What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product until 6 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Key Information Document

Performance-Scenarios:

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 11 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. This type of unfavorable scenario occurred for an investment between December 2021 and December 2022 (if you exit after 1 year), April 2019 and April 2025 (if you exit after 6 years). This type of moderate scenario occurred for an investment between July 2016 and July 2017 (if you exit after 1 year), June 2017 and June 2023 (if you exit after 6 years). This type of favorable scenario occurred for an investment between March 2020 and March 2021 (if you exit after 1 year), December 2018 and December 2024 (if you exit after 6 years).

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10'000 EUR Investment.

	If you exit after 1 year	If you exit after 6 years
Total costs	160 EUR	1'443 EUR
Annual cost impact (*)	1.6 %	1.6 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.4 % before costs and 7.8 % after costs.
