What is this product?

Type

This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

Intended retail investor

This product is designed for investors who are willing to achieve income and capital growth and have a medium to long term horizon. The investor can bear losses up to the invested amount. This product is appropriate for investors with a basic to advanced knowledge and experience of the product and the markets.

Objectives

The sub-fund's objective is to generate capital appreciation by investing in low to medium risk investments.

The sub-fund mainly invests directly in equities and bonds and indirectly (maximum 30% of its net assets) through investment funds, including exchange traded funds.

The sub-fund does not intend to invest more than 60% of its net assets in equities, either directly or indirectly.

The sub-fund does not target a specific industrial, geographic or other market sectors.

The choice of assets is motivated by value criteria which mean selecting high quality companies that may be, according to the investment manager, undervalued.

The debt securities in which the sub-fund will invest may be issued by government and / or corporate bodies. There is no minimum rating applicable.

The sub-fund may invest in financial derivative instruments to cover the sub-fund against consequences of unfavourable market conditions or, alternatively, to optimise the performance of the sub-fund. Financial derivative instruments may generally be described as contracts between two parties that agree to exchange a specific underlying asset at both a pre-determined price and date. The underlying of the financial derivative instruments mainly consists of listed equities, stock indexes and/or currencies.

The investment manager selects mainly investment funds pursuing the same investment strategy of the sub-fund, i.e. value oriented investment funds. Such investment funds may:

- 1- invest in geographical regions that may not be or hardly accessible through direct investments, or
- 2- replicate the performance of an index.

Other information

Depository: Banque de Luxembourg

Dividend income: This class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor has the right to convert his investment in shares in one sub-fund for shares in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

The prospectus and the periodic reports are prepared for the entire fund and are available in English. The management company may inform you about other languages in which these documents are available.

This sub-fund was launched in 2011 and this share class in 2011.

The currency of the share class is expressed in EUR.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-

low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Concentration Risk. Other risk factors might exist.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Recommended holding period: 5 years Example investment: 10,000 EUR		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6,230 EUR	5,530 EUR
	Average return each year	-37.7 %	-11.2 %
Unfavourable	What you might get back after costs	8,800 EUR	9,170 EUR
	Average return each year	-12.0 %	-1.7 %
Moderate	What you might get back after costs	10,110 EUR	11,110 EUR
	Average return each year	1.1 %	2.1 %
Favourable	What you might get back after costs	11,820 EUR	11,860 EUR
	Average return each year	18.2 %	3.5 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an invest-

ment between March 2015 and March 2020.

Moderate scenario: This type of scenario occurred for an investment between February 2014 and February 2019.

Favourable scenario: This type of scenario occurred for an investment between April 2016 and April 2021.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if ESTATE ALLIANCE is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	229 EUR	1,301 EUR
Annual cost impact (*)	2.3 %	2.3 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.4% before costs and 2.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
