## WHAT IS THIS PRODUCT?

### TYPE

ODDO BHF Haut Rendement 2025 is a UCITS under Directive 2009/65/EC, taking the form of a *Fonds Commun de Placement*.

The management company may liquidate the product if the assets fall below the regulatory minimum, or at its discretion in accordance with the legal requirements.

### TERM

The Fund was created on 12 January 2018 for an initial term of 99 years.

### OBJECTIVES

The investment objective is to achieve a net annualised performance above 3.20% over an investment period running from the Fund inception date, 12 January 2018, to 31 December 2025. The Fund aims to boost the value of the portfolio in the medium and long term through high yield, corporate bonds rated between BB+ and CCC+ (Standard & Poor's or equivalent, or using the Management Company's internal rating), and is therefore exposed to a risk of capital loss. The investment objective takes into account the estimated default risk, the cost of hedging and management fees. This objective is based on the realisation of market assumptions laid down by the Management Company. It does not constitute the promise of a return or a performance. Investors should be aware that the performance indicated in the investment objective does not include all cases of default.

The Fund's investment strategy is to manage, on a discretionary basis, a diversified portfolio of debt securities composed, up to a limit of 100%, of traditional, high yield bonds rated between BB+ and CCC+ (by Standard & Poor's or equivalent, or using the Management Company's internal rating), mainly issued (at least 60%) by corporate issuers with their registered office in Europe and with maturities of a maximum of six months and one day after 31 December 2025 (final maturity of the product or early redemption options at the Fund's discretion). In any event, the Fund may not invest more than 10% of the net assets in securities rated CCC+.

The strategy is not limited to holding bonds; the management company may make changes to the portfolio to take advantage of new opportunities in the market, or if it detects an increase in the risk of default of one of the issuers in the portfolio.

Within the limit of 40% of the net assets, the Fund may hold securities from corporate issuers whose registered office is located outside of Europe, including in emerging countries.

These securities will be denominated in any OECD currencies and hedged against currency risk; however, there is a residual risk of no more than 1% of net assets. The Fund seeks to select securities that the manager deems to have been unjustly downgraded by rating agencies. The Fund is managed within a modified duration range of 0 to 6.

The Management Company does not use the ratings issued by rating agencies automatically or in isolation, as it also applies its own internal analysis. In the event that the securities' rating is downgraded below CCC+ (Standard & Poor's or equivalent, or according to its own internal rating), the Management Company will decide whether or not to dispose of the securities in light of its own analysis, the interests of unitholders and market conditions.

### INTENDED RETAIL INVESTOR

The Fund is intended for investors seeking exposure to the bond markets over a period of eight years, who are willing to accept the risks arising from such exposure. US Persons may not invest in this product.

More detailed information on the Fund, such as the prospectus (French, English) and the annual and semi-annual reports (in the language of the distribution country) is available at am.oddo-bhf.com or may be obtained free of charge at any time from ODDO BHF Asset Management SAS, 12 boulevard de la Madeleine, 75009 PARIS or from the centralising agent in the distribution country. The Fund's NAV is available on the Management Company's website. Other unit classes are available for this Fund.

The Fund's custodian is ODDO BHF SCA

Given the Fund's performance target and specific maximum maturity for securities held, the selection of securities may vary over time at the portfolio manager's discretion, depending on market opportunities and the maturing of securities. In particular, the Fund may invest up to 100% of its assets in investment grade securities rated higher than BB+ (Standard & Poor's or equivalent or according to the Management Company's internal rating).

The average duration of the debt securities will be calculated on the basis of a portfolio comprising securities with a maximum maturity of 31 December 2025 plus six months and one day.

The Fund may invest up to 10% of its net assets (i) in units or shares of UCITS, (ii) in EU AIFs and/or in foreign investment funds mentioned in R.214-25 that meet the criteria of article R.214-13 of the French Monetary and Financial Code. These funds may be managed by the management companies of the ODDO BHF group (ODDO BHF Asset Management SAS and/or ODDO BHF Asset Management GmbH) and will be compatible with the Fund's investment strategy.

Without seeking overexposure, the Fund may invest up to 100% of its assets in financial futures or options traded on regulated, organised or OTC markets in France or other countries. The Fund will invest in listed forward financial instruments in order to seek exposure to and hedge against interest rate risk and for the purpose of hedging against currency risk (futures, options). It may also use swaps and forward exchange contracts to hedge against currency risk. Index credit default swaps (CDS) will be used only to hedge against credit risk up to a maximum of 100% of the Fund's net assets. The Fund may use callable bonds (bonds that the issuer may redeem prior to maturity but that have no other optional elements or sources of complexity) and puttable bonds (bonds that allow the holder to force the issuer to repurchase the security but that have no other optional elements or sources of complexity). These may account for up to 100% of the Fund's net assets.

The Fund's maximum exposure may not exceed 100% of the Fund's net assets, all markets combined (including money market instruments).

Subscription period: new subscriptions will not be accepted after 11:15 (Paris time) on 30 September 2019.

Subscription and redemption requests are centralised by the custodian every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.

CR-EUR units accumulate their income, as decided by the management company on a yearly basis.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### RISK INDICATOR

The risk indicator assumes you keep the product until maturity, i.e. on 31 December 2025. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely impact our capacity to pay you. Currency risk: you will be paid in a different currency; your actual gain will therefore depend on the exchange rate between the two currencies. This risk is not taken into account in the above indicator:

#### Other materially relevant risks not taken into account in the indicator:

Other risks not taken into account in the risk indicator may be materially relevant. They include:

Liquidity risk

Counterparty risk

As this product does not offer protection from market hazards, you could lose some or all of your investment.

### PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years with a one-year horizon and over the recommended investment period.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: until the product matures (31/12/2025)

Investment: €10,000

Scenarios		If you exit after 1 year	If you exit at maturity (31/12/2025)

## WHAT HAPPENS IF ODDO BHF ASSET MANAGEMENT SAS IS UNABLE TO PAY OUT?

The product is a co-ownership of financial instruments and deposits separate from the portfolio's Management Company. In the event of the company's insolvency, the product's assets, which are held by the custodian, would be unaffected. In the event of the custodian's insolvency, the risk of financial loss on the product would be mitigated by the legal segregation of the custodian's assets from the product's assets.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### COSTS OVER TIME

The tables show the amounts taken from your investment to cover the different types of cost. These amounts depend on how much you invest, how long you hold the product, and the return on the product. The amounts given here are illustrations based on a sample investment and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- €10,000 is invested

Investment: €10,000

Scenarios	If you exit after 1 year	If you exit at maturity (31/12/2025)
Total costs	€612.16	€923.91
Annual cost impact*	6.21%	4.01%

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.02% before costs and 0.01% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

#### COMPOSITION OF COSTS

The table below indicates the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period, and the meaning of the different cost categories.

One-off costs upon entry or exit		If you exit after: 1 year
Entry costs	Entry costs represent the maximum amount that may be paid at the time of subscription. 4.00% is the most you will pay; it may be that you pay less. The person selling you the product will inform you of the actual costs.	Up to €400.00
Exit costs	We do not charge any exit costs for this product, but the person who sells you the product might.	Up to €0.00
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	These represent the unavoidable costs of running the product and any payments, including remuneration, to parties connected to the product and providing services. 1.25% of the value of your investment per year. This is an estimate based on actual costs over the last year.	€120.00
Transaction costs	0.39% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€37.44
Incidental costs taken under specific conditions		
Performance-related fees	Impact of performance-related fees. 10%, inclusive of tax, of any net performance in excess of 3.20% of annual performance, once past underperformance over the previous five years has been fully offset.	€54.72

#### HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

##### Minimum recommended holding period: until the product matures

This recommended holding period is a minimum that takes into account the features of the selected product. It may be longer, depending on your financial position and investment choices.

You can redeem some or all of your investment at any time. Exiting before the end of the recommended holding period may affect the performance that can be expected from your investment. You can find details of any charges and penalties applied when divesting under: "What are the costs?"

Subscription and redemption requests are centralised by the custodian every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.
