait for buying at a reasonable price. They identify and invest in world leading companies benefiting from a unique franchise. Determining the competitive advantage of a company and the durability of that advantage are key to their stock picking. But they also pay attention to valuations and prices attached to those companies. Finally, they target owning stocks for at least five years enabling companies to demonstrate the strength of their business model beyond short term volatility or events in the market.

To find such companies, the Management Company applies strict quality criteria, which includes strong self-financing capability, strong cash generation and sustainable profit margins.

The sub-fund may also invest in interest bearing accounts (such as deposits), listed investment grade sovereign short-term debt securities and money market instruments for cash management purposes.

The sub-fund will not invest more than 10% of the net assets in other UCITS or other UCIs and will not invest in Asset Backed Securities and Mortgage Backed Securities and Contingent Convertibles. The sub-fund may not engage in securities lending transactions, total returns swaps and reverse repurchase agreement transactions.

The sub-fund may also invest in listed derivatives instruments and currency

forward for hedging currency purposes only.

The sub-fund will not invest in distressed securities.

**Benchmark:** The sub-fund is actively managed in reference to the MSCI All Country World Index (Bloomberg ticker NDEEWNR) for performance comparison. The portfolio managers are company pickers, investing in companies they have deeply analysed, bought at a reasonable price and owned over the long term. Therefore, the Management Company has significant discretion over the composition of its portfolio (in terms of constituents and allocation) and the sub-fund's holding may then deviate significantly from the benchmark.

#### Intended retail investor

The fund is intended for investors who are aiming for long-term income and capital growth, who may not have specific financial expertise but who are able to make an informed investment decision based on the Key Information Document (KID) and prospectus and who have a risk appetite consistent with the risk indicator displayed in the KID understand that there is no guarantee or capital protection (100% of the capital is at risk).

#### Other information

**Depository:** UBS SE EUROPE, Luxembourg Branch

**Dividend income:** This class is a capitalisation class meaning that income is reinvested.

**Conversion right:** The investor has the right to convert his investment in shares in one sub-fund for shares in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

The currency of the share class is expressed in EUR.

# What are the risks and what could I get in return?

## Risk indicator

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Geopolitical Risk, Operational Risk and Depository Risk, Liquidity Risk especially in emerging market, Risk on investments in China.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

## Performance scenarios

**Recommended holding period: 5 years**

**Example investment: 10,000 EUR**

		If you exit after 1 year	If you exit after 5 years (recommended holding period)
<b>Scenarios</b>

<b>Stress</b>	<b>What you might get back after costs</b>	1,610 EUR	1,640 EUR
	Average return each year	-83.8 %	-30.4 %
<b>Unfavourable</b>	<b>What you might get back after costs</b>	9,020 EUR	9,460 EUR
	Average return each year	-9.8 %	-1.1 %
<b>Moderate</b>	<b>What you might get back after costs</b>	10,730 EUR	14,390 EUR
	Average return each year	7.3 %	7.6 %
<b>Favourable</b>	<b>What you might get back after costs</b>	13,530 EUR	17,320 EUR
	Average return each year	35.3 %	11.6 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment be-

tween November 2022 and December 2023.

Moderate scenario: This type of scenario occurred for an investment between August 2017 and August 2022, by referring to a benchmark.

Favourable scenario: This type of scenario occurred for an investment between April 2014 and April 2019, by referring to a benchmark.

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if Piquemal Houghton Funds is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depository UBS SE EUROPE, Luxembourg Branch. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	210 EUR	1,463 EUR
Annual cost impact (*)	2.1 %	2.1 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.7% before costs and 7.6% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
