SINGAPORE PROSPECTUS

Dated 7 May 2025

This Singapore Prospectus incorporates, and is not valid without, the attached Luxembourg Prospectus dated April 2025 (as amended from time to time) for Amundi Index Solutions (the "**Luxembourg Prospectus**"). Amundi Index Solutions (the "**SICAV**") is an investment company with variable capital (SICAV) incorporated under Luxembourg law and is constituted outside Singapore. The SICAV has appointed Amundi Singapore Limited (whose details appear in paragraph 2.4 of this Singapore Prospectus) as its agent for service of process in Singapore and as its representative in Singapore (the "**Singapore Representative**").

Shares offered under this Singapore Prospectus are not listed. Accordingly, there is no ready market for the shares in Singapore. Any shareholder in Singapore may redeem all or part of his holding of shares in accordance with and subject to the provisions of this Singapore Prospectus.

INTERPRETATION

Unless stated otherwise, terms defined in the Luxembourg Prospectus have the same meanings when used in this Singapore Prospectus. See the section < *Terms with specific meanings* > in the Luxembourg Prospectus.

In this Singapore Prospectus, the following expressions have the following meanings:

2010 Law	The Luxembourg law of December 17, 2010 on Undertakings for Collective Investment, as amended.
ABS	Asset-backed security.
articles of incorporation	The articles of incorporation of the SICAV, as amended.
base currency	The currency in which a sub-fund does the accounting for its portfolio and maintains its primary NAV.
board or Directors	The board of directors of the SICAV.
Business Day	Each weekday other than New Year's Day, Good Friday, Easter Monday, 1 May (Labour Day), Christmas Day and 26 December (or such other day as the Directors may from time to time determine subject to shareholder notice).
CET	Central European Time. For indicative purposes, 14.00 CET corresponds to: (a) 9 p.m. Singapore time from the last Sunday of October (included) until the last Sunday of March of the following year (excluded); (b) 8 p.m. Singapore time from the last Sunday of March (included) up to the last Sunday of October during the year (excluded).
CPF	Central Provident Fund.
CPF Fund	A collective investment scheme included by the CPF Board under the CPFIS.
CPF Investment Guidelines	The investment guidelines for CPF Funds issued by the CPF Board, as amended from time to time. The latest version is available at www.cpf.gov.sg .
CPFIS	Central Provident Fund Investment Scheme.
CSSF	Commission de Surveillance du Secteur Financier, Luxembourg.
depository	As described in paragraph 2.5 below.
Disclosure regulation or SFDR	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector, as may be amended, supplemented, consolidated, substituted in any form or otherwise modified from time to time.
EU	European Union.
FATCA	US Foreign Account Tax Compliance Act.

investment grade	Rated at least BBB- by S&P, Baa3 by Moody's and/or BBB- (by Fitch).
investment manager and sub-investment manager	Both terms as described in paragraph 2.3 below.
MAS	Monetary Authority of Singapore.
MAS Code	The Code on Collective Investment Schemes issued by MAS.
MBS	Mortgage-backed security.
NAV	Net asset value; the value of one share.
RSP	Regular savings plan.
SFA	Securities and Futures Act 2001.
SFT	Securities financing transactions as defined in the Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse (SFTR).
SICAV	Amundi Index Solutions, a Luxembourg-domiciled SICAV.
Singapore Business Day	A day (other than a Saturday, Sunday or public holiday) on which commercial banks are open for business in Singapore.
Singapore Distributors	Authorised distributors of the sub-funds in Singapore.
Singapore Representative	As described in paragraph 2.4 below.
SRS	Supplementary Retirement Scheme.
sub-funds	The sub-funds of the SICAV offered under this Singapore Prospectus and " sub-fund " shall mean any one of them.
sustainability factors	For the purposes of art. 2.(24) of SFDR mean environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery.
sustainability risks	For the purpose of art. 2 (22) of SFDR means an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. Risks related to environmental issues includes, but is not limited to, climate risk, both physical and transition risk. Physical risk arises from the physical effects of climate change, acute or chronic. For example, frequent and severe climate-related events can impact products and services and supply chains. Transition risk whether policy, technology, market or reputation risk arises from the adjustment to a low-carbon economy in order to mitigate climate change. Risks related to social issues can include but are not limited to human rights, health and safety, inequality, integration and labor rights. Risks related to governance related risks can include but are not limited to risks around significant and recurring breaches of international agreements, corruption, board independence, ownership and control, or audit and tax management. These risks can impact an issuer's operational effectiveness and resilience as well as its public perception, and reputation

Taxonomy Regulation or TR	affecting its profitability and in turn, its capital growth, and ultimately impacting the value of the components of the index tracked by the Sub-Fund. Regulation 2020/852 of the European Parliament and of the Council of 27th November 2019 on the establishment of a framework to facilitate sustainable investment and amending Regulation (EU) 2019/2088 'disclosure regulation' or "SFDR".
Transaction Day	A Business Day on which the received and accepted orders for subscription, redemption and/or conversion requests can be processed by the registrar agent acting on behalf of the SICAV. Each Business Day will be a Transaction Day, however, Business Days when, in the sole determination of the investment manager, markets on which the sub-fund's investments are listed or traded, or markets relevant to the Index are closed and as a result of which a substantial portion of the Index may not be traded, shall not be Transaction Days. The days which are not Transaction Days for the current year are available on www.amundi.lu. The Directors may determine such other day(s) to be Transaction Days from time to time were notified to all shareholders.
TRS	Total return swaps.
UCI	Undertakings for Collective Investment.
UCITS	Undertakings for Collective Investment in Transferrable Securities.
US	United States of America.
VaR	Value-at-Risk.
we, us	The SICAV, acting through the board or through any service providers described in this prospectus except for the auditor and any distributors.
you	Any past, current or prospective shareholder, or an agent for the same.

References to any enactment, statute, regulation or code will be deemed also to refer to any modification, amendment, supplement, codification, re-enactment or re-constitution thereof.

References to any document or agreement will be deemed also to refer to such document or agreement as amended or novated.

References to the Luxembourg Prospectus in the form of < XXX – YYY – ZZZ > refer to the main heading, sub-heading, sub-sub-heading and so on (as the case may be) of the relevant sections in the Luxembourg Prospectus.

AMUNDI INDEX SOLUTIONS

IMPORTANT INFORMATION

The collective investment schemes offered under this Singapore Prospectus are each a recognised scheme under the SFA. A copy of this Singapore Prospectus has been lodged with and registered by the MAS. MAS assumes no responsibility for the contents of this Singapore Prospectus and the registration of this Singapore Prospectus by MAS does not imply that the SFA or any other legal or regulatory requirements have been complied with. MAS has not, in any way, considered the investment merits of the sub-funds.

MAS registered this Singapore Prospectus on 7 May 2025. It is valid up to 6 May 2026 and will expire on 7 May 2026.

This Singapore Prospectus incorporates, and is not valid without, the Luxembourg Prospectus attached as a Schedule of this document. You are also bound or deemed to have notice of the provision of the articles of incorporation (as described in paragraph 1.1 of this Singapore Prospectus).

The shares are offered to the public in Singapore on the basis of the information contained in this Singapore Prospectus and the documents referred to in this Singapore Prospectus. No person is authorised to give any information or to make any representations concerning the SICAV or the sub-funds other than those contained in this Singapore Prospectus. Any subscription made by any person on the basis of statements or representations not contained in or inconsistent with the information and representations contained in this Singapore Prospectus will be at the sole risk of the investor.

Certain share classes of the sub-funds currently on offer under this Singapore Prospectus may be listed on one or more stock exchanges outside Singapore at the discretion of the board. However, the share classes currently on offer under this Singapore Prospectus are not listed. Accordingly, there is no ready market for the shares in Singapore. Any shareholder in Singapore may request the SICAV to redeem all or part of his holding of shares in accordance with and subject to the provisions of this Singapore Prospectus.

The shares are capital markets products other than prescribed capital markets products (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Specified Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

You should seek professional advice in the event of any doubt or ambiguity or to ascertain (a) the possible tax consequences; (b) the legal requirements and restrictions; (c) any foreign exchange transactions or exchange control requirements; and (d) any restrictions or requirements under the Central Provident Fund (Investment Schemes) Regulations and the terms and conditions in respect of the CPF Investment Scheme issued by the CPF Board, which you may encounter under the laws of the country of your citizenship, residence or domicile which may be relevant to the subscription, purchase, holding or disposal of shares, including with regard to the applicability of FATCA and any other reporting and withholding regime to your investments in the SICAV. See the section < *INVESTING IN THE SUB-FUNDS – Taxes* > in the Luxembourg Prospectus for more details on FATCA.

The board is responsible for the accuracy of information contained in this Singapore Prospectus and confirm, having made all reasonable enquiries, that to the best of their knowledge and belief, there are no facts the omission of which would make any statement in this Singapore Prospectus misleading.

You should carefully consider the risk factors set out in paragraphs 3 and 5 of this Singapore Prospectus.

Financial derivative instruments may be used as part of the investment strategy of a Sub-Fund and not merely for efficient portfolio management and hedging. Further details are set out in paragraph 3 of this Singapore Prospectus.

This Singapore Prospectus does not constitute an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such an offer or solicitation.

The delivery of this Singapore Prospectus or the issue of shares shall not, under any circumstances, create any impression that the affairs of the SICAV or the sub-funds have not changed since the date of this Singapore Prospectus. This Singapore Prospectus may be updated from time to time to reflect material changes and you should check whether a more recent Singapore Prospectus is available.

Notice of any developments concerning your investment in the SICAV or its sub-funds, unless other communication media are specified in the Luxembourg Prospectus or required in accordance with the applicable laws and regulations, will be notified through the website <https://www.amundi.lu/retail/Shareholder-Notices/Amundi-Index-Solutions> or any successors thereto. You are consequently invited to consult this website on a regular basis.

The board, the management company, the Investment Managers, and each of their related entities or employees, may from time to time hold positions in the collective investment schemes offered under this Singapore Prospectus.

You should direct all enquiries relating to the SICAV and the sub-funds to the Singapore Representative.

Restriction on US Investors

Shares are not registered with the US Securities and Exchange Commission or any other US entity, federal or otherwise. Therefore, unless the SICAV is satisfied that it would not constitute a violation of US securities laws, shares are not available to, or for the benefit of, US persons.

AMUNDI INDEX SOLUTIONS

1. STRUCTURE OF THE SICAV

1.1 Amundi Index Solutions

Amundi Index Solutions is an open-ended investment company organised as a *société anonyme* and qualifying as a *société d'investissement à capital variable* under the laws of Luxembourg. The SICAV was incorporated in 2016.

The SICAV functions as an “umbrella fund” under which the sub-funds are created and operated. The assets and liabilities of each sub-fund are segregated from those of other sub-funds, meaning that third party creditors have recourse only to the assets of the sub-fund concerned.

Within each sub-fund, the SICAV can create and issue share classes with various characteristics and investor eligibility requirements. See paragraph 1.2 below and the section < *INVESTING IN THE SUB-FUNDS* > in the Luxembourg Prospectus for more details on the different share classes offered under this Singapore Prospectus.

The articles of incorporation are dated 9 June 2016 and published on the Recueil électronique des sociétés et associations (“RESA”) (the Luxembourg electronic repository of businesses), on 17 June 2016. The articles of incorporation were last modified on 31 January 2020 and published in the RESA on 5 March 2020. A copy is also available for inspection upon request from the Singapore Representative during normal Singapore business hours.

Full details of the SICAV are set out in the Luxembourg Prospectus.

1.2 Sub-funds and share classes offered under this Singapore Prospectus

Within a sub-fund, share classes may be defined from time to time by the SICAV so as to correspond to (i) a specific distribution policy, such as entitling to distributions or not entitling to distributions and/or (ii) a specific sales and redemption charge structure and/or (iii) a specific management or advisory fee structure and/or (iv) different distribution, shareholder servicing or other fees, and/or (v) the currency in which the class may be quoted (the “**Pricing Currency**”) and based on the rate of exchange of the same valuation day between such currency and the base currency of the relevant sub-fund and/or (vi) the use of different hedging techniques in order to protect in the base currency of the relevant sub-fund the assets and returns quoted in the Pricing Currency of the relevant share class against long-term movements of their Pricing Currency and/or (vii) specific jurisdictions where the shares are sold and/or (viii) specific distributions channels and/or (ix) different types of targeted investors and/or (x) whether the share class is intended to be listed and/or (xi) specific protection against certain currency fluctuations and/or (xii) such other features as may be determined by the management company from time to time in compliance with applicable law.

The sub-funds and share classes presently being offered for subscription by investors in Singapore under this Singapore Prospectus are set out in paragraph 3. Other share classes in the Luxembourg Prospectus (which are not set out in paragraph 3) are not available for subscription under this Singapore Prospectus.

Note on share class designations:

Each share class is identified first by a base share class label and then by any applicable suffixes.

- Class A shares are available for subscription by all investors.

Share class suffixes

The SICAV issues two types of shares : ETF share classes and index share classes.

ETF share classes are denominated "UCITS ETF"

Index share classes are followed by no suffix or by "Index".

Where appropriate, one or more suffixes may be added to the base share class label to indicate certain characteristics.

- **Currency suffixes.** The following are the single or double letter currency suffixes currently in use, and the currency each indicates:
 - S: SGD (Singapore Dollar)
 - U: USD (US Dollar)
- The suffix (C), (D) or Acc, Dist indicate whether shares are accumulation (C) or Acc or distribution (D) or Dist shares. See "*Dividend policy*" below.
- The suffix H indicates that the shares are currency hedged.
- A number suffix indicates the shares are limited to particular investors, distributors or countries.

See the section < *INVESTING IN THE SUB-FUNDS – SHARE CLASS SUFFIXES* > in the Luxembourg Prospectus for more details.

Dividend policy

Accumulating shares retain all net investment income in the share price and do not distribute them.

See the section < *INVESTING IN THE SUB-FUNDS – Share Class Policies - DIVIDEND POLICY* > in the Luxembourg Prospectus for more details on the dividend policy.

2. MANAGEMENT STRUCTURE AND OTHER PARTIES

2.1 The board of directors of the SICAV

As at the date of this Singapore Prospectus, the board of the SICAV comprises:

Mehdi BALAFREJ (Chairman)

Global Head of Product & Capital Market of Amundi ETF, Indexing & Smart Beta
Amundi Asset Management

Pierre JOND

Managing Director
Amundi Luxembourg

Nicolas VAULÉON

Chief Executive Officer
Amundi Global Servicing

Alan GUY

Head of Cross Border Product & Innovation
Amundi Ireland Ltd

The board is responsible for the overall management and administration of the SICAV and has

broad powers to act on its behalf, including:

- appointing and supervising the management company
- setting investment policy and approving the appointment of any investment manager or sub-manager
- making all determinations regarding the launch, modification, merger or discontinuation of sub-funds and share classes including such matters as timing, pricing, fees, dividend policy and payment and amount of dividends, liquidation of the SICAV, and other conditions, determining whether to list a sub-fund's shares on any stock exchange
- determining whether and where to publish sub-fund NAVs and dividend notices
- determining when and in what manner the SICAV will exercise any of the rights reserved in the Luxembourg Prospectus or by statute and making any associated shareholder communications
- ensuring that the management company and the depositary are adequately capitalised and that their appointment is consistent with the 2010 Law, and any applicable contracts of the SICAV
- determining the availability of any share class to any investor or distributor or in any jurisdiction
- approving any multi-year investment plans, making any changes to the terms, fees, general structure, and extent of shareholder choices it may desire

See the section < *THE SICAV – Board of Directors of the SICAV* > in the Luxembourg Prospectus for more details on the board.

2.2 The management company

Amundi Luxembourg S.A. ("**Amundi Luxembourg**") is the management company of the SICAV.

The management company is incorporated in Luxembourg in the form of a société anonyme. It is subject to Chapter 15 of the 2010 Law, and the Luxembourg law of 12 July 2013 on alternative investment fund managers and to the supervision of the CSSF. The management company has been managing collective investment schemes since 1996.

The board has delegated the day-to-day management of the sub-funds to the management company. The management company is responsible for investment management, administrative services, marketing services and distribution services. It has the option of delegating to third parties some or all of its responsibilities. For example, so long as it retains control and supervision, the management company can appoint one or more investment managers to handle the day-to-day management of sub-fund assets, or one or more advisors to provide investment information, recommendations and research concerning prospective and existing investments.

See the section < *THE MANAGEMENT COMPANY* > in the Luxembourg Prospectus for more details on the management company.

Subject to the articles of incorporation, if the management company goes into liquidation, a new management company may be appointed or the SICAV may be liquidated.

Directors and key executives of the management company

As at the date of this Singapore Prospectus, the directors of the management company are as follows:

Mr. Pierre JOND

Amundi Luxembourg S.A. – Chief Executive Officer / Managing Director

Mr. Pierre Jond carries out duties jointly and in coordination with the other key executives of Amundi Luxembourg, however with a specific area of responsibilities that covers the supervision of subsidiaries as well as the investment management and internal audit activities of the Management Company.

Before joining Amundi Luxembourg, Mr. Pierre Jond served BNP Paribas Securities Services (BP2S) from different key positions for almost 30 years, the latest being Head of France and Belgium Region from 2020 to 2023, Chief of Staff to the CEO from 2017 to 2020 and Head of Corporate Trust Services from 2014 to 2017.

He began his career with the Banque Internationale à Luxembourg as a Business Developer for UCITS.

Mr. Pierre Jond holds a Master's degree in Economic Sciences from the University Lyon 2.

Mr. David Joseph HARTE

Amundi Ireland Ltd – Chief Executive Officer

Mr. David Harte is the Chief Executive Officer of Amundi Ireland Limited and formerly Global COO of Pioneer Investments. He is Irish and based in Dublin, Ireland.

He has been working in the investments industry since 1989 and has been with the Pioneer Group since 2003.

In his role as Global COO David was responsible for managing all Operations and IT functions in Pioneer including Investment Operations, IT, Cost Management & Procurement, Organisation and Data Management.

Prior to Pioneer, he was COO at Bear Stearns Bank plc, Dublin. He has also worked at a number of financial institutions in London.

He holds a BA (Honours) Degree in Economics and Geography from Trinity College Dublin, Ireland.

Mr. Bernard de WIT

Amundi Asset Management S.A.S. – Advisor to the CEO

Bernard De Wit is the advisor to the CEO of Amundi Asset Management. He has been working in the investment industry for thirteen years. He joined Amundi in 2009, coming from the Crédit Agricole Group. He worked initially on the CAAM/SGAM merger process which resulted in the birth of Amundi in 2010. Bernard started his career in banking and has worked in Belgium, Russia and Latin America. After participating in the merger process, he was appointed Chief Risk Officer of Amundi in 2010 before becoming Deputy CEO in 2013.

Bernard holds an MBA from the University of Louvain, in partnership with the University of Chicago.

Mrs. Céline BOYER-CHAMMARD

Amundi Asset Management S.A.S – Head of Sustainable Transformation and Organization Division

Céline Boyer-Chammard joined Amundi in June 2022 as Chief Sustainable Transformation Officer. Prior to that, she was Managing Director and Partner at the Boston Consulting Group. As a member of BCG's Financial Institutions, Responsible Finance and Technology Advantage practices, she supported numerous large international clients (banks, asset managers, insurance companies) in major business transformations. She acted as European co-leader for Sustainable Finance. She also worked for Crédit Agricole Group for several years, in particular on the topic of Responsible Finance and Investment.

Céline holds a degree from l'Ecole Polytechnique and l'Ecole Nationale des Ponts et Chaussées. She also holds a MBA from INSEAD.

Mr. Claude KREMER

Amundi Luxembourg S.A. – Independent Director

Mr. Claude Kremer is a Founding Partner of Arendt & Medernach and Head of the firm's Investment Management business unit.

In October 2014, Mr. Claude Kremer was elected to the Board of Directors of the International Investment Funds Association (IIFA). IIFA brings together 41 regional and national investment fund associations on a worldwide basis with a view to facilitating the continued growth of the investment funds sector internationally. From June 2011 to June 2013, Mr. Claude Kremer served as president of the European Fund and Asset Management Association (EFAMA). From May 2007 to June 2011, he was chairman of the Association of the Luxembourg Fund Industry (ALFI). In 2005, he was a member of the EU Commission expert group on market efficiency for the asset management sector.

Mr. Claude Kremer is a member of several advisory committees to the Commission for the Supervision of the Luxembourg Financial Sector (CSSF). He sits on the board of various listed companies and international asset management groups as well as their fund ranges in Luxembourg. He is also a member of the executive board of the Intergenerational Sovereign Fund put in place by the Luxembourg Government in December 2014.

A member of the Luxembourg Bar since 1982, Mr. Claude Kremer holds Master's degrees in law and history from the *Université Pierre Mendès France de Grenoble* (France) and a Master's degree in accounting and finance from the London School of Economics and Political Science (U.K.).

Mr. Pascal BIVILLE

Amundi Luxembourg S.A. – Independent Director

Mr. Biville is President of the company Metelga Consulting headquartered in Paris specialized in business consultancy and other management consultancy.

During his extensive career that started in 1987 he has held senior positions with major companies in different business sectors but especially in companies that carry out banking and financial activities.

Mr. Biville has a relevant executive international experience, he held the position of General Secretary for Calyon Americas in its New York Office. He has also been the Deputy Chief Executive Director for BNP Paribas Asset Management Holding, in Paris, during several years where carried out senior activities in finance and strategy, he was member of the board committees of the main subsidiaries of the group and was responsible for the international markets.

Mr. Biville graduated in Essec Business School and has a degree with honors in Business Law from the Université de Paris II – Assas.

Mr. François MARION

Amundi Luxembourg S.A. – Independent Director

Mr. François Marion is an independent director of several companies. He is French and based in Paris, France.

Until June 2021, he was the Deputy Chief Executive Officer of Crédit Agricole CIB, for six years. Within this role, he was in charge of overseeing Risks, Finance, Compliance, IT, Operations, Legal affairs, Human Resources and an International network composed of 35 countries.

He has been working in investments industry since 1983, during these 38 years with Bank Indosuez and then Crédit Agricole Group, he has had extensive senior exposure

to wholesale banking and to asset management, commercial, services, cash management and global transaction services, corporate and investment banking in most geographies. He has developed a broad operational leadership responsibility comprising Risks, Compliance, Legal, Finance or Human Resources among others.

He has extensive board committee chair experience for various companies, among others, Crédit Agricole, S.A., Caceis Group of companies or EUROCLEAR. He has worked in Asia, US and continental Europe and he is used to deal with governments and regulators across various jurisdictions.

He graduated with an MBA from HEC (Hautes Études Commerciales), Paris.

As at the date of this Singapore Prospectus, the key executives of the management company are as follows:

Mr. Pierre JOND

Amundi Luxembourg S.A. – Chief Executive Officer / Managing Director

Mr. Pierre Jond's details are set out above.

Mr. Pierre BOSIO

Amundi Luxembourg S.A. – Chief Operating Officer

Mr. Pierre Bosio is the COO at Amundi Luxembourg since October 2018 and carries out duties jointly and in coordination with the other key executives of Amundi Luxembourg, however with a specific area of responsibilities that covers Finance, human resources, Operations oversight, IT systems and infrastructure and product coordination of the Management Company.

He was most recently CEO of Amundi Finance. He joined Amundi in 2006 where he became Head of Audit and Inspection of Amundi Group.

Mr. Bosio graduated from Institut d'Etudes Politiques de Paris and Dauphine University in Economics.

Ms. Loredana CARLETTI

Amundi Luxembourg S.A. – Head of Amundi Real Assets Luxembourg

Ms. Loredana Carletti joined Amundi Luxembourg in August 2022 as member of Amundi Luxembourg Management Committee. She is in charge of structuring and facilitating the development of the Real Asset Business Line.

Loredana started her career in law firms before she joined Amundi Group in 2007 where occupied several positions also as Head of Legal Department for Structured Products and since 2018 as Head of Structuring for Private and Real Assets.

She graduated from L. Bocconi Business School with a Master in Law (double degree Business and Law) and holds an advanced master on "International Law and Management" from ESSEC Business School.

Mrs. Karine LAURENCIN

Amundi Luxembourg S.A. – Deputy Chief Executive Officer, Risk, Compliance & Legal

Ms Laurencin has been Deputy CEO and Conducting Officer for Risk, Compliance and Legal functions since 2024. She is member of the Amundi Luxembourg Executive Committee.

From 2013 to 2024, Ms Laurencin served as Head of Compliance at Amundi Luxembourg. She was a member of the Amundi Group Compliance Management

Committee, notably leading the firm's Distribution Control Framework.

Ms Laurencin is Advisor to the Board of the Association of Luxembourg Compliance Officers (ALCO).

Ms Laurencin has been with Amundi since 1998 in a variety of roles, including Institutional Marketing, Pension Fund Consultant Relations in the U.S. and Europe, Head of Investment Specialists and Head of Product Development in France.

Ms Laurencin received a Master's degree in Economics and a postgraduate degree in Finance and Banking with Honours from the University of Paris Panthéon-Assas.

You should note that the directors and the key executives of the management company may change over time.

Past performance of the management company is not necessarily indicative of its future performance.

2.3 The investment managers and sub-investment managers

Subject to the control and supervision of the management company, the companies listed below have been appointed by the management company as investment managers for the sub-funds.

The investment managers are responsible for day-to-day management of the sub-funds. They have the option of delegating to sub-investment managers, at their own expense and responsibility and with the approval of the board, the management company and the CSSF, any or all of their investment management and advisory duties.

The investment managers and sub-investment managers appointed in respect of each sub-fund are set out in paragraph 3 of this Singapore Prospectus and their respective details are set out below.

Amundi Asset Management

Amundi Asset Management is an Asset Management Company under the definition of Article L. 532-9 of the Monetary and Financial Code, authorised and regulated by Autorité des Marchés Financiers. Amundi Asset Management is domiciled in France and has been managing collective investment schemes and discretionary funds since 1997.

Amundi Japan Ltd.

Amundi Japan Ltd. is incorporated in Japan and is regulated by the Financial Services Agency of Japan. Amundi Japan is domiciled in Japan and has been managing collective investment schemes and discretionary funds since 1971.

See the section < *THE MANAGEMENT COMPANY – Investment Managers and Sub-Managers* > in the Luxembourg Prospectus for more details on the Investment Managers, Sub-Investment Managers and investment advisors.

The appointment of a sub-manager may be terminated under the circumstances set out in the relevant agreement (including any events of insolvency).

Past performance of each of the investment managers and sub-investment managers is not necessarily indicative of its future performance.

2.4 The Singapore Representative

Amundi Singapore Limited has been appointed by the SICAV to act as the SICAV's local agent in Singapore (the "**Singapore Representative**") and to accept service of process on behalf of the SICAV in Singapore.

The Singapore Representative will carry out or procure the carrying out of, amongst others, the following functions on behalf of the SICAV in Singapore:

- (a) facilitate the subscription, issuance, exchange and redemption of shares offered in Singapore under this Singapore Prospectus;
- (b) facilitate the publication of subscription and redemption prices of shares offered in Singapore under this Singapore Prospectus;
- (c) facilitate the sending of reports of the SICAV and/or the sub-funds offered in Singapore to shareholders in Singapore under this Singapore Prospectus;
- (d) facilitate the furnishing of such books relating to the subscription and redemption of shares offered in Singapore under this Singapore Prospectus as MAS may require;
- (e) facilitate the inspection of the instruments constituting the SICAV;
- (f) either the maintenance in Singapore, of a subsidiary register of shareholders who subscribed for or purchased their shares in Singapore under this Singapore Prospectus, or maintain in Singapore any facility that enables the inspection or extraction of the equivalent information;
- (g) making available for public inspection at the Singapore Representative's office, and offering a copy of the articles of incorporation, the latest annual report and semi-annual report of the SICAV and/or the sub-funds offered in Singapore under this Singapore Prospectus and such other documents required under the SFA and the MAS Code, free of charge to shareholders;
- (h) the furnishing of such information or records of the SICAV as MAS may at any time require; and
- (i) such other functions as MAS may prescribe.

2.5 The depositary

CACEIS Bank, Luxembourg Branch has been appointed by the SICAV to act as depositary of the SICAV's assets. The Depositary is supervised by CSSF. It is a branch of CACEIS Bank France, a public limited liability company (*société anonyme*) incorporated under the laws of France, which is approved as a credit institution and is supervised by the European Central Bank and the French *Autorité de contrôle prudentiel et de résolution*.

The depositary holds all of the SICAV's assets, including its cash and securities, either directly or through other financial institutions such as correspondent banks, subsidiaries or affiliates of the depositary.

The depositary is entrusted with the safe-keeping and/or, as the case may be, recordkeeping of the SICAV's assets on behalf of and for the exclusive interest of the shareholders.

The depositary may entrust assets to third party banks, financial institutions or clearinghouses but this will not affect its liability. The list of such delegates or the potential conflict of interest that may arise from such delegation is available on the website of the depositary (caceis.com section "*veille réglementaire*").

The depositary is a global depositary with direct market access in certain jurisdictions and for other markets, it engages selected delegates as sub-custodians. In respect of its sub-custodians, the depositary operates a rigorous selection and on-going monitoring program to ensure best profile and risks appraisal from its selected sub-custodians. Criteria which are taken into account when selecting sub-custodians generally include the relevant sub-custodian's financial strength, quality and experience, securities processing and operational capabilities, technologies and systems, assets segregation and protection, risk performance, fees and

business continuity planning. All sub-custodians appointed shall be licensed and regulated under applicable law to carry out the relevant financial activities in the relevant jurisdiction.

See the section < *THE SICAV – Service Providers Engaged by the SICAV* > in the Luxembourg Prospectus for more details on the depositary and its responsibilities.

The appointment of the depositary may be terminated under the circumstances set out in the relevant agreement (including any events of liquidation).

2.6 The administrative agent

CACEIS Bank, Luxembourg Branch has been appointed by the management company to act as the SICAV's administrative agent. It is responsible for certain administrative and clerical services delegated to it, in particular calculating NAVs, the proper book-keeping of the SICAV, assisting with the preparation and filing of financial reports, and all other administrative functions as required by the laws of the Grand Duchy of Luxembourg.

2.7 The registrar, transfer agent and paying agent

CACEIS Bank, Luxembourg Branch has been appointed by the management company to handle registrar, transfer and paying agent functions. It is responsible for maintaining the SICAV's register of shareholders, for processing requests to issue, buy, sell, redeem, switch or transfer sub-fund shares and for providing and supervising the mailing of statements, reports, notices and other documents to the shareholders.

The Singapore Representative will maintain a facility that enables the inspection or extraction of information relating to shareholders who subscribed for or purchased shares in Singapore. This facility is accessible to shareholders at the Singapore Representative's registered address during normal Singapore business hours.

2.8 The auditor

The auditor of the SICAV is PricewaterhouseCoopers Société Coopérative.

3. **INVESTMENT OBJECTIVE, FOCUS AND APPROACH AND PRODUCT SUITABILITY**

Each sub-fund, and the SICAV itself, must comply with all applicable EU and Luxembourg laws and regulations, as well as certain circulars, technical standards and other requirements in respect of its investments.

See the section < *GENERAL INVESTMENT POLICIES* > in the Luxembourg Prospectus for more details on the permitted securities and transactions, investments techniques as well as investment restrictions and limits applicable to the SICAV.

The risks applicable to the relevant sub-fund as set out under "*Main Risks*" should be read together with the section < *RISK DESCRIPTIONS* > in the Luxembourg Prospectus.

Integration of Amundi's Sustainability Risks approach at Sub-Fund level

In accordance with Amundi's global responsible investment policy, the Investment Managers of all sub-funds not classified pursuant to article 8 or 9 of the disclosure regulation, except if otherwise stated in this paragraph 3, integrate sustainability risks in their investment processes as a minimum via a stewardship approach and, potentially, depending on their investment strategy and asset classes, also via a targeted exclusion policy.

See the section < *SUSTAINABLE INVESTING* > in the Luxembourg Prospectus for further details on Amundi's Responsible Investment Policy.

Amundi Global Aggregate Bond

Objective and investment policy

Objective

To track the performance of Bloomberg Global Aggregate Index (the "**Index**"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index description

- General description of the Index: Bloomberg Global Aggregate Index is a bond index representative of the global investment grade fixed-rate debt markets from both developed and emerging markets issuers. The Index is a Total Return Index: the coupons paid by the Index constituents are included in the index return.
- Index currency: US Dollar
- Index Composition: The securities composing the Index are rated investment grade (using middle rating of Moodys, S&P and Fitch) and have at least one year until final maturity. The Index is a multicurrency benchmark which is including treasury, government-related, corporate and securitized fixed-rate (including MBS and ABS) with fixed minimum issues sizes set for all eligible currencies.
- Index Revision: The Index rebalancing is planned monthly.
- Index Publication: The Index is calculated and published by Bloomberg.

Bloomberg Global Aggregate Index value is available via Bloomberg. At the date of the Luxembourg Prospectus, the ticker is: LEGATRUU

Prices used in the Index calculation are bid prices. Euro and Sterling Treasury bonds use mid prices.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

- Top 10 largest constituents of the Index as of 11 April 2025:

FNMA CONVENTIONAL LONG T. 30YR	0.66%
FNMA CONVENTIONAL LONG T. 30YR	0.45%
FNMA CONVENTIONAL LONG T. 30YR	0.35%
GOVERNMENT NATIONAL 2.0 NOV 2050	0.23%
FNMA CONVENTIONAL LONG T. 30YR	0.22%
GOVERNMENT NATIONAL 2.5 FEB 2051	0.22%
THE UNITED ST TSY 4.375% 15MAY34	0.17%
THE UNITED ST TSY 4.25% 15NOV34	0.17%
THE UNITED ST TSY 4.5% 15NOV33	0.17%
THE UNITED ST TSY 4% 15FEB34	0.17%

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in the section < *SUSTAINABLE INVESTING* > in the Luxembourg prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in the section < *GENERAL INVESTMENT POLICIES – REPLICATION METHODS FOR PASSIVELY MANAGED SUB-FUND* > in the Luxembourg Prospectus.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with the sections < *MORE ABOUT DERIVATIVES AND TECHNIQUES – TECHNIQUES AND INSTRUMENTS ON SECURITIES FINANCING TRANSACTIONS* > and < *GENERAL INVESTMENT POLICIES – REPLICATION METHODS FOR PASSIVELY MANAGED SUB-FUND* > in the Luxembourg Prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table in the section < *MORE ABOUT DERIVATIVES AND TECHNIQUES – USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS* > in the Luxembourg Prospectus.

- A12HU (C)

See paragraph 6 for details on the investment restrictions applicable to sub-funds included under the CPFIS and CPF interest rates.

Amundi Index MSCI Emerging Markets

Objective and investment policy

Objective

To track the performance of MSCI Emerging Markets Index (the "**Index**"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index description

- General description of the Index: MSCI Emerging Markets Index is an equity index representative of the large and mid-cap markets across 23 emerging countries. The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.
- Index currency: US Dollar
- Index Composition: Each stock of the Index is weighted in function of the size of its capitalization, adjusted with its free float.
- Index Revision: The Index rebalancing is planned quarterly.
- Index Publication: The Index is calculated and published by MSCI ("**MSCI**").

MSCI official indices are those calculated by MSCI using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Emerging Markets Index value is available via Bloomberg. At the date of the Luxembourg Prospectus, the ticker is: NDUEEGF

The performance tracked is the closing price of the MSCI Emerging Markets Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com).

- Top 10 largest constituents of the Index as of 11 April 2025:

TAIWAN SEMICONDUCTOR MANUFAC	8.99%
TENCENT HOLDINGS LTD	4.95%
ALIBABA GROUP HOLDING LTD	2.88%

XIAOMI CORP	1.26%
MEITUAN-CLASS B	1.22%
RELIANCE INDUSTRIES LTD	1.16%
ICICI BANK LTD	1.08%
CHINA CONSTRUCTION BANK HK	1.08%

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in the section < *SUSTAINABLE INVESTING* > in the Luxembourg prospectus and will not hold any securities of companies involved in the production or sale of

controversial weapons as defined in the section < *GENERAL INVESTMENT POLICIES – REPLICATION METHODS FOR PASSIVELY MANAGED SUB-FUND* > in the Luxembourg Prospectus.

German Investment Tax Act: At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 2%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

Amundi Prime USA

Objective and investment policy

Objective

To track the performance of Solactive GBS United States Large & Mid Cap Index (the "**Index**"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index description

- General description of the Index: Solactive GBS United States Large & Mid Cap Index is an equity index representative of the large and mid-cap securities listed and traded in the United States of America. The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.
- Index currency: US Dollar
- Index Composition: The equities are ranked by Free Float Market Capitalization in descending order, and the equities corresponding to large and mid-cap securities are selected.

The Free Float Market capitalization is calculated as the multiplication of the shares outstanding in Free Float multiplied with the Trading Price of the share class as of the selection day.

The stocks are weighted according to their Free Float Market Capitalization.

- Index Revision: The Index rebalancing is planned quarterly.
- Index Publication: The Index is calculated and published by Solactive.

Solactive GBS official indices are those calculated by Solactive using:

- the official closing prices of the stock exchanges on which the component securities are traded
- the WM Reuters closing (16:00 GMT) exchange rates.

Solactive GBS United States Large & Mid Cap Index value is available via Bloomberg. At the date of the Luxembourg Prospectus, the ticker is: SUSLMCN

The performance tracked is the closing price of the Solactive GBS United States Large & Mid Cap Index.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [solactive.de](https://www.solactive.de).

Business Day and Transaction Day

Please refer to the section "Interpretation" of this Singapore Prospectus for the definitions of the terms "Business Day" and "Transaction Day".

Transaction deadline for share classes not denominated as "UCITS ETF"

14:00 CET on the Business Day on the relevant Transaction Day.

In addition, technical net asset values ("T-NAV") may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a Business Day nor a Transaction Day. These T-NAV are merely indicative and will not be the basis for purchasing, switching, redeeming and/or transferring shares.

* Those minimums are applied in USD or in the equivalent amount, in the relevant share class currency.

** Out of the management fee:

(a) 100% is retained by the management company

(b) 0% is paid by the management company to financial adviser (trailer fee)⁷, median⁸ = 0% of the management fee

*** 0% for subscriptions with CPF monies.

Index provider disclaimer

See the relevant < SUB-FUND DESCRIPTIONS – Index provider disclaimer > in the Luxembourg Prospectus for the full details of the Index provider disclaimer. Solactive and the management company are not related corporations.

⁷ Your financial adviser is required to disclose to you the amount of trailer fee it receives from the management company.

⁸ The median is derived from all trailer-bearing Classes of the Sub-Fund (whether CPFIS-included or otherwise).

Sub-fund included under CPFIS

The sub-fund is included under the CPFIS – Ordinary Account.

The sub-fund is classified by the CPF Board under the risk classification of "Higher Risk – Narrowly Focused – Country – USA".

The following share classes are available for subscription by members of the public using their CPF monies:

- AS (C)
- AU (C)

See paragraph 6 for details on the investment restrictions applicable to sub-funds included under the CPFIS and CPF interest rates.

Amundi Singapore Straits Times

Objective and investment policy

Objective

To track the performance of Straits Times Index (the "**Index**"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index description

- General description of the Index: The Straits Times Index is an equity index representative of the leading securities traded in the Singaporean market. The Index is composed of the top 30 largest and liquid companies listed on the Singapore Exchange.

The Index is a Total Return Index: the dividends paid by the Index constituents are included in the Index return.

- Index currency: SGD
- Index Composition: the stocks are weighted based on their free-float and screened for liquidity to ensure the Index remains both tradable and investable.
- Index Revision: The Index rebalancing is planned Semi-annual.
- Index Publication: The Index is calculated and published by FTSE ("**FTSE**").

FTSE official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

Straits Times Index value is available via Bloomberg. At the date of the Luxembourg Prospectus, the ticker is: TSTIS

The performance tracked is the closing price of the Straits Times Index.

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

- Top 10 largest constituents of the Index as of 11 April 2025:

DBS GROUP HOLDINGS	25.09
OVERSEA-CHINESE BANKING	16.32
UNITED OVERSEAS BANK	12.38
SINGAPORE TELECOMMUNICATIONS	6.91
CAPITALAND INTEGRATED COMMERCIAL TRUST	3.07
JARDINE MATHESON HOLDINGS	3.01
SINGAPORE EXCHANGE	2.94
SINGAPORE TECHNOLOGIES ENGINEERING	2.78
KEPPEL	2.63
CAPITALAND ASCENDAS REIT	2.55

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its

investment process as outlined in more detail in the section < *SUSTAINABLE INVESTING* > in the Luxembourg prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in the section < *GENERAL INVESTMENT POLICIES – REPLICATION METHODS FOR PASSIVELY MANAGED SUB-FUND* > in the Luxembourg Prospectus.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with the sections < *MORE ABOUT DERIVATIVES AND TECHNIQUES – TECHNIQUES AND INSTRUMENTS ON SECURITIES FINANCING TRANSACTIONS* > and < *GENERAL INVESTMENT POLICIES – REPLICATION METHODS FOR PASSIVELY MANAGED SUB-FUND* > in the Luxembourg Prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table in the section < *MORE ABOUT DERIVATIVES AND TECHNIQUES – USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS* > in the Luxembourg Prospectus.

(a) 100% is retained by the management company

(b) 0% is paid by the management company to financial adviser (trailer fee)⁹

Index provider disclaimer

See the relevant < *SUB-FUND DESCRIPTIONS – Index provider disclaimer* > in the Luxembourg Prospectus for the full details of the Index provider disclaimer. FTSE and the management company are not related corporations.

Warnings

The sub-fund's investments are focused in the Singapore market. See paragraph 5.7(d) for details on the risks of such exposure.

⁹ Your financial adviser is required to disclose to you the amount of trailer fee it receives from the management company.

4. FEES AND CHARGES

4.1 Current fees and charges payable by you

See paragraph 3 (Share classes available under this Singapore prospectus and fees) in respect of each sub-fund for the fees and charges payable by you in connection with an investment in the relevant sub-fund.

The purchase fee is levied in favour of the Singapore Distributors. Singapore Distributors may deduct the purchase fee as a percentage of the gross investment amount (i.e. the total amount paid by the investor). You should also note that your Singapore Distributor may (depending on the specific nature of services provided) impose other fees and charges that are not disclosed in this Singapore Prospectus, and you should check with your Singapore Distributor on such fees and charges, if any. See paragraph 7.8 of this Singapore Prospectus for examples of the calculation of the purchase fee.

4.2 Current annual fees and charges payable out of the sub-funds

See paragraph 3 (Share classes available under this Singapore prospectus and fees) in respect of each sub-fund for the fees and charges payable out of the relevant sub-fund.

Management and administration fees are calculated on the basis of the relevant share class' NAV before taking into account any swing pricing adjustments. See paragraph 7.4 of this Singapore Prospectus for further details on the swing pricing policy applicable to the sub-funds.

(a) Management fee

The management company is entitled to receive a management fee as indicated for each sub-fund in paragraph 3 (Share classes available under this Singapore prospectus and fees). This fee is calculated based on each sub-fund's daily net assets and is paid in arrears in a frequency defined by the Management Company. The management company pays any investment managers, service providers and distributors out of the management company fee. The management company may decide to waive some or all of its fee in order to reduce the impact on performance. These waivers may be applied to any sub-fund or share class, for any amount of time and to any extent, as determined by the management company.

No performance fees will be payable in respect of the share classes offered under this Singapore Prospectus.

(b) Administration fee

The administration fee is mainly composed of:

- (i) fees of professional firms, such as the auditors and legal advisers;
- (ii) government, regulatory, registration, local representatives and cross-border marketing expenses;
- (iii) costs of providing information to shareholders, such as the costs of creating, translating, printing and distributing shareholder reports, prospectuses and Key Information Documents;
- (iv) extraordinary expenses, such as any legal or other expertise needed to defend the interests of shareholders; and
- (v) all other costs associated with operation and distribution, including expenses incurred by the management company, depositary and all service providers in the course of discharging their responsibilities to the SICAV.

4.3 Other fees and charges

Any fees payable to the Singapore Representative will be paid by the management company and not out of the assets of the sub-funds.

Expenses not included in the fees disclosed paragraph 3 (Share classes available under this Singapore prospectus and fees):

- taxes on assets and income;
- standard brokerage and bank charges incurred on business transactions and securities trades;
- any fees that the board agrees the SICAV should pay to independent board members for their service on the board (currently, no such fees are paid);
- any fees and costs incurred by the agents of Amundi Asset Management centralising orders and supporting best execution; some of these agents may be affiliates of Amundi.

Such expenses may amount to or exceed 0.1% p.a. of the relevant sub-fund's NAV, depending on the proportion that they bear to the relevant sub-fund's NAV.

All expenses that are paid from shareholder assets are reflected in NAV calculations, and the actual amounts paid are documented in the SICAV's annual reports.

Recurring expenses will be charged first against current income, then against realised capital gains, and lastly against capital.

Each sub-fund and/or class pays all costs it incurs directly and also pays its pro rata share (based on NAV) of costs not attributable to a specific sub-fund or class. For each share class whose currency is different from the base currency of the sub-fund, all costs associated with maintaining the separate share class currency (such as currency hedging and foreign exchange costs) will be charged to that share class.

See the section < *THE SICAV – Expenses* > in the Luxembourg Prospectus for more details on the other fees and charges payable by the SICAV.

5. RISK FACTORS

5.1 General

An investment in any sub-fund involves risks, including the risks referred to in this paragraph. Investments in the sub-funds are not bank deposits, and the value of your investment can go up and down, and you could lose money. No sub-fund is intended as a complete investment plan, nor are all sub-funds appropriate for all investors.

Before investing, you should understand the risks of investing in a sub-fund. You should consider the risks applicable to the relevant sub-fund as set out in paragraph 3 (Main risks).

The investment risks described in this Singapore Prospectus and the Luxembourg Prospectus are not purported to be exhaustive and you should review this Singapore Prospectus and the Luxembourg Prospectus in its entirety, and consult with your professional advisors, before subscribing for any shares.

You should note that differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk. In addition, if your home currency is different from the currency in which the relevant share class reports its performance, the performance you experience as an investor could be substantially different from the published performance of the relevant share class.

As with most investments, future performance of the sub-funds may differ from past performance. There is no guarantee that any sub-fund will meet its objectives or achieve any particular level of performance.

5.2 Disclosures on derivatives

(a) Use of derivatives

Consistent with its investment policy, a sub-fund may use derivatives for hedging against various types of risk, for efficient portfolio management or to gain exposure to certain investments or markets.

Each of the following sub-funds may use financial derivative instruments to gain exposure to various assets, markets or other investment opportunities:

- **Amundi Global Aggregate Bond**
- **Amundi Index MSCI Emerging Markets**
- **Amundi Index MSCI World**
- **Amundi Prime USA**
- **Amundi Singapore Straits Times**

In respect of these sub-funds, as derivatives might be used to achieve the investment objective, the level of risk might be increased in some cases.

See the section < *MORE ABOUT DERIVATIVES AND TECHNIQUES* > in the Luxembourg Prospectus for more details on the sub-funds' use of derivatives.

(b) Risks relating to the use of derivatives

A sub-fund's use of derivatives involves increased risks. See the section < *RISK DESCRIPTIONS* > in the Luxembourg Prospectus for more details.

(c) Risk management

The management company uses a risk-management process, approved and supervised by its board, that enables it to monitor and measure the overall risk profile of each sub-fund.

There are three possible risk measurement approaches, as described below. The management company chooses which approach each sub-fund will use, based on the sub-fund's investment strategy.

Approach	Description
Absolute VaR	The sub-fund seeks to estimate the maximum loss it could experience in a month (meaning 20 Business Days), and requires that 99% of the time, the sub-fund's worst outcome is no worse than a 20% decline in NAV.
Relative VaR	The sub-fund seeks to estimate the maximum loss it could experience beyond the estimated maximum loss of a benchmark (typically an appropriate market index or combination of indexes). The sub-fund calculates the amount that, with 99% certainty, is the limit for how much the sub-fund could underperform the benchmark over a month (20 Business Days). The absolute VaR of the sub-fund cannot exceed twice that of the benchmark.
Commitment	The sub-fund calculates all derivatives exposures as if they were direct investments in the underlying positions. This allows the sub-fund to include the effects of any hedging or offsetting positions as well as positions taken for efficient portfolio management. A sub-fund using this approach must ensure that its overall market exposure from derivatives commitments does not exceed 210% of total assets (100% from direct investment, 100% from derivatives and 10% from borrowings).

Any Sub-Fund that uses the Absolute or Relative VaR approaches must also calculate its expected gross level of leverage, which is stated in paragraph 3.

Factors contributing to the leverage include the use of derivatives as set out in the relevant sub-fund's investment policy. The risk allocation between those strategies depends on the identified investment opportunities.

See the section < *GENERAL INVESTMENT POLICIES - MANAGEMENT AND MONITORING OF GLOBAL RISK EXPOSURE* > in the Luxembourg Prospectus for more details on leverage.

The management company will, in accordance with the Luxembourg guidelines and regulations, ensure that the risk management and compliance procedures and controls adopted are adequate and have been or will be implemented. The management company will also, in accordance with the Luxembourg guidelines and regulations, ensure that it has the necessary expertise to control and manage the risks relating to the use of derivatives.

Investors may obtain supplementary information relating to the risk management methods employed by the sub-funds, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments, upon request by mail addressed to the registered office of the management company.

5.3 Disclosure on securities lending and repurchase transactions

Consistent with its investment policy, each sub-fund may use the following techniques and instruments on securities financing transactions for the purposes of efficient portfolio management:

(a) Securities lending and borrowing transactions

A sub-fund may lend securities or instruments with any counterparty that is subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law.

A sub-fund may lend portfolio securities or instruments either directly or through one of the following:

- a standardised lending system organised by a recognised clearing institution; or
- a lending system organised by a financial institution that specialises in this type of transaction.

Each sub-fund may borrow securities only in exceptional circumstances, such as:

- when securities that have been lent are not returned on time; or
- when, for an external reason, the sub-fund could not deliver securities when obligated to.

(b) Repurchase agreements and reverse repurchase agreement transactions

A sub-fund may enter into repurchase agreements only with counterparties that are subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law.

See the section < *MORE ABOUT DERIVATIVES AND TECHNIQUES – TECHNIQUES AND INSTRUMENTS ON SECURITIES FINANCING TRANSACTIONS* > in the Luxembourg Prospectus for more details on the securities lending and repurchase transactions that a sub-fund may participate in and the restrictions and limits applicable to such transactions.

See also the section < *RISK DESCRIPTIONS – Investment fund risk* > in the Luxembourg Prospectus for details on the risks involved when entering into such transactions.

The net revenues (that represent the gross revenues minus the direct and indirect operational costs and fees) achieved from efficient portfolio management transactions (including securities lending and reverse repurchase/repurchase transactions) remain with the relevant sub-fund. Direct and indirect operational costs may be deducted from the revenues delivered to the sub-fund.

As at the date of the Luxembourg Prospectus, Amundi Intermediation acts as securities lending agent. It is in charge of counterparty selection and best execution. The custodian, Caceis Bank, Luxembourg Branch, acts as collateral manager and performs the settlement of securities lending transactions. Both Amundi Intermediation and Caceis Bank, Luxembourg Branch are related parties to the management company, Amundi Luxembourg S.A. Such transactions may be executed with related parties, belonging to Credit Agricole Group such as Crédit Agricole CIB and CACEIS. The counterparties with whom securities lending transactions are entered will be detailed in the annual report of the SICAV. Further details on the acceptable collateral, valuation of collateral and counterparties used are set out under the section < *MORE ABOUT DERIVATIVES AND TECHNIQUES – TECHNIQUES AND INSTRUMENTS ON SECURITIES FINANCING TRANSACTIONS* > in the Luxembourg Prospectus.

As these operations may be done by companies of the same group as the management company or as the investment managers or as the sub-investment managers, these operations generate a risk of conflict of interest. Potential conflicts of interests will be managed in accordance with paragraph 12 of this Singapore Prospectus.

5.4 Exchange rate risks

Fluctuations in the exchange rates of your home country's currency and the currency of your shares may cause the value of your shares to go up or down in terms of your home country's currency. You may therefore be exposed to exchange rate risks.

Some share classes may provide a hedge for currency risks. See paragraph 1.2 above for the hedging to be used (if any) for the share classes offered under this Singapore Prospectus.

Each sub-fund may invest in assets denominated in currencies that are different from the sub-fund's base currency. This may expose you to variations of the exchange rates of the different currencies to which the sub-fund is exposed.

For sub-funds implementing a systematic hedging strategy¹⁰, a residual currency risk may exist due to the imperfection of the hedging. In this respect, the extent to which currency risks of a sub-fund will be hedged is at the discretion of the investment manager.

5.5 Risks relating to distribution of dividends

Distributing share classes are deemed to distribute part or all of its income received. In order to meet a target dividend, a sub-fund may end up paying out more money than it actually earned in dividends, meaning that you are effectively getting some of your capital back as a dividend. This may happen when dividend/interest income and capital gains are adversely affected by events such as investee entities suffering unexpected losses and/or paying lower than expected dividends, and adverse currency exchange rate fluctuations. Payment of distributions (whether out of dividend/interest income, capital gains, capital or otherwise) may have the effect of lowering the NAV of the relevant share class.

5.6 Disclosure on volatility

Each of the following sub-funds may involve above-average volatility and risk of loss due to its investment policies or portfolio management techniques:

- **Amundi Index MSCI Emerging Markets**
- **Amundi Index MSCI World**

¹⁰ “**systematic hedging strategy**” means that hedging will not be at the discretion of the relevant investment manager.

- **Amundi Prime USA**
- **Amundi Singapore Straits Times**

5.7 Index fund disclosures

- (a) Shareholders may obtain the latest information on the relevant sub-fund's Index on the relevant Index provider's website stated in paragraph 3 (Index description – Index Publication).
- (b) There is no assurance that each sub-fund will be able to fully track the performance of its Index. See the sections < *GENERAL INVESTMENT POLICIES - MANAGEMENT AND MONITORING OF GLOBAL RISK EXPOSURE – Replication Methods for passively managed sub-fund* > and < *RISK DESCRIPTIONS – Sampling index replication* > in the Luxembourg Prospectus for details of the circumstances that may lead to tracking errors, and the methods used in minimising such errors.
- (c) Errors or inaccuracies in an Index: there may be inaccuracies, errors, omissions or mistakes in the compilation or calculation of an Index, which may result in significant deviations between the NAV of the shares of the relevant sub-fund and the relevant Index. The accuracy and completeness of the calculation of an Index may be affected by, without limitation, the availability and accuracy of prices for its constituent securities, market factors and errors in its compilation. The SICAV and the management company are not responsible or involved in the compilation or calculation of any Index, and thus cannot be held responsible or liable for any inaccuracies, errors, omissions or mistakes in such compilation or calculation.

No warranty, representation or guarantee is given as to the accuracy or completeness of any Index and its computation or any information related thereto. The process and the basis of computing and compiling the Index and any of its related formulae, constituent companies and factors may at any time be changed or altered by the relevant Index provider without notice.

- (d) Concentration risk: Index securities will be comprised of securities listed in a specific sector or geographical region which may cause the relevant sub-fund to be less diversified as compared to a fund that invests in securities globally. To the extent that a property sector or a geographical region in which the Index securities are concentrated in falls out of favour, the relevant sub-fund's performance may be negatively affected.
- (e) Each sub-fund's Index composition may change from time to time.
- (f) Where a sub-fund's objective is to track an Index, the management company and the relevant investment manager may lack discretion to adapt to market changes and a fall in an Index may result in a corresponding fall in the relevant sub-fund's NAV. See the section < *RISK DESCRIPTIONS – Replication of index risk* > in the Luxembourg Prospectus for further details.
- (g) Licence to use the relevant Index may be terminated or the relevant Index may no longer be available for benchmarking: we have been granted a licence by the relevant Index licensor to use the relevant Index in connection with the operation, marketing and promotion of the relevant sub-fund, including, to use the relevant Index as a basis for the composition of the relevant sub-fund, and to use certain trade names and trademarks associated with the relevant Index of the relevant sub-fund.

A sub-fund may not be able to achieve its objective and may be terminated if the relevant Index licence agreement is terminated or the relevant Index is no longer available for benchmarking and we are unable to identify or agree with the relevant Index provider or any other index provider terms for the use of a suitable replacement index that uses, in our opinion, the same or substantially similar formula for the method of calculation as the relevant Index.

If we are able to obtain the use of a suitable replacement index for the relevant sub-fund, such replacement index will be notified to shareholders. Accordingly, you should note that the ability of the relevant sub-fund to track the relevant Index depends on the continuation in force of the relevant Index licence agreement in respect of the relevant Index or a suitable replacement.

- (h) Contingency plan: in the event that the relevant sub-fund's Index ceases to be available for any reason, the management company will use its best efforts to procure a suitable replacement index that, in the opinion of the management company, is substantially similar to the original Index. If no such index is immediately available, the management company will use its best efforts to work with the Index provider or an alternate index provider (as determined by the management company in its discretion) to develop an index that, in the opinion of the management company, is substantially similar to the original Index or, if necessary, consider whether liquidating the relevant sub-fund would be in the overall best interests of the Shareholders.

6. INCLUSION UNDER CPFIS

6.1 Sub-funds included under CPFIS

The following sub-funds are included under the CPFIS. See paragraph 3 (Sub-fund included under CPFIS) of the relevant sub-fund for details on the share classes available for subscription using CPF monies and the CPF account from which they may be paid from.

- Amundi Global Aggregate Bond
- Amundi Index MSCI Emerging Markets
- Amundi Index MSCI World
- Amundi Prime USA

6.2 Investment restrictions

The following investment guidelines apply to sub-funds included under the CPFIS:

- Investment guidelines under Appendix 1 of the MAS Code.
- CPF Investment Guidelines. Sub-funds included under CPFIS may invest in derivatives and/or engage in securities lending only in accordance with the CPF Investment Guidelines.

If any sub-fund included under the CPFIS is not compliant with the CPF Investment Guidelines and the SICAV is unable to carry out the remedial measures prescribed by the CPF Board, the SICAV (a) may have to cease accepting further purchases of the shares of the affected sub-fund with immediate effect, and (b) may seek to de-list the sub-fund from the CPFIS. The SICAV will notify shareholders before such delisting.

6.3 CPF interest rates

The CPF interest rate for the Ordinary Account ("OA") is computed based on the 3-month average of major local banks' interest rates, subject to the legislated minimum interest of 2.5% per annum. The interest rate for OA is reviewed quarterly.

The CPF interest rate for Special ("SA") and Medisave Account is computed based on the 12-month average yield of 10-year Singapore Government Securities plus 1%, subject to the current floor interest rate of 4% per annum. The interest rate is reviewed quarterly.

To enhance the retirement savings of Singaporeans, the CPF Board pays extra interest on the first \$60,000 of your combined CPF balances (capped at \$20,000 for OA). You could receive up to 6% on a portion of your CPF balances (depending on your age). Please note that the first \$20,000 in your OA and the first \$40,000 in your SA need to be set aside prior to investing OA and SA monies.

The applicable interest rates for each of the CPF accounts may be varied by the CPF Board from time to time.

Subscriptions using CPF monies are subject to the CPFIS regulations and conditions imposed by the CPF Board from time to time.

7. PURCHASING, SWITCHING, REDEEMING AND TRANSFERRING SHARES

7.1 Placing requests

Placing requests for share classes not denominated as "UCITS ETF"

You can place requests to buy, switch or redeem (sell back to the SICAV) shares at any time by approved electronic means, or by fax or letter to Singapore Distributors. Fax requests by nature are subject to transmission errors, and we cannot be responsible for fax orders that do not reach us, are not legible, or become garbled in transmission.

When placing any request, you must include all necessary identifying information and instructions as to the sub-fund, share class, account, and size and type of transaction (purchasing, switching or redeeming). You may indicate the value of a request as a currency (monetary) amount or a share amount. You should note that some Singapore Distributors may accept only subscription requests by monetary amount (and not by share amount), and accept only redemption and switching requests by share amount (and not by monetary amount), and you should check with your Singapore Distributor on its application requirements.

Note that requests that arrive at a time when transactions in sub-fund shares are suspended will be cancelled.

The deadline for applications received on a Transaction Day is defined in each sub-fund.

For each transaction, a confirmation notice will normally be sent to the registered account holder within 14 days (each of which is both a Singapore Business Day and a Business Day).

Dealings in kind and in Cash

The SICAV may accept subscriptions and pay redemptions either in kind or in cash (or a combination of both cash and in kind).

For Authorised Participants, the minimum initial subscription amounts and minimum redemption amounts may be higher than the amounts disclosed for each sub-fund in paragraph 3.

For the avoidance of doubt, for investors other than Authorised Participants, the minimum initial subscription amounts, and minimum redemption amounts will remain as stated for each sub-fund in paragraph 3.

See the section < *INVESTING IN THE SUB-FUNDS – Purchasing, Switching, Redeeming and Transferring Shares* > in the Luxembourg Prospectus for more details on subscriptions and redemptions in kind and in cash.

7.2 Cutoff times and processing schedule

For all investors on the primary market

Cutoff times and processing schedules for each sub-fund are defined in paragraph 3.

Any request to buy, switch, redeem or transfer shares must be received and accepted (meaning that they have arrived at the transfer agent and are considered complete and authentic) before the cutoff time defined in paragraph 3 for the relevant sub-fund. Any orders not considered to

be received before the cutoff time will be processed on the relevant sub-fund's next Transaction Day. The actual calculation and publication of NAV are also indicated in paragraph 3.

Different time limits may apply if subscriptions for shares are made through a distributor/financial intermediary but in any case, the financial intermediary/distributor will make sure that on a given Transaction Day, subscription orders are received before the cut-off time defined in paragraph 3 for the relevant sub-fund. No distributor/financial intermediary is permitted to withhold subscription orders to benefit personally from a price change. Investors should note that they might be unable to purchase or redeem shares through a distributor/financial intermediary on days that such distributor/financial intermediary is not open for business.

All applications for subscription/redemption will be dealt at an unknown Net Asset Value ("forward pricing").

See the section < *INVESTING IN THE SUB-FUNDS – Purchasing, Switching, Redeeming and Transferring Shares - Information that Applies to All Transactions Except Transfers and transactions on the secondary market – FOR ALL INVESTORS ON THE PRIMARY MARKET – Cutoff times and processing schedule* > in the Luxembourg Prospectus for more details on the cutoff times and processing schedule.

You should note that Singapore Distributors may impose dealing deadlines that are earlier than the relevant cutoff time. Furthermore, they may accept requests only on Singapore Business Days. Requests received or deemed to have been received by a Singapore Distributor after its dealing deadline, or on a day that is not a Singapore Business Day, may be dealt with by the relevant Singapore Distributor only on the next Singapore Business Day being a Business Day. You should confirm the applicable dealing deadline with your Singapore Distributor.

7.3 Pricing

Shares are priced at the NAV for the relevant share class and are quoted in the currency of that share class. Shares are priced on a forward pricing basis. The price will be the NAV that is calculated on the day on which your order is processed (not the day on which we receive your order). Since this NAV will be not calculated until at least one Business Day after we accept your request, it is not possible to know the share price in advance.

See the section < *INVESTING IN THE SUB-FUNDS – How We Calculate NAV* > in the Luxembourg Prospectus for more details on the calculation of the NAV of the shares.

7.4 Swing pricing

The swing pricing is a mechanism that aims to protect the existing shareholders from dilution of value caused by trading costs incurred as a result of subscription and redemption activity on a sub-fund on a particular day.

The mechanism is applied at the sub-fund level to all the share classes offered under this Singapore Prospectus and is not meant to address specific circumstances of each individual investor. The sub-funds apply full swing pricing, that means that swing pricing will be applied in any given Business Days where there is subscription and (or) redemption activity on the specific sub-funds.

The sub-fund's NAV will be adjusted in order to reduce the effect of dilution on that sub-fund. These adjustments will seek to reflect the actual prices of the underlying transactions, based on estimated dealing spreads, costs, and other market and trading considerations, in accordance with the internal process in place in the management company. The NAV will be adjusted upward when there is net inflows into the sub-fund and downward when there is net outflow into the sub-fund ("**full swing pricing**"). Any such adjustment will be applied to all the subscriptions and redemptions on this Transaction Day equally.

For any given Business Day the adjustment will normally not be larger than 2% of NAV, but the board can raise this limit when necessary to protect the interests of shareholders. In such a case, a communication to investors will be published in the dedicated website. The board may

delegate to one of the conducting officer of the management company to decide to apply a percentage larger than 2% under exceptional circumstances.

The board may decide to apply partial swing pricing instead of full swing pricing. Partial swing pricing means that the NAV will be adjusted only if the net subscriptions or redemptions exceed a certain threshold. In such case, a communication to shareholders will be published on the dedicated website: www.amundi.lu/amundi-index-solutions. If a partial swing pricing is adopted, any such adjustment will be applied to all the subscriptions and redemptions on this Transaction Day equally, when net inflows/outflows exceed the threshold. In the same way the board may decide at any given time to suspend partial swing pricing. The sub-fund(s) in scope of partial swing will then revert to apply full swing pricing. Shareholders are recommended to check the website to ascertain whether a sub-fund is currently applying full or partial swing. The management company makes, and periodically reviews, the operational decisions about swing pricing, in accordance with its internal process.

7.5 Buying shares

Also see paragraphs 7.1 to 7.3, and the section < *INVESTING IN THE SUB-FUNDS – Purchasing, Switching, Redeeming and Transferring Shares - Information that Applies to All Transactions Except Transfers and transactions on the secondary market* > in the Luxembourg Prospectus.

To make an initial investment, submit a completed application form and all account opening documentation (such as all required tax and anti-money laundering information) to a Singapore Distributor. If you place your request by fax, you must follow up by mailing a paper copy to the Singapore Distributor. Once an account has been opened, you can place additional orders by fax or letter.

Note that any order that arrives before your account is fully approved and established will normally be held until the account becomes operational.

If we do not receive full payment for your shares within the time indicated above for settlement, we may redeem your shares, cancel their issuance and return the payment to you, minus any investment losses and any incidental expenses incurred in cancelling/redeeming the shares issued (as more fully described in the section < *INVESTING IN THE SUB-FUNDS – Purchasing, Switching, Redeeming and Transferring Shares - Information that Applies to All Transactions Except Transfers and transactions on the secondary market – Failure to deliver* > in the Luxembourg Prospectus for Authorised Participants). You should note that Singapore Distributors may require payment of the investment amount in cleared funds prior to submission of a subscription request.

For optimal processing of investments, send money via bank transfer in the currency denomination of the shares you want to buy.

You may also subscribe using SRS monies (see “**SRS**” below) or CPF monies (see “**CPF monies**” below).

There is no “cooling-off” or cancellation period applicable for subscriptions.

A subscription request can only be withdrawn once it is placed if there is a suspension of trading in shares for the relevant sub-fund.

See the section < *INVESTING IN THE SUB-FUNDS – Purchasing, Switching, Redeeming and Transferring Shares* > in the Luxembourg Prospectus for more details on the issuance of shares, determination of the price of shares and the subscription procedure.

SRS

You may pay for shares with SRS monies if the relevant share class of the Sub-Fund has been made available for subscriptions using SRS monies, subject to any restrictions imposed from time to time by the relevant authority. You should check with your SRS operator bank on whether

subscriptions using SRS monies for that share class is available if you wish to subscribe for shares using SRS monies. If available, you should complete the relevant application form provided by your SRS operator bank and also instruct your SRS operator bank to debit monies from your SRS account as payment for the subscription of shares.

CPF monies

Investments using CPF monies are at all times subject to the regulations and requirements imposed by the CPF Board.

You must indicate that you are using CPF monies in the relevant application form, which also contains your instructions to your CPF agent bank to withdraw the relevant subscription monies from your CPF account.

Shares subscribed with CPF monies may not be held jointly.

7.6 Minimum subscription amounts

See paragraph 3 (Share classes available under this Singapore prospectus and fees) for the minimum subscriptions amounts in respect of the share classes of each sub-fund offered under this Singapore Prospectus. Singapore Distributors may also impose different minimum subscription amounts at their discretion and you should check with your Singapore Distributor.

7.7 Initial offer period

There is no initial offer period in Singapore in respect of the share classes of the sub-funds offered under this Singapore Prospectus.

The share classes that have not been inceptioned as at the date of this Singapore Prospectus will be inceptioned as soon as practicable after a subscription request for shares of these classes is received and accepted by the SICAV. If you invest in any of these Classes prior to inception, you will subscribe to such shares at the applicable initial price which may be obtained at www.amundi.com, the transfer agent or the Singapore Representative.

The board reserves the right not to proceed with the launch of the share classes that have not been inceptioned in the event that the board is of the view that it is not in the interest of the investors of such share classes or it is not commercially viable to proceed with such share classes. In such event, the relevant share classes shall be deemed not to have been activated and the SICAV and/or the management company may notify investors and return the subscription monies received (without interest) to investors.

7.8 Numerical example of the calculation of shares allotted

The following is an illustration of the number of shares you will receive with a hypothetical gross investment amount of USD1,000 at a notional subscription price (NAV per unit) of USD100 and a purchase fee of 4.5%:

USD 1,000.00	-	USD 45	=	USD 955.00
Gross investment amount		Purchase fee (4.5%)		Net Investment amount
USD 955.00	÷	USD 100	=	9.55
Net investment amount		NAV per unit		Number of shares allotted

The example above is for illustrative purpose only and would apply to all share classes currently offered under this Singapore Prospectus. The subscription price will fluctuate according to the NAV per share at the time of subscription.

7.9 Regular Savings Plan

For the time being, the SICAV does not offer RSPs in Singapore in respect of any sub-fund offered under this Singapore Prospectus. You may wish to check with your Singapore Distributor if it independently offers any RSP in respect of the relevant sub-fund. Any such RSP are offered by the relevant Singapore Distributor at its own discretion and sole responsibility.

7.10 Redeeming shares

Also see paragraphs 7.1 to 7.3, and the section < *INVESTING IN THE SUB-FUNDS – Purchasing, Switching, Redeeming and Transferring Shares - Information that Applies to All Transactions Except Transfers and transactions on the secondary market* > in the Luxembourg Prospectus.

When you redeem shares, we will send out payment (in the base currency of the share class) as mentioned in paragraph 3. To have your redemption proceeds converted to a different currency, contact the Singapore Distributor prior to placing your request (see section "The SICAV").

We will pay redemption proceeds only to the shareholder(s) identified in the register of shareholders. Proceeds are paid according to the bank account details we have on file for your account or SRS account (where applicable). The SICAV does not pay interest on redemption proceeds whose transfer or receipt is delayed for reasons that are beyond its control.

The board of Directors reserves the right to delay payment for a further five Business Days, without interest accruing, if market conditions are unfavourable, and it is, in the board of Directors' reasonable opinion, in the best interest of the remaining shareholders.

You should check with your Singapore Distributor whether any currency conversion requirements or currency settlement holidays will affect your receipt of redemption proceeds. Additionally, if payment of redemption proceeds is to be made on a Business Day that is not a Singapore Business Day, that payment may only be made on the next following Singapore Business Day.

Once you have placed a request to redeem shares, you can withdraw it only if there is a suspension of trading in shares for the relevant sub-fund.

Note that we will not pay out any redemption proceeds until we have received all investor documentation from you that we may consider necessary.

Further information on redemption of shares, the restrictions on the redemption volume, the procedures for redemptions valued in excess of 5% of outstanding shares or net assets of the relevant sub-fund are set out in the sections < *INVESTING IN THE SUB-FUNDS - Purchasing, Switching, Redeeming and Transferring Shares* > and < *INVESTING IN THE SUB-FUNDS - Rights We Reserve* > respectively in the Luxembourg Prospectus.

7.11 Minimum holding and minimum redemption amount

There is no minimum holding or minimum redemption amount in respect of the share classes offered under this Singapore Prospectus. However, Singapore Distributors may impose minimum holding or minimum redemption amounts at their discretion and you should check with your Singapore Distributor.

7.12 Numerical examples of calculation of redemption proceeds

The following is an illustration of the net redemption proceeds that you will receive based on a hypothetical redemption of 1,000,000 shares at a notional redemption price (NAV per share) of

USD 107, with no redemption fee:

1,000.000 shares	x	USD 107	=	USD 107,000.00
Redemption request		Notional redemption price		Net redemption proceeds

The example above is for illustrative purpose only and would apply to all share classes currently offered under this Singapore Prospectus. The redemption price will fluctuate according to the NAV per share at the time of redemption and may be above or below the original subscription price paid for the shares being redeemed.

7.13 Compulsory redemption of shares

If the board believes that any shares are being held in whole or in part by an ineligible owner, or that the circumstances of ownership may cause the SICAV to be taxed by jurisdictions other than Luxembourg, the board may redeem the relevant shares without the shareholder's consent. At the board's option, the board may request certain information from the shareholder to establish eligibility, but the board may still at any time proceed with forcible redemption. The SICAV will not be held liable for any gain or loss associated with these redemptions.

See the section < *INVESTING IN THE SUB-FUNDS – Rights We Reserve* > in the Luxembourg Prospectus for more details on compulsory redemption of shares.

7.14 Switching shares

You may only switch your shares to shares of other share classes offered under this Singapore Prospectus.

To ensure that a switch is permissible, see section < *INVESTING IN THE SUB-FUNDS – Share Classes* > in the Luxembourg Prospectus or contact a Singapore Distributor.

All switches are subject to the following conditions: You must meet all eligibility requirements for the share class into which you are requesting to switch; You can only switch into a sub-fund and share class that is available in your country of residence; The switch must not violate any particular restrictions of either sub-fund involved (as stated in the relevant < *SUB-FUND DESCRIPTIONS* > in the Luxembourg Prospectus).

We process all switches of shares on a value-for-value basis, using the NAVs of the two investments (and, if applicable, any currency exchange rates) that are in effect as at the time we process the switch.

Once you have placed a request to switch shares, you can withdraw it only if there is a suspension of trading in shares for the relevant sub-fund.

You should note that shares subscribed for using SRS monies or CPF monies (where applicable) may only be switched to another share classes which may be subscribed for using SRS monies or CPF monies (as the case may be).

A switching fee of up to the maximum percentage stated in paragraph 3 (Share classes available under this Singapore prospectus and fees) in respect of the relevant sub-fund may be charged for the switch.

See the section < *INVESTING IN THE SUB-FUNDS – Purchasing, Switching, Redeeming and Transferring Shares – SWITCHING SHARES* > in the Luxembourg Prospectus for more details on switching of shares.

7.15 Transferring shares

See the section < *INVESTING IN THE SUB-FUNDS – Purchasing, Switching, Redeeming and Transferring Shares – Transferring Shares* > in the Luxembourg Prospectus and ask your

Singapore Distributor for information on transferring shares.

8. NET ASSET VALUE AND OBTAINING PRICE INFORMATION

8.1 Calculation of NAV

See the section < *INVESTING IN THE SUB-FUNDS – How We Calculate NAV* > in the Luxembourg Prospectus for details on how the NAV for each share class of each sub-fund is calculated.

8.2 Obtaining price information

You may obtain the NAV per share of the classes of the sub-funds offered under this Singapore Prospectus from the Singapore Representative. The NAV of a particular Transaction Day is normally available on the website www.amundi.com.sg on the NAV publication day set out in paragraph 3.

You should note that published and quoted prices do not represent the actual prices of the shares issued or redeemed (as the case may be) on the day of publication or quotation since shares are priced on a forward pricing basis.

9. SUSPENSION OF DEALINGS

See the section < *INVESTING IN THE SUB-FUNDS – Rights We Reserve* > in the Luxembourg Prospectus for details on the circumstances in which the SICAV may temporarily suspend the calculation of NAVs or transactions in a sub-fund's shares.

10. PERFORMANCE OF THE SUB-FUNDS

10.1 Past performance of the sub-funds (as at 28 February 2025)

Amundi Global Aggregate Bond					
Share Class and Inception Date	1 Year (%)	3 Years (%)	5 Years (%)	10 Years (%)	Since Inception (%)
A12HS (C) Inception: 9 Mar 2022					
Single NAV (adjusted)	3.51	-	-	-	-0.67
Benchmark (in SGD)	4.02	-	-	-	-0.14
A12HU (C) Inception: 9 Mar 2022					
Single NAV (adjusted)	5.51	-	-	-	0.71
Benchmark (in USD)	5.98	-	-	-	1.21
Benchmark: (a) from inception to 16 January 2024: Bloomberg Global Aggregate (500 Million) Index (b) from 17 January 2024 to present: Bloomberg Global Aggregate Index (Reason for change from previous benchmark: The aim of these changes is to provide the shareholders with an exposure to the performance of the Bloomberg Global Aggregate Index which, like the Bloomberg Global Aggregate (500 Million) Index, is a bond index representative of the global investment grade fixed-rate debt markets from both developed and emerging markets issuers but with fixed minimum issues sizes set for all eligible currencies and no longer a minimal amount outstanding of EUR 500 million.					

Amundi Index MSCI Emerging Markets					
Share Class and Inception Date	1 Year (%)	3 Years (%)	5 Years (%)	10 Years (%)	Since Inception (%)

Benchmark: Solactive GBS United States Large & Mid Cap Index					

Amundi Singapore Straits Times					
Benchmark: Straits Times Index					

Share Class AS Acc has not been incepted and a track record of at least one year is not available.

Notes:

- (1) **"Single NAV (adjusted)"** performance figures are calculated in the relevant class currency on a bid-to-bid basis (taking into account the purchase fee and the redemption fee, if any) with net distributions (if any) reinvested.
- (2) The figure for the one year performance return shows the percentage change, while the figures for performance returns in respect of more than one year show the average annual compounded return.
- (3) To protect the interests of all shareholders by mitigating the negative impact of dilution on the relevant sub-fund's returns, swing pricing may be applied in the circumstances set out in paragraph 7.4 of this Singapore Prospectus. Performance of the relevant share class will be calculated based on "swung" prices, and therefore the performance of the relevant share class may be influenced by the level of subscription and/or redemption activity. This may increase the variability of the returns of the relevant share class with swing pricing accounted for in the calculation of performance returns.
- (4) Benchmark performance figures are calculated in the relevant share class currency.
- (5) **Past performance of the share classes is not necessarily indicative of their future performance.**

10.2 Total expense ratios and turnover ratios

The total expense ratios and turnover ratios of the sub-funds for the year ended 30 September 2024 are as follows:

Sub-fund	Share class expense ratio (%)	Sub-fund turnover ratio (%)
Amundi Global Aggregate Bond	A12HS (C): 0.10 A12HU (C): 0.10	33.69
Amundi Index MSCI Emerging Markets	A12S (C): 0.20 A12U (C): 0.20	9.29
Amundi Index MSCI World	A12S (C): 0.10 A12U (C): 0.10	274.22
Amundi Prime USA	AS (C): 0.05 AU (C): 0.05	50.30
Amundi Singapore Straits Time	AS Acc: N.A.	Not available

Notes:

- (1) The expense ratios are calculated in accordance with the requirements in the Investment Management Association of Singapore's guidelines on the disclosure of expense ratios (the **"IMAS Guidelines"**) and based on the latest audited accounts of the SICAV for the financial year ended 30 September 2024. As set out in the IMAS Guidelines (as may be updated from time to time), the following expenses (where applicable) are excluded from the calculation of the expense ratio:
 - (a) interest expense;
 - (b) brokerage and other transaction costs associated with the purchase and sales of investments (such as registrar charges and remittance fees);
 - (c) foreign exchange gains and losses of the sub-fund, whether realised or unrealised;
 - (d) tax deducted at source or arising from income received, including withholding tax;

- (e) front-end loads, back-end loads and other costs arising from the purchase or sale of a foreign unit trust or mutual fund; and
 - (f) dividends and other distributions paid to shareholders.
- (2) The total expense ratios for the share classes that have been incepted for less than a year are calculated from its respective inception dates to 30 September 2024 (where applicable) and annualised.
- (3) The turnover ratio is calculated based on the lesser of purchases or sales of underlying investments of the sub-fund expressed as a percentage of daily average NAV. The turnover ratio is a composite figure for a sub-fund as a whole and not calculated at the share class level.

Past performance of the sub-funds is not necessarily indicative of their future performance.

11. SOFT DOLLAR COMMISSIONS

Each investment manager and sub-investment manager may use soft commission arrangements to enable them to obtain goods, services or other benefits (such as research) that are beneficial to the management of the SICAV, in the best interest of the shareholders. All transactions undertaken on a soft commission basis in respect of the SICAV will be subject to the fundamental rule of best execution and will also be disclosed in the shareholder reports.

See the section < *THE SICAV – Best Execution* > in the Luxembourg Prospectus for more details on the best execution policy of the investment managers and sub-investment managers.

12. CONFLICTS OF INTEREST

From time to time, Amundi may face situations in which the SICAV's interests are in conflict with those of another client or of Amundi or one of its employees.

Directors:

The members of the board may have conflicts of interests, principally arising from their roles within various service providers to the SICAV and from their role as directors of other investment vehicles. The board will have regard to their obligations to act in the best interests of the SICAV and its shareholders in managing these conflicts.

Depository:

The management company is not independent of the depository. The depository and certain sub-custodians within the same group as the depository, have the same indirect majority shareholder as Amundi, which in turn ultimately holds 100% of the management company.

Amundi entities and affiliates:

Each of the investment managers, the management company, and other members or affiliates of Amundi from time to time and their respective officers, employees and affiliates (the "**Amundi entities and affiliates**") may undertake financial, investment or professional activities which give rise to conflicts of interest with the SICAV and/or its shareholders. Where there is a material risk of damage to the SICAV and/or its shareholders arising from any conflict, this conflict will be managed by the Amundi entities and affiliates to prevent the conflict from adversely affecting the interests of the SICAV and/or its shareholders so far as it is practicable having regard to their obligations to other clients. Where it cannot be managed it will be disclosed to the SICAV. In many cases, approval by the SICAV of arrangements with the Amundi entities and/or affiliates will be the primary mechanism of managing potential conflicts.

Examples of potential conflicts include the following:

- (a) Service provision: The investment manager and the management company providing structuring services may propose that the SICAV enters into agreements with the investment manager and affiliated entities or third parties with which the investment manager or its affiliates has a broader commercial relationship for the provision of various services in respect of which they may receive fees, spreads and other compensation. The final decision as to which service provider is chosen is made by the board.
- (b) Allocations: There may be occasions when an Amundi entity and/or affiliate has an interest in fees and expenses charged by or in relation to investment funds or managed accounts in which a sub-fund directly or indirectly invests, or has an interest in the underlying investment managers themselves. The investment manager will follow procedures designed to ensure that the fees charged by any individual underlying investment manager are generally in the range of those charged in accordance with standard market practice, taking into account all relevant circumstances applicable to that manager. In this context, the term 'interest' means, without limitation, a business relationship, financial relationship or other commercial dynamic which results in business, commercial, financial or other material interest being generated in relation to the subject matter.
- (c) Competitor products: The investment manager and/or its affiliates provide and may in the future provide investment management, investment advice or other services in relation to separate competitor investment products or managed accounts. These competitor vehicles may have investment policies similar to those of any of the sub-funds or entities through which they make investment allocations and the investment manager may be compensated in a different manner in respect of those vehicles. The investment manager will follow procedures designed to ensure an appropriate allocation of available investment opportunities among the sub-funds and competitor vehicles.
- (d) Proprietary investment activities: Any of the Amundi entities and/or affiliates may buy, hold and redeem shares of the sub-funds in the normal course of their business and may on occasions hold a significant percentage of sub-funds' issued shares. They may also enter into transactions as principal with the SICAV on behalf of any of the sub-funds.

In order to ensure the protection and primacy of client's interests and to comply with the applicable regulations, Amundi has implemented a policy and procedures aimed at preventing situations involving conflicts of interests (examples of which are set out under (a) to (d) above) and resolving such situations if they could arise.

Amundi has implemented specific preventive procedures, including regular reviews of certain activities and transactions. For this purpose, and as required under the prevailing regulations, Amundi has mapped the various possible conflicts of interest situations that could arise in the conduct of its activities. The risk mapping is updated regularly to incorporate developments and changes in Amundi's business activities.

Amundi is structured in such a way as to segregate functions that are vulnerable to conflicts of interest, right up to senior management level. Fund management, trading, middle-office, valuation (outsourced) and marketing teams are therefore clearly segregated.

There is a system for employees to report any potential or actual conflict of interest situations.

The key measures and controls implemented by Amundi to prevent and manage conflicts of interest are as follows:

- An internal policy for managing conflicts of interest which includes instructions employees has to comply with in order to identify, prevent and manage conflicts of interest.

- Strict procedures and rules governing the handling of orders and primacy of the client interest. Amundi complies strictly with the operating rules of the financial markets in which it operates and does not allow certain orders to be given preferential treatment.
- Strict procedures and rules governing the selection and remuneration of intermediaries. Market intermediaries are always selected in the best interests of the clients. Amundi selects its intermediaries primarily on the basis of an analysis of the quality/price relationship carried out by a dedicated committee whose members include traders, fund managers and analysts, as well as compliance, risk management and middle office representatives.
- Internal committees (broker/dealer, products, risk management, compliance, audit, compensation), which take full account of ethical considerations in their decisions.
- Appropriate training of relevant employees to ensure that they are fully aware of their responsibilities and obligations.

For more information, see <http://about.amundi.com/Legal-Documentation>.

13. REPORTS

The SICAV's financial year ends on 30 September each year.

Audited annual reports are issued within 4 months of the end of the financial year. Unaudited semi-annual reports are issued within 2 months of the end of the period they cover.

Copies of the latest annual and semi-annual reports, when available, may be obtained from the Singapore Representative on request during normal Singapore business hours.

14. PERSONAL DATA PROTECTION

For the purposes of the Personal Data Protection Act 2012, by subscribing for shares you consent and acknowledge that personal data provided by you to the Singapore Representative and/or the SICAV (whether directly or through your Singapore Distributor), or otherwise collected by or on behalf of a Recipient (defined below) in connection with the subscription for shares, including any personal data relating to third party individuals (e.g. beneficial owners, directors or authorised signatories of investors who are not individuals) (the "**Data**") may be held by the SICAV and/or their related corporations (each a "**Recipient**"), and/or any third party engaged by a Recipient to provide administrative, computer or other services. Each of the foregoing persons may collect, use, disclose, process and maintain such Data for the following purposes and other purposes in connection with the administration, operation, processing or management of the shares, the SICAV or a sub-fund, including but not limited to (i) maintaining the register of shareholders, (ii) processing applications for subscriptions, redemptions and switching of shares and payments to shareholders, (iii) monitoring late trading and market timing practices, (iv) complying with applicable anti-money laundering rules and regulations, (v) tax identification for the purpose of complying with FATCA and any other applicable tax laws and regulations, (vi) complying with any legal, governmental, or regulatory requirements of any relevant jurisdiction (including any disclosure or notification requirements), (vii) complying with the requirements or directions of any regulatory authority, (viii) providing client-related services, including providing customer support, communicating with and disseminating notices and reports to individuals purporting to be investors or purporting to represent investors, (ix) identity verification, and (x) to exercise or enforce the rights of a Recipient under contract or pursuant to applicable laws and regulations.

Where you provide to a Recipient personal data relating to third party individuals, you warrant that the prior consent of such third party individual, which will allow a Recipient to collect, use and disclose that personal data in the manner and for the purposes described, has been obtained, and you consent and acknowledge to all such collection, use and disclosure on behalf

of that third party individual. Subject to applicable laws and regulations, such Data may be transferred to the Singapore Representative's holding company in France and the Singapore Representative's affiliated companies in Hong Kong and Luxembourg. All such Data may be retained after your shares have been redeemed. The Data collected may be maintained for such period of time which may be required under applicable laws and as otherwise needed to fulfil the purposes set out above. You have a right of access and of rectification of the Data in cases where such Data is incorrect or incomplete.

You may refuse to consent to the collection, use, and disclosure of the Data. Where such refusal is made, the SICAV (whether directly or through the appointed agent or distributor) is entitled to reject any application to subscribe to shares submitted by you. You may, after consenting to the collection, use and disclosure of your Data, withdraw your consent by giving notice in writing to the Singapore Representative or the SICAV (whether directly or through your Singapore Distributor). You should note that a notice of withdrawal of consent submitted by you shall (1) also be deemed to be a request for redemption of all your shares and (2) not prevent the continued use or disclosure of Data for the purposes of compliance with any legal, governmental or regulatory requirements of any relevant jurisdiction.

15. FIGHT AGAINST MONEY LAUNDERING AND FINANCING OF TERRORISM

To comply with Luxembourg laws, regulations, circulars, etc. aimed at preventing money laundering and the financing of terrorism, we or any distributor or delegate (especially the Registrar and Transfer Agent) may require certain types of account documentation to allow us ensuring proper identification of Investors and ultimate beneficial owners.

We or any distributor or delegate may ask you in addition to the application form, any information and supporting documents we deem necessary as determined from time to time (either before opening an account or at any time afterward) to ensure proper identification in the meaning of applicable laws and regulations, including information about the beneficial ownership, proof of residence, source of funds and origin of wealth in order to be compliant at all times with applicable laws and regulations.

You will also be required regularly to supply updated documentation and in general, you must ensure at all times that each piece of information and documentation provided, especially on the beneficial ownership, remains up to date.

In case you subscribe through an intermediary and/or financial intermediary investing on your behalf, enhanced due diligence measures are applied in accordance with applicable laws and regulations, to analyse the robustness of the AML/CFT control framework of the intermediary/ financial intermediary.

Delay or failure to provide the required documentation may result in having any order delayed or not executed, or any proceeds withheld. Neither us or our delegates have any liability for delays or failure to process deals as a result of an investor providing no or only incomplete information and/or documentation.

It is further acknowledged that the SICAV, the Management Company and the registrar and transfer agent shall be held harmless by the Authorised Participant against any loss arising as a result of a failure to process the subscription if information that has been requested by the Management Company or the registrar and transfer agent has not been provided by the Authorised Participant.

We shall ensure that due diligence measures on investments are applied on a risk-based approach in accordance with applicable laws and regulations.

16. SINGAPORE TAX CONSIDERATIONS

You should consult your tax adviser on any possible tax you may be liable to pay if you invest

in a sub-fund.

17. QUERIES AND COMPLAINTS

If you have any questions concerning your investments in the SICAV or a sub-fund, you may contact the Singapore Representative at telephone number (65) 6439 9333 during normal business hours.

18. OTHER MATERIAL INFORMATION

You should carefully read the other provisions set out in the Luxembourg Prospectus to which you are bound, including but not limited to provisions relating to excessive trading and market timing, shareholder meetings and the liquidation or merger of the SICAV, sub-funds or share classes.

A WORD TO POTENTIAL INVESTORS

ALL INVESTMENTS INVOLVE RISK

With these sub-funds, as with most investments, future performance may differ from past performance. There is no guarantee that any sub-fund will meet its objectives or achieve any particular level of performance.

Sub-Fund investments are not bank deposits. The value of your investment can go up and down, and you could lose money. No sub-fund in this prospectus is intended as a complete investment plan, nor are all sub-funds appropriate for all investors.

Before investing in any sub-fund, you should understand the risks, costs, and terms of investment of that sub-fund. You should also understand how well these characteristics align with your own financial circumstances and tolerance for investment risk.

As a potential investor, it is your responsibility to know and follow the laws and regulations that apply to you and to be aware of the potential tax consequences of your investment. We recommend that every investor consult an investment adviser, legal adviser and tax adviser before investing.

Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk. In addition, if your home currency is different from the currency in which the share class you own reports its performance, the performance you experience as an investor could be substantially different from the published performance of the share class.

WHO CAN INVEST IN THESE SUB-FUNDS

Distributing this prospectus, offering these shares for sale, or investing in these shares is legal only where the shares are registered for public sale or where sale is not prohibited by local law or regulation. This prospectus is not an offer or solicitation in any jurisdiction, or to any investor, where such a solicitation is not legally permitted.

These shares are not registered with the US Securities and Exchange Commission or any other US entity, federal or otherwise. Therefore, unless the SICAV is satisfied that it would not constitute a violation of US securities laws, these shares are not available to, or for the benefit of, US persons.

For more information on restrictions on share ownership, or to request board approval to invest in a restricted class (see section "Share Class Policies").

WHICH INFORMATION TO RELY ON

In deciding whether or not to invest in a sub-fund, you should look at this prospectus, the relevant Key Information Document (KID), the application form (where relevant), and the sub-fund's most recent annual report.

These documents must all be distributed together (along with any more recent semi-annual report, if published), and this prospectus is not valid without the other documents. By buying shares in any of these sub-funds, you are considered to have accepted the terms described in these documents.

Together, all these documents contain the only approved information about the sub-funds and the SICAV. The board is not liable for any statements or information about the sub-funds or the SICAV that is not contained in these documents. In case of any inconsistency in translations of this prospectus, the English version will prevail.

Terms with specific meanings

The terms in this box have the following meanings within this prospectus: Words and expressions that are defined in the 2010 Law but not here have the same meaning as in the 2010 Law.

2010 Law The Luxembourg law of December 17, 2010 on Undertakings for Collective Investment, as amended.

Latin America Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, El Salvador, Ecuador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Uruguay, Venezuela.

Member state A member state of the EU or of the European Economic Area.

SFT Securities financing transactions as defined in the Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse (SFTR)

SUB-FUND DESCRIPTIONS

Introduction to the sub-funds

All of the sub-funds described here are part of AMUNDI INDEX SOLUTIONS, a SICAV that functions as an umbrella structure. The SICAV exists to offer investors a range of sub-funds with different objectives and strategies, and to manage the assets of these sub-funds for the benefit of investors.

For each sub-fund, the specific investment objectives and the main securities it may invest in, along with other key characteristics, are described in this section. In addition, all sub-funds are subject to the general investment policies and restrictions that are described in section "General investment policies".

The board of the SICAV has overall responsibility for the SICAV's business operations and its investment activities, including the investment activities of all of the sub-funds. The board has delegated the day-to-day management of the sub-funds to the management company, which in turn has delegated some of its responsibilities to a number of investment managers and other service providers.

The board retains supervisory approval and control over the management company. More information about the SICAV, the board, the management company and the service providers in sections "The SICAV" and "The Management Company".

For information on fees and expenses you may have to pay in connection with your investment, consult the following:

- Maximum fees for purchase, switching and redeeming shares: this section (main classes) and "Investing in the sub-funds" section (all families of classes).
- Maximum annual fees deducted from your investment: this section and section "Share Classes".

Recent actual expenses: the applicable KID or the SICAV's most recent shareholder report.

Fees for currency conversions, bank transactions, and investment advice: your financial advisor, the transfer agent (section "The SICAV") or other service providers, as applicable.

MENA (Middle East and North Africa) Bahrain, Egypt, Jordan, Kuwait, Lebanon, Morocco, Oman, Qatar, Saudi Arabia, Tunisia and the United Arab Emirates.

NAV Net asset value; the value of one share.

Portfolio Composition File means the file setting out the Investments and/or Cash Component which may be delivered by (a) Authorised Participants in the case of subscriptions or (b) the SICAV in the case of redemptions;

Prospectus This document, as amended from time to time.

RTS are a consolidated set of technical standards defined by European Parliament and the Council and published on 6 April 2022, which provide additional detail on the content, methodology and presentation of certain existing disclosure requirements under the Disclosure Regulation and the Taxonomy Regulation. The RTS were accompanied by five annexes, which provide mandatory disclosure templates.

SICAV Amundi Index Solutions, a Luxembourg-domiciled SICAV.

Shareholder reports The annual and semi-annual reports of the SICAV.

Sustainability factors for the purposes of art. 2.(24) of SFDR mean environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery.

Sustainable investment for the purposes of art. 2.(17) of the SFDR mean (1) An investment in an economic activity that contributes to an environmental objective, as measured by key resource efficiency indicators on (i) the use of energy, (ii) renewable energy, (iii) raw materials, (iv) water and land, (v) on the production of waste, (vi) greenhouse gas emissions, or (vii) its impact on biodiversity and the circular economy, or (2) an investment in an economic activity that contributes to a social objective (in particular an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations), or (3) an investment in human capital or economically or socially disadvantaged communities, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

Information on Amundi's methodology to assess if an investment qualify as a Sustainable Investment can be found in the Amundi ESG Regulatory Statement available on amundi.com.

Sustainability risks for the purpose of art. 2 (22) of SFDR means an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. Risks related to environmental issues includes, but is not limited to, climate risk, both physical and transition risk. Physical risk arises from the physical effects of climate change, acute or chronic. For example, frequent and severe climate-related events can impact products and services and supply chains. Transition risk whether policy, technology, market or reputation risk arises from the adjustment to a low-carbon economy in order to mitigate climate change.

Risks related to social issues can include but are not limited to human rights, health and safety, inequality, integration and labor rights.

Risks related to governance related risks can include but are not limited to risks around significant and recurring breaches of international agreements, corruption, board independence, ownership and control, or audit and tax management.

These risks can impact an issuer's operational effectiveness and resilience as well as its public perception, and reputation affecting its profitability and in turn, its capital growth, and ultimately impacting the value of the components of the index tracked by the Sub-Fund.

Taxonomy Regulation or TR means regulation 2020/852 of the European Parliament and of the Council of 27th November 2019 on the establishment of a framework to facilitate sustainable investment and amending Regulation (EU) 2019/2088 'disclosure regulation' or "SFDR".

Transaction costs means any costs and expenses incurred in respect of the buying and selling of portfolio securities and financial instruments, brokerage fees and commissions, interest or taxes payable in respect of such purchase and sale transactions.

Transaction Day A Business Day on which the received and accepted orders for subscription, redemption and/or conversion requests can be processed by the Registrar Agent acting on behalf of the SICAV.

Each Business Day will be a Transaction Day, however, Business Days when, in the sole determination of the Investment Manager, markets on which the Sub-Fund's Investments are listed or traded, or markets relevant to the Index are closed and as a result of which a substantial portion of the Index may not be traded, shall not be Transaction Days.

The days which are not Transaction Days for the current year are available on www.amundi.lu.

The Directors may determine such other day(s) to be Transaction Days from time to time were notified to all Shareholders.

TRS Total return swaps.

US person Any of the following:

- a US resident, a trust of which a US resident is a trustee, or an estate of which a US resident is an executor or administrator;
- a partnership or corporation organized under US federal or state law;
- an agency or branch of a foreign entity located in the US;
- a non-discretionary or similar account (other than an estate or trust account) that is held by a dealer or other fiduciary who is one of the above, or for the benefit or account of one of the above or below;
- a partnership or corporation organised or incorporated by one of the above under non-US laws primarily for investing in securities that are not registered under the 1933 Act, unless organised and owned by;
- accredited investors who are not natural persons, estates or trusts.

US tax resident Any of the following:

- a US citizen or resident, or the estate of such a person;
- a partnership or corporation organized in the US or under US federal or state law;
- a trust that is substantially controlled by any of the above and is substantially within the jurisdiction of a US court.

we, us The SICAV, acting through the board or through any service providers described in this prospectus except for the auditor and any distributors.

you Any past, current or prospective shareholder, or an agent for the same.

Sub-Funds Passively Managed

Objective and Investment Policy

Objective

To track the performance of FTSE EPRA/NAREIT Developed Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The FTSE EPRA/NAREIT Developed Index is an equity index representative of the listed real estate companies and REITS worldwide.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

EPRA stands for European Public Real Estate Association and NAREIT National Association of Real Estate Investment Trust.

- Index currency: Euro
- Index Composition

Each stock of the Index is weighted in function of the size of its capitalization, adjusted with its free float.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by FTSE ("FTSE").

FTSE official indices are those calculated by FTSE using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

FTSE EPRA/NAREIT Developed Index value is available via Bloomberg. At the date of the prospectus, the ticker is: TRNGLE

The performance tracked is the closing price of the FTSE EPRA/NAREIT Developed Index.

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on ftse.com

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI INDEX MSCI EMERGING MARKETS

Objective and Investment Policy

Objective

To track the performance of MSCI Emerging Markets Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI Emerging Markets Index is an equity index representative of the large and mid-cap markets across 23 emerging countries.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

Each stock of the Index is weighted in function of the size of its capitalization, adjusted with its free float.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are those calculated by MSCI using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Emerging Markets Index value is available via Bloomberg. At the date of the prospectus, the ticker is: NDUEEGF

The performance tracked is the closing price of the MSCI Emerging Markets Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 2%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. AMUNDI MSCI JAPAN ESG BROAD TRANSITION

Objective and Investment Policy

Objective

To track the performance of MSCI Japan ESG Broad CTB Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI Japan ESG Broad CTB Select Index is an equity index based on the MSCI Japan Index (the "Parent Index") representative of the large and mid-cap securities of the Japanese Market. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with a strong MSCI ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Japanese Yen
- Index Composition

MSCI Japan ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the MSCI ESG Score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are those calculated by MSCI using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Japan ESG Broad CTB Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXJPEBSL

The performance tracked is the closing price of the MSCI Japan ESG Broad CTB Select Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE AMUNDI, THIS SUB-FUND'S UNITHOLDERS OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDICES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS SUB-FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS SUB-FUND IS REDEEMABLE. FURTHERMORE, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS SUB-FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS SUB-FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDICES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE SUB-FUND, OWNERS OF THE SUB-FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHERMORE, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

AMUNDI MSCI NORTH AMERICA ESG BROAD TRANSITION

Objective and Investment Policy

Objective

To track the performance of MSCI North America ESG Broad CTB Select Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI North America ESG Broad CTB Select Index is an equity index based on the MSCI North America Index representative of the large and mid-cap segments of the US and Canada markets (the "Parent Index"). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

MSCI North America ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the ESG score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI North America ESG Broad CTB Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXNAEBSL

The performance tracked is the closing price of the MSCI North America ESG Broad CTB Select Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of CAC 40 ESG Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

CAC 40 ESG Index is an equity index representative of the top 40 companies demonstrating strong Environmental, Social and Governance practices within the CAC Large 60 Index (Parent Index) representing the 60 leading stocks on the Paris stock market. The Index aims to deliver a reduced weighted carbon footprint and improved green-to-brown ratio compared to its Parent Index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The applicable universe consists of the companies included in the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Euronext.

The CAC 40 Index is calculated by Euronext using the official closing prices of the stock exchanges on which the Index components are traded.

CAC 40 ESG Index value is available via Bloomberg. At the date of the prospectus, the ticker is: CACESGNR

The performance tracked is the closing price of the CAC 40 ESG Index.

Euronext index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [euronext.com](https://www.euronext.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 65% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

S&P MAKES NO WARRANTY, CONDITION OR REPRESENTATION, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY AMUNDI, INVESTORS, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE S&P 500 INDEX OR ANY DATA INCLUDED THEREIN. S&P MAKES NO EXPRESS OR IMPLIED WARRANTIES, REPRESENTATIONS OR CONDITIONS, AND EXPRESSLY DISCLAIMS ALL WARRANTIES OR CONDITIONS OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE AND ANY OTHER EXPRESS OR IMPLIED WARRANTY OR CONDITION WITH RESPECT TO THE S&P 500 INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL S&P HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS) RESULTING FROM THE USE OF THE S&P 500 OR ANY DATA INCLUDED THEREIN, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Objective and Investment Policy

Objective

To track the performance of DAX INDEX (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

DAX Index is an equity index representative of leading securities traded in the German market. The index is composed of the 40 largest market caps on the Frankfurt Stock Exchange.

The index is a Total Return Index : the dividends paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The DAX Index is capital-weighted index, whereby the weight of any individual issue is proportionate to its respective share in the overall capitalisation of the index. However, only freely available and tradable shares ("free float") are taken into account. So weighting in the Index is based exclusively on the free-float portion of the issued share capital. The number of shares of individual companies might be capped for the DAX Index to achieve a limited weight of such companies within the Index.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Stoxx .

DAX INDEX value is available via Bloomberg. At the date of the prospectus, the ticker is: DAX

The performance tracked is the closing price of the DAX INDEX.

Stoxx index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

Objective and Investment Policy

Objective

To track the performance of DivDAX Total Return Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

DivDAX Total Return Index is an equity index representative of 15 large and mid cap German companies that are part of the German DAX benchmark index and have the highest dividend yield. The dividend yield is calculated by dividing distributed dividends by the closing price of the respective share on the day preceding the ex date.

The index is a Total Return Index : the dividends paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The index comprises the 15 companies of the German DAX benchmark index with the highest dividend yield. The Index is weighted on the basis of free-float market capitalisation principles, with an upper weighting limit of 10% in relation to each share.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Stoxx .

DivDAX Total Return Index value is available via Bloomberg. At the date of the prospectus, the ticker is: DIVDAX

The performance tracked is the closing price of the DivDAX Total Return Index.

Stoxx index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Objective and Investment Policy

Objective

To track the performance of SDAX Total Return Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

SDAX Total Return Index is an equity index representative of mid and small cap securities across German Market.

The index is a Total Return Index : the dividends paid by the Index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The SDAX Index is the selection index for 70 smaller companies (small caps) that follow the companies included in the MDAX index in terms of market capitalization and order book turnover.

For inclusion in the SDAX only those companies will be considered that are listed on any regulated market and show a free float portion of at least 10%. Moreover, companies must either have their headquarters in Germany or, if they have a major share of the stock exchange turnover in Germany, in the European Union or in an EFTA state.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Stoxx .

SDAX Total Return Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SDYP

The performance tracked is the closing price of the SDAX Total Return Index.

Stoxx index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Objective and Investment Policy

Objective

To track the performance of EURO STOXX 50 Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

EURO STOXX® 50 Index is an equity index representative of the 50 leading securities of Eurozone developed countries (as defined in the index methodology).

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The EURO STOXX 50 Index includes equities that cover all economic sectors and are chosen for their level of market capitalisation, their liquidity and their sector weighting. Each stock of the Index is weighted in function of the size of its capitalization, adjusted with its free float.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Stoxx.

The EURO STOXX 50 Index is calculated daily using the official closing prices of the stock exchanges on which the Index components are traded.

EURO STOXX 50 Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SX5T

The performance tracked is the closing price of the EURO STOXX 50 Index.

Stoxx index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 65% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

The licensing agreement between the Amundi Asset Management and STOXX is solely for their benefit and not for the benefit of the owners of the AMUNDI EURO STOXX 50 or any other third parties.

AMUNDI EURO STOXX SELECT DIVIDEND30

Objective and Investment Policy

Objective

To track the performance of EURO STOXX Select Dividend 30 (Net Return) EUR Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

EURO STOXX Select Dividend 30 Net Return EUR Index is an equity index representative of the highest-yielding stocks relative to their home market within the Eurozone countries.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The Index components are selected from the components of the EURO STOXX and their secondary lines. The Index universe comprises all companies in the EURO STOXX Index that, inter alia, pay a dividend and show a non-negative historical dividend growth per share for the 5-year period as well as a non-negative pay-out ratio (ratio of the dividend to the profit per share) of no more than 60%. The EURO STOXX Index consists of the largest stocks of selected Eurozone countries and is part of the STOXX 600 Index. Components in the index are weighted by their indicated annual net dividend yield.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Stoxx .

EURO STOXX Select Dividend 30 (Net Return) EUR Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SD3T

The performance tracked is the closing price of the EURO STOXX Select Dividend 30 (Net Return) EUR Index.

Stoxx index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

Objective and Investment Policy

Objective

To track the performance of FTSE EPRA/NAREIT Developed Europe Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

FTSE EPRA/NAREIT Developed Europe Index is an equity index representative of leading listed real estate securities and REIT traded in the major stock markets of developed European countries (as defined in the index methodology).

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

EPRA stands for European Public Real Estate Association and NAREIT National Association of Real Estate Investment Trust.

- Index currency: Euro
- Index Composition

The FTSE EPRA/NAREIT Developed Europe Strategy Index is a sub-category of the FTSE EPRA/NAREIT Developed Index.

The Initial Universe of companies consists of companies with the following ICB Classifications: Supersector Real Estate, Subsector Heavy Construction and Subsector Home Construction.

The Initial Universe may be expanded by FTSE Russell with other ICB (Industry Classification Benchmark) classified companies with guidance from EPRA, NAREIT and the Regional Advisory Committee.

Relevant real estate activities are defined as the ownership, trading and development of incomeproducing real estate.

Real estate companies must have derived, in the previous full financial year, at least 75 percent of their total EBITDA from relevant real estate activities.

Each stock of the Index is weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by FTSE("FTSE").

The FTSE EPRA/NAREIT Developed Europe strategy index is calculated on a daily basis using:

- the official closing prices of the stock exchanges on which the component securities are traded
- the WM Reuters closing (16:00 GMT) exchange rates

FTSE EPRA/NAREIT Developed Europe Index value is available via Bloomberg. At the date of the prospectus, the ticker is: NEPRA

The performance tracked is the closing price of the FTSE EPRA/NAREIT Developed Europe Index.

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of Solactive Global Infrastructure Low Earnings Volatility Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Solactive Global Infrastructure Low Earnings Volatility Index is an equity index representative of the listed infrastructure companies worldwide with the most stable earnings growth.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

Inclusion in the Index is based on the following criteria

- Listed equity
 - No trade restrictions for foreigners.
 - Minimum Average Daily Value traded of EUR 5 million over the six months
 - Minimum Float Market Capitalization of EUR 500 million.
 - Classified as an Infrastructure Company according to the FactSet Revere Business and Industry Classification System (RBICS).
- Within the index universe the 100 stocks with the lowest volatility of earnings are selected as the index components.

The Solactives methodology and calculation methods mean that the number of stocks making up the Solactive Global Infrastructure Low Earnings Volatility Index may vary with a maximum of 100 stocks.

Each stock of the Index is weighted in function of the size of its capitalization, adjusted with its free float, with a maximum weight cap of 4% on any individual stock, and a maximum sector exposure of 25%.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by Solactive .

Solactive official indices are those calculated by Solactive using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

Solactive Global Infrastructure Low Earnings Volatility Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SOLGILEV

The performance tracked is the closing price of the Solactive Global Infrastructure Low Earnings Volatility Index.

The performance tracked by the Index is the closing price of the Solactive Global Infrastructure Low Earnings Volatility Index.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of TOPIX Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

TOPIX Index is an equity index representative of leading securities traded in the Japanese market.

The index is a Total Return Index : the dividends paid by the index constituents are included in the Index return.

- Index currency: Japanese Yen

- Index Composition

The TOPIX Index includes all the Japanese equities listed on "Section One" of the Tokyo Stock Exchange and weights the companies by their free float adjusted market capitalisation.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Topix.

The TOPIX Index is calculated by S&P using the official closing prices of stock exchanges on which the Index components are traded.

TOPIX Index value is available via Bloomberg. At the date of the prospectus, the ticker is: TPXDDVD

The performance tracked is the closing price of the TOPIX Index.

Topix index methodology, composition, revision rules and additional information concerning the Index underlying components are available on jpx.co.jp

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Index provider disclaimer

THE FUND(S) IS (/ARE) NOT SPONSORED, APPROVED, DISTRIBUTED OR PROMOTED BY THE TOKYO STOCK EXCHANGE, INC (INDEX PROVIDERS). The index provider(s) make(s) no declaration as to the suitability of an investment. A full description of the indices is available from Tokyo Stock Exchange, Inc (/the providers).

Objective and Investment Policy

Objective

To track the performance of JPX-Nikkei 400 Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

JPX-Nikkei 400 Index is an equity index representative of the Japanese equities universe listed on the first two sections of the Tokyo Stock Exchange as well as on the "Mother" and JASDAQ markets.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Japanese Yen

- Index Composition

The JPX-Nikkei 400 Index includes securities that are rated based on quantitative criteria (return on shareholders' equity over the past three years for 40%, operating profit over the past three years for 40%, market capitalisation for 20%) and on qualitative criteria related to corporate governance (independent Directors on Boards of Directors, adoption of IFRS accounting standards, publication of information in English). Qualitative and quantitative criteria have the same weighting.

The 400 securities with the highest overall ratings are included in the Index. Each stock of the Index is weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned annually.

- Index Publication

The Index is calculated and published by Nikkei.

The JPX-Nikkei 400 Index is calculated by JPX-Group and Nikkei using the official closing prices of stock exchanges where the Index components are traded.

JPX-Nikkei 400 Index value is available via Bloomberg. At the date of the prospectus, the ticker is: JPNKNTR

The performance tracked is the closing price of the JPX-Nikkei 400 Index.

Nikkei index methodology, composition, revision rules and additional information concerning the Index underlying components are available on jpx.co.jp

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Index provider disclaimer

The "Index" and "JPX-Nikkei Index 400 Total Return Index" (or "JPX-Nikkei Index 400 Net Total Return Index") (hereinafter collectively referred to as the "Index") are copyrighted materials calculated using a methodology independently developed and created by Japan Exchange Group, Inc. and Tokyo Stock Exchange, Inc. (hereinafter collectively referred to as the "JPX Group") and Nikkei Inc. (hereinafter referred to as "Nikkei"), and the JPX Group and Nikkei jointly own the copyrights and other intellectual property rights subsisting in the "Index" itself and the methodology used to calculate the "Index";

The ownership of trademarks and of any other intellectual property rights with respect to marks representing "Index" belongs to JPX Group and Nikkei.

JPX Group and Nikkei do not sponsor, support, sell or market AMUNDI JPX-NIKKEI 400. JPX Group and Nikkei have - besides granting the license to the Amundi Asset Management to use certain trademarks and to use "Index" for AMUNDI JPX-NIKKEI 400 - no connection with AMUNDI JPX-NIKKEI 400. The license agreement between the Amundi Asset Management and both JPX Group and Nikkei does not provide any rights to any third parties.

AMUNDI JPX-NIKKEI 400 is managed exclusively at the risk of the Amundi Asset Management and both, JPX Group and Nikkei, shall assume no obligation or responsibility for its management and the transactions of AMUNDI JPX-NIKKEI 400. JPX Group and Nikkei are not responsible for the accuracy and the calculation of AMUNDI ETF

JPX Group and Nikkei have no obligation to publish "Index" continuously and shall not be liable for any errors, postponements, interruptions, suspensions and cessations of the publication of "JPX-Nikkei Index 400."

JPX Group and Nikkei shall have the right to make any changes in the future in "Index" regarding the selection of constituent shares and the calculation methods. JPX Group and Nikkei shall have the right to suspend or cease the publication of "Index" without owing any liability to the Amundi Asset Management or any other third party.

Objective and Investment Policy

Objective

To track the performance of MSCI China Tech IMI All Share Stock Connect Filtered Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI China Tech IMI All Share Stock Connect Filtered Index (the 'Index') aims to represent the performance of companies that are associated with the development of new products and services from technology innovations leading to breakthroughs in areas such as internet and digitization, mobility, autonomous technology, industrial automation and digital healthcare, while excluding those involved in certain controversial business activities or with relatively low MSCI ESG Controversies scores or MSCI ESG Ratings.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Eligible Universe of the Index is constructed by selecting all securities from MSCI China Investable Market Index (IMI) (the Parent Index) that have a Relevance Score* of 25% or more. To determine the Eligible Universe, further filtering is applied as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI China Tech IMI All Share Stock Connect Filtered Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXCTIAEF

The performance tracked is the closing price of the MSCI China Tech IMI All Share Stock Connect Filtered Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of MSCI China A Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Benchmark Index is a free float-adjusted capitalisation-weighted index that is representative of exposure to the performance mid-cap and large-cap A shares. A shares are the shares of companies that are incorporated in the People's Republic of China, excluding Hong Kong and Macau (the PRC) and which are traded on the Shanghai and Shenzhen stock exchanges and quoted in Chinese yuan (CNY). The Benchmark Index is representative of A shares that are traded on Shanghai Hong-Kong Stock Connect or Shenzhen Hong-Kong Stock Connect exchanges (the "Stock Connect Programmes") and which are components of the MSCI China All Shares Index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Benchmark Index is comprised of A shares that are also components of the MSCI China All Shares Index. The MSCI China All Shares Index is representative of mid-cap and large-cap companies within the universe of companies incorporated in China, or outside of China but which MSCI considers to be Chinese. This universe includes shares listed on the Hong Kong, Shanghai and Shenzhen exchanges or on exchanges outside of China. The Benchmark Index is a free float-adjusted capitalisation-weighted index, which means that the weight of each of its components is proportional to its free-float market capitalisation.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI China A Index value is available via Bloomberg. At the date of the prospectus, the ticker is: NU718708

The performance tracked is the closing price of the MSCI China A Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Index provider disclaimer

AMUNDI MSCI CHINA A II (THE "SUB-FUND") IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI INC. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDICES ARE THE EXCLUSIVE PROPERTY OF MSCI AND ARE SERVICE MARKS OF MSCI OR ITS AFFILIATES. THE MSCI INDICES HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY AMUNDI. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS SUB-FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN SUB-FUNDS GENERALLY OR IN THIS PARTICULAR SUB-FUND OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDICES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO AMUNDI OR THIS SUB-FUND OR THIS SUB-FUND'S UNITHOLDERS OR ANY OTHER PERSON OR ENTITY.

NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE AMUNDI, THIS SUB-FUND'S UNITHOLDERS OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDICES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS SUB-FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS SUB-FUND IS REDEEMABLE. FURTHERMORE, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS SUB-FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS SUB-FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDICES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE SUB-FUND, OWNERS OF THE SUB-FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHERMORE, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Objective and Investment Policy

Objective

To track the performance of MSCI Emerging Markets Asia Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI Emerging Markets Asia Index is an equity index representative of the large and mid-cap markets across Asian emerging countries (as defined in the index methodology).

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

According to the MSCI methodology the investment universe of the index aims at covering approximately 85% (+/-5%) of the underlying markets float-adjusted market capitalisation. Each stock of the Index is weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Emerging Markets Asia Index value is available via Bloomberg. At the date of the prospectus, the ticker is: NDUEEGFA

The performance tracked is the closing price of the MSCI Emerging Markets Asia Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

AMUNDI MSCI EUROPE EX SWITZERLAND ESG LEADERS

(until 01/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI Europe ex Switzerland ESG Leaders Select 5% Issuer Capped Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI Europe ex Switzerland ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI Europe ex Switzerland Index ("Parent Index") representative of large and mid-cap stocks across 14 Developed Markets (DM) countries in Europe (as of May 2022) excluding Switzerland and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities of the Parent Index.

The securities are selected by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe ex Switzerland ESG Leaders Select 5% Issuer Capped Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXECHENE

The performance tracked is the closing price of the MSCI Europe ex Switzerland ESG Leaders Select 5% Issuer Capped Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EUROPE EX SWITZERLAND ESG SELECTION

(as from 02/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI Europe ex Switzerland ESG Selection P-Series 5% Issuer Capped Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI Europe ex Switzerland ESG Selection P-Series 5% Issuer Capped Index is an equity index based on the MSCI Europe ex Switzerland Index ("Parent Index") representative of large and mid-cap stocks across 14 Developed Markets (DM) countries in Europe (as of May 2022) excluding Switzerland and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities of the Parent Index.

The securities are selected by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe ex Switzerland ESG Selection P-Series 5% Issuer Capped Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXECHENE

The performance tracked is the closing price of the MSCI Europe ex Switzerland ESG Selection P-Series 5% Issuer Capped Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EUROPE GROWTH

Objective and Investment Policy

Objective

To track the performance of MSCI Europe Growth Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI Europe Growth Index is an equity index representative of leading securities traded in the markets of the European developed countries (as defined in the index methodology) representing growth securities.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The MSCI Europe Growth Index is a sub-category of the MSCI Europe index. According to the MSCI methodology the investment universe of the MSCI Europe index aims at covering approximately 85% (+/-5%) of the underlying markets float-adjusted market capitalization.

The MSCI Europe Growth Index includes stocks of companies that have a potential for increasing its profits and that have financial ratios that are generally higher than the average for its sector and its market, which could cause the value of the security to rise.

The growth investment style characteristics for index construction are defined using five variables: long-term forward Earning per Share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

Each security is given growth scores and is then placed into the growth index. Each stock of the Index is weighted according to the free float-adjusted market capitalization and its growth score.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe Growth Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MSGEUNTR

The performance tracked is the closing price of the MSCI Europe Growth Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 52% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EUROPE HIGH DIVIDEND FACTOR

Objective and Investment Policy

Objective

To track the performance of MSCI Europe High Dividend Yield Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI Europe High Dividend Yield Index is an equity index representative of leading securities traded in the markets of the European countries with the highest dividend yields in their respective developed countries (as define in the index methodology).

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The MSCI Europe High Dividend Yield Index is a sub-category of the MSCI Europe index.
According to the MSCI methodology the investment universe of the MSCI Europe index aims at covering approximately 85% (+/-5%) of the underlying markets float-adjusted market capitalization.
The index is designed to reflect the performance of equities in the MSCI Europe index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent.
Each stock of the Index is weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe High Dividend Yield Index value is available via Bloomberg. At the date of the prospectus, the ticker is: M1EUHDVD

The performance tracked is the closing price of the MSCI Europe High Dividend Yield Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

AMUNDI MSCI EUROPE MINIMUM VOLATILITY FACTOR

Objective and Investment Policy

Objective

To track the performance of MSCI Europe Minimum Volatility Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI Europe Minimum Volatility Index is an equity index representative of a portfolio of equities in the MSCI Europe index, selected to obtain the lowest possible absolute volatility of the portfolio while respecting the predefined risk diversification requirements (such as, for example, minimum and maximum weightings of securities, sectors and/or countries compared to the MSCI Europe index). Portfolio volatility is a measure of the risk, consisting of quantifying the amplitude of the variations of the value of the portfolio both to the upside and to the downside over a given period. Accordingly, the higher the volatility, the more the investment in this portfolio will be considered as risky and the more the risk of loss and/or expectation of gain will be significant. Low volatility nevertheless is not synonymous with risk-free investment.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The MSCI Europe Minimum Volatility Index is composed of stocks in the MSCI Europe index. These equities are selected based on a systematic quantitative optimisation technique carried out in the two steps described below.

According to the MSCI methodology the investment universe of the MSCI Europe index aims at covering approximately 85% (+/-5%) of the underlying market's float-adjusted market capitalization.

The construction of the MSCI Europe Minimum Volatility Index is a two-step process:

1. Determination of a series of risk diversification requirements such as the minimum and maximum weightings applicable to each security, to each sector and each country in order to obtain a portfolio structure that is similar to that of the MSCI Europe index;
2. Selection and weighting of the stocks in the portfolio using the systematic quantitative optimisation matrix for the portfolio (use of the Barra Optimizer model) that takes into account:
 - the absolute historical volatility of the equities,
 - the risk diversification requirements, and
 - a matrix with the correlations of the components of the MSCI Europe index.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe Minimum Volatility Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MAEUVOE

The performance tracked is the closing price of the MSCI Europe Minimum Volatility Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an Indirect Replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EUROPE MOMENTUM FACTOR

Objective and Investment Policy

Objective

To track the performance of MSCI Europe Momentum Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI Europe Momentum Index is an equity index representative of securities from European developed countries (as defined in the index methodology) that have posted the best performances over the 6 and 12 months preceding the last rebalancing date of the index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The MSCI Europe Momentum Index is a sub-category of the MSCI Europe Index.

According to the MSCI methodology the investment universe of the MSCI Europe index aims at covering approximately 85% (+/-5%) of the underlying markets float-adjusted market capitalization.

Equities included in the MSCI Europe Momentum Index are selected on the basis of a strategy of holding the securities that have posted the best performances over the 6 and 12 months preceding the last rebalancing date of the index, considering that the rise in the price of these securities tends to continue in the short-term, typically over 6 to 12 months. However, any potential outperformances of the MSCI Europe Momentum Index compared to the MSCI Europe Index are not guaranteed.

Each security is given momentum scores and is then placed into the momentum index. Each stock of the Index is weighted according to the free float-adjusted market capitalization and its momentum score.

No security may have a weighting of more than 5% on each rebalancing date.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe Momentum Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MAEUMMT

The performance tracked is the closing price of the MSCI Europe Momentum Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

AMUNDI MSCI EUROPE QUALITY FACTOR

Objective and Investment Policy

Objective

To track the performance of MSCI Europe Quality Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI Europe Quality Index is an equity index representative of securities traded in the major stock markets of developed European countries (as defined in the index methodology) with a long-term quality growth potential.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The MSCI Europe Quality Index is a sub-category of the MSCI Europe index. According to the MSCI methodology the investment universe of the MSCI Europe index aims at covering approximately 85% (+/-5%) of the underlying markets float-adjusted market capitalization.

The index aims to capture the performance of quality growth stocks by identifying stocks with high quality scores based on three main fundamental variables: high return on equity (ROE), stable year-over-year earnings growth and low financial leverage. However, any potential outperformances of the MSCI Europe Quality index compared to the MSCI Europe Index over the long term are not guaranteed. A score is also calculated for each security using these criteria.

The securities are weighted according to their market capitalisation and their score.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe Quality Index value is available via Bloomberg. At the date of the prospectus, the ticker is: M7EUQU

The performance tracked is the closing price of the MSCI Europe Quality Index.

AMUNDI MSCI EUROPE VALUE FACTOR

Objective and Investment Policy

Objective

To track the performance of MSCI Europe Value Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI Europe Value Index is an equity index representative of leading securities of European developed countries (as defined in the index methodology) exhibiting overall value style characteristics.

The Index is a Net Total Return Index : the dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The MSCI Europe Value Index is a sub-category of the MSCI Europe index. According to the MSCI methodology the investment universe of the MSCI Europe index aims at covering approximately 85% (+/-5%) of the underlying markets float-adjusted market capitalization.

The MSCI Europe Value Index includes stocks of companies that are undervalued by the market in relation to the value of their assets and their profit growth; consequently there is potential for the fair value of the securities to rise.

The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.

Each security is given value scores and is then placed into the value index. Each stock of the Index is weighted according to the free float-adjusted market capitalization and its value score.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe Value Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MSVEUNTR

The performance tracked is the closing price of the MSCI Europe Value Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Planning Your Investment

Designed for Investors who understand the risks of the sub-fund and plan to invest for at least 5 years.

The sub-fund may appeal to investors who:

- are interested in investment growth in the long term
- are looking to replicate the performance of the Index while accepting its associated risks and volatility

Please refer to the section "Terms with specific meanings" for the definitions of the terms "Business Day" and "Transaction Day".

Transaction deadline for share classes not denominated as "UCITS ETF": 17:00 CET on the relevant Transaction Day.

Transaction deadline for share classes denominated as "UCITS ETF": 18:00 CET on the relevant Transaction Day.

In addition, technical net asset values ("T-NAV") may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a Business Day nor a Transaction Day. These T-NAV are merely indicative and will not be the basis for purchasing, switching, redeeming and/or transferring shares.

NAV publication Day : **Transaction Day +1**

Switching in/out Permitted

THE MSCI INDICES ARE THE EXCLUSIVE PROPERTY OF MSCI AND ARE SERVICE MARKS OF MSCI OR ITS AFFILIATES. THE MSCI INDICES HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY AMUNDI. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS SUB-FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN SUB-FUNDS GENERALLY OR IN THIS PARTICULAR SUB-FUND OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDICES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO AMUNDI OR THIS SUB-FUND OR THIS SUB-FUND'S UNITHOLDERS OR ANY OTHER PERSON OR ENTITY.

NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE AMUNDI, THIS SUB-FUND'S UNITHOLDERS OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDICES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS SUB-FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS SUB-FUND IS REDEEMABLE. FURTHERMORE, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS SUB-FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS SUB-FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDICES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE SUB-FUND, OWNERS OF THE SUB-FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHERMORE, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Objective and Investment Policy

Objective

To track the performance of MSCI India Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI India Index is an equity index representative of leading securities traded in the Indian market.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar

- Index Composition

According to the MSCI methodology the investment universe of the index aims at covering approximately 85% (+/-5%) of the Indian Market float-adjusted market capitalisation. Each stock of the Index is weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI India Index value is available via Bloomberg. At the date of the prospectus, the ticker is: NDEUSIA

The performance tracked is the closing price of the MSCI India Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

MSCI Nordic Countries Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MSDENCN

The performance tracked is the closing price of the MSCI Nordic Countries Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI PEA MSCI USA ESG LEADERS

(until 01/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI USA ESG LEADERS SELECT 5% Issuer Capped Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI USA ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI USA Index ("Parent Index"), representative of the large and mid-cap securities of the US market and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities of the Parent Index.

The securities are selected by applying a combination of values based exclusions and a best-in-class selection process to companies in the MSCI USA Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI USA ESG LEADERS SELECT 5% Issuer Capped Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXUSESL5

The performance tracked is the closing price of the MSCI USA ESG LEADERS SELECT 5% Issuer Capped Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco and coal as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

AMUNDI MSCI USA MINIMUM VOLATILITY FACTOR

Objective and Investment Policy

Objective

To track the performance of MSCI USA Minimum Volatility Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI USA Minimum Volatility Index is an equity index.

The MSCI USA Minimum Volatility Strategy Index measures the performance of a minimum variance strategy applied to the large and mid-cap USA equity universe, selected based on a systematic quantitative optimisation model (the Barra Optimizer model). This model seeks to obtain the lowest possible absolute volatility of the portfolio, via requirements for the diversification of predefined risks (i.e.: min. and max. weighting of securities, sectors with respect to the MSCI USA index) portfolio structure close to that of the MSCI USA Index.

Portfolio volatility is a measure of the risk, consisting of quantifying the amplitude of the variations of the value of the portfolio both to the upside and to the downside over a given period. Accordingly, the higher the volatility, the more the investment in this portfolio will be considered as risky and the more the expectation of gain and/or the risk of loss will be significant. Low volatility nevertheless is not synonymous with risk-free investment.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The index is calculated by optimizing the MSCI USA Index, its parent index, in USD for the lowest absolute risk (within a given set of constraints). The construction of the MSCI USA Minimum Volatility Strategy Index is a two-step process:

1. Determination of a series of risk diversification requirements such as the minimum and maximum weightings applicable to each security and to each sector in order to obtain a portfolio structure that is similar to that of the MSCI USA Index;
2. Selection and weighting of the stocks in the portfolio using the systematic quantitative optimisation matrix for the portfolio (use of the Barra Optimizer model) that takes into account:
 - the absolute historical volatility of the equities,
 - the risk diversification requirements, and
 - a matrix with the correlations of the components of the MSCI USA Index.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are those calculated by MSCI using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI USA Minimum Volatility Index value is available via Bloomberg. At the date of the prospectus, the ticker is: M1USMVOL

The performance tracked is the closing price of the MSCI USA Minimum Volatility Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

FURTHERMORE, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS SUB-FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS SUB-FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDICES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE SUB-FUND, OWNERS OF THE SUB-FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHERMORE, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Objective and Investment Policy

Objective

To track the performance of MSCI WORLD Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

MSCI World Index is an equity index representative of the large and mid-cap markets across developed countries as defined in the index methodology.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro

- Index Composition

According to the MSCI methodology the investment universe of the index aims at covering approximately 85% (+/-5%) of the underlying markets float-adjusted market capitalisation. Each stock of the Index is weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI WORLD Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MSDEWIN

The performance tracked is the closing price of the MSCI WORLD Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

Objective and Investment Policy

Objective

To track the performance of Bloomberg BioEnergy Screened Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg BioEnergy Screened Index is constructed to track the performance of companies that are expected to generate a meaningful portion of revenue from the production, storage, and distribution of ethanol, biodiesel, and renewable fuel. In addition, securities must meet certain minimum ESG standards.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

To be selected for the Bloomberg BioEnergy Screened Index, a security must be a member of the Bloomberg BioEnergy Benchmark Index (the "Parent Index"). The securities of the parent index respect the following eligibility process:

- be a member of the Developed Markets, China, or South Korea universes
- be classified as belonging to the Gold or Silver tiers within the Biofuels ecosystem as determined by the Bloomberg Intelligence (BI) Theme-Basket committee
- have a minimum free float market capitalization of \$200 million
- have a minimum 90-day average daily value traded of \$2 million.

Securities are screened for any involvement in controversial ESG activities, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg BioEnergy Screened Index value is available via Bloomberg. At the date of the prospectus, the ticker is: BBIOEN

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS SUB-FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN SUB-FUNDS GENERALLY OR IN THIS PARTICULAR SUB-FUND OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDICES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO AMUNDI OR THIS SUB-FUND OR THIS SUB-FUND'S UNITHOLDERS OR ANY OTHER PERSON OR ENTITY.

NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE AMUNDI, THIS SUB-FUND'S UNITHOLDERS OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDICES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS SUB-FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS SUB-FUND IS REDEEMABLE. FURTHERMORE, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS SUB-FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS SUB-FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDICES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE SUB-FUND, OWNERS OF THE SUB-FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHERMORE, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Objective and Investment Policy

Objective

To track the performance of NASDAQ-100 Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

NASDAQ-100 Index is an equity index representative of securities issued by non-financial companies listed on the NASDAQ stock exchange, an American market which specifically includes American and non-American stocks.

The Index is a Total Return Index : dividends paid by the index constituents are included in the Index return.

- Index currency: US Dollar

- Index Composition

The Index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. It does not contain securities of financial companies including investment companies.

Each stock of the Index is weighted according to its market capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Nasdaq.

The NASDAQ-100 Index is calculated by NASDAQ OMX using the official closing prices of the NASDAQ stock exchange on which the Index components are traded.

NASDAQ-100 Index value is available via Bloomberg. At the date of the prospectus, the ticker is: XNDX

The performance tracked is the closing price of the NASDAQ-100 Index.

Nasdaq index methodology, composition, revision rules and additional information concerning the Index underlying components are available on indexes.nasdaqomx.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

Objective and Investment Policy

Objective

To track the performance of NYSE Arca Gold BUGS Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

NYSE Arca Gold BUGS Index is representative of companies involved in gold mining. The index reflects short-term gold price movements by including companies which protect their gold production for a period of no more than 1.5 years.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

At each rebalancing, the three largest index components based on market capitalisation will be included in the Index calculation at a higher percentage than the remaining companies. Those remaining companies will be equally weighted. Whether a share is eligible for inclusion in the index depends on the market capitalisation, the trading volume and a number of other criteria described in the index methodology.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by ICE Data Indices, LLC .

NYSE Arca Gold BUGS Index value is available via Bloomberg. At the date of the prospectus, the ticker is: HUINTR

The performance tracked is the closing price of the NYSE Arca Gold BUGS Index.

ICE Data Indices, LLC index methodology, composition, revision rules and additional information concerning the Index underlying components are available on indices.theice.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI PEA DOW JONES INDUSTRIAL AVERAGE

Objective and Investment Policy

Objective

To track the performance of Dow Jones Industrial Average Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Dow Jones Industrial Average Index, is a price-weighted measure of 30 U.S. blue-chip companies. The index covers all industries except transportation and utilities.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Dow Jones Industrial Average is a price-weighted index that tracks 30 leading US companies representative of the overall market of US industry with the exception of transport and utilities sectors. Index constituents are selected by an index committee composed of three representatives of S&P Dow Jones Indices and two representatives of The Wall Street Journal and stocks are typically added only if the company has an excellent reputation, demonstrates sustained growth and is of interest to a large number of investors. Changes in the composition of the Index are published by the editors of The Wall Street Journal without consulting the companies represented in the Index or any stock exchange, official agency or the publisher. Constituents are added and deleted from the Index on an as-needed basis and are normally performed on rare occasions only, with changes typically occurring following corporate acquisitions or other significant changes in a component company's business. In the past, most adjustments were performed as a result of mergers. From time to time, however, changes are performed in order to attain, in the opinion of the editor of The Wall Street Journal, a more exact representation of the overall market of US industry. The editors of The Wall Street Journal consider leading industrial companies as potential new corporations that are of broad interest to investors and have a successful history of growth. The composition of the Index may be changed at any time and for any reason.

- Index Revision

The Index rebalancing is planned on an as-needed basis.

- Index Publication

The Index is calculated and published by Standard & Poor's ("S&P").

Dow Jones Industrial Average Index value is available via Bloomberg. At the date of the prospectus, the ticker is: DJINR

The performance tracked is the closing price of the Dow Jones Industrial Average Index.

S&P index methodology, composition, revision rules and additional information concerning the Index underlying components are available on eu.spindices.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Objective and Investment Policy

Objective

To track the performance of Russell 2000 Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Russell 2000 Index is an equity index representative of 2,000 small cap securities traded in the US market.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Russell 2000 index is a sub-category of the Russell 3000 index, which represents approximately 99% of the US equity market.

The Russell 2000 Index includes the 2,000 smallest capitalisations in the US market taken from the Russell 3000 index.

The Russell 3000 Index excludes:

- securities whose market capitalisation is below USD 30 million;
- securities trading below USD 1;
- securities traded on the "Pink Quote" or on the "Bulletin Board" market;
- closed fund, "limited partnerships" and "Royalty Trusts", etc.;
- "Foreign Stocks and American Depositary Receipts" (ADRs);
- listed REITs and PTPs.

Each stock of the Index is weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned annually.

- Index Publication

The Index is calculated and published by Russell.

The Russell 2000 Index is calculated using the official closing prices of stock exchanges where the Index components are traded.

Russell 2000 Index value is available via Bloomberg. At the date of the prospectus, the ticker is: RU20N30U

The performance tracked is the closing price of the Russell 2000 Index.

Russell index methodology, composition, revision rules and additional information concerning the Index underlying components are available on ftse.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Objective and Investment Policy

Objective

To track the performance of S&P 500 Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

S&P500 Index is an equity index representative of the 500 leading securities by market capitalization traded in the USA.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar

- Index Composition

Each stock of the Index is weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Standard & Poor's("S&P").

The S&P 500 Index is calculated by S&P using the official closing prices of stock exchanges on which the Index components are traded.

S&P 500 Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SPTR500N

The performance tracked is the closing price of the S&P 500 Index.

S&P index methodology, composition, revision rules and additional information concerning the Index underlying components are available on eu.spindices.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

S&P MAKES NO EXPRESS OR IMPLIED WARRANTIES, REPRESENTATIONS OR CONDITIONS, AND EXPRESSLY DISCLAIMS ALL WARRANTIES OR CONDITIONS OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE AND ANY OTHER EXPRESS OR IMPLIED WARRANTY OR CONDITION WITH RESPECT TO THE S&P 500 INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL S&P HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS) RESULTING FROM THE USE OF THE S&P 500 OR ANY DATA INCLUDED THEREIN, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Objective and Investment Policy

Objective

To track the performance of S&P 500 Buyback Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

S&P 500 Buyback Index is an equity index representative of the 100 leading companies of the S&P 500 Index with the highest buyback ratio over the last 12 months.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar

- Index Composition

The S&P 500 Buyback Index includes the 100 leading companies of the S&P 500 Index that have bought back their equities during the last 12 months. On each date that the Index is revised, a company equity buyback ratio is defined as being the cash amount paid by this company to buy back their own equities during the last 12 months divided by the amount of this company total capitalisation noted at the beginning of the last 12-month period.

The equities of the S&P 500 Buyback Index are equally weighted on each revision date of the Index.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Standard & Poor's("S&P").

The S&P 500 Buyback Strategy Index is calculated using the official closing prices of stock exchanges where component securities are traded.

S&P 500 Buyback Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SPBUYUN

The performance tracked is the closing price of the S&P 500 Buyback Index.

S&P index methodology, composition, revision rules and additional information concerning the Index underlying components are available on eu.spindices.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

Objective and Investment Policy

Objective

To track the performance of S&P Global Luxury Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

S&P Global Luxury Index is an equity index comprised of 80 of the largest publicly traded companies engaged in the production or distribution of luxury goods or the provision of luxury services.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar

- Index Composition

The universe is comprised of stocks listed on developed and emerging markets. Each stock is assigned a luxury exposure score based on its business description, revenue segment and market perception.

The luxury stocks are ranked in descending order of their total market capitalization and luxury exposure score. The top 80 becomes index constituents.

Each stock of the Index is weighted in function of the size of its capitalization and luxury exposure scores. No constituent represents more than 8% of the index.

- Index Revision

The Index rebalancing is planned annually.

- Index Publication

The Index is calculated and published by Standard & Poor's("S&P").

The S&P Global Luxury Index is calculated by S&P using the official closing prices of stock exchanges on which the Index components are traded.

S&P Global Luxury Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SPGLGUN

The performance tracked is the closing price of the S&P Global Luxury Index.

S&P index methodology, composition, revision rules and additional information concerning the Index underlying components are available on eu.spindices.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL S&P HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS) RESULTING FROM THE USE OF THE S&P 500 OR ANY DATA INCLUDED THEREIN, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Objective and Investment Policy

Objective

To track the performance of MSCI ACWI IMI Smart Cities Filtered Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The Index aims to represent the performance of companies that are expected to derive significant revenues from activities associated with the development of new products and services focused on smart solutions for urban infrastructure and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe as further described in Appendix I - ESG Related Disclosures to this Prospectus.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Index is constructed by selecting stocks from the MSCI ACWI Investable Market Index (IMI) (the 'Parent Index') (ie including large, mid and small cap stocks across developed and emerging countries).

It selects companies which are assessed to have high exposure to business activities such as:

- Smart Connectivity (IoT)
- Smart Infra
- Smart Buildings
- Smart Homes
- Smart Safety & Security
- Smart Mobility
- Smart Waste and Water Management
- Smart Energy and Grids

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI ACWI IMI Smart Cities Filtered official indices are those calculated by MSCI using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI ACWI IMI Smart Cities Filtered Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXACSMRT

The performance tracked is the closing price of the MSCI ACWI IMI Smart Cities Filtered Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 52% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 2%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE SUB-FUND, OWNERS OF THE SUB-FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHERMORE, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

AMUNDI STOXX EUROPE 600

Objective and Investment Policy

Objective

To track the performance of STOXX Europe 600 Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The STOXX Europe 600 Index provides exposure to the performance of the 600 most liquid large, mid and small caps stocks covering developed markets in Europe.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The index is free-float market cap, subject to a 20% weighting cap. Components are screened on a liquidity criteria: Each component must have a minimum liquidity of greater than 1 million EUR, as per its 3 month average daily trading volume (ADTV).

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by STOXX .

STOXX Europe 600 Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SXXR

The performance tracked is the closing price of the STOXX Europe 600 Index.

STOXX index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

Objective and Investment Policy

Objective

To track the performance of MSCI ACWI IMI Robotics & AI Filtered Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.
The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The Index aims to reflect the performance of companies associated with the increased adoption and utilization of artificial intelligence, robots and automation while excluding those involved in certain controversial businesses or with relatively low Environmental, Social and Governance ("ESG") controversies and ratings scores. It selects companies which are assessed to have high exposure to business activities such as:

- Robotics/ Artificial Intelligence,
- IoT/ Smart Homes,
- Cloud Computing,
- Cybersecurity,
- Medical Robotics,
- Social Media Automation,
- Vehicle Automation.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Index features the following characteristics:

- a) Same investment universe as the MSCI ACWI Investable Market Index (IMI) (the "Parent Index"); ie including large, mid and small cap stocks across developed and emerging countries.
- b) A set of relevant words and phrases derived from the above business activities is used to identify companies (the "Eligible Universe") which could benefit from the increased adoption and utilization of products and services focused on automation and artificial intelligence.
- c) Companies from the Eligible Universe with a "Relevance Score" (as defined by MSCI) above 25% constitute the "Selected Universe".
- d) Further liquidity/size/country/sectorial filters are applied to the Selected Universe.
- e) An ESG negative screening is performed as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI ACWI IMI Robotics & AI Filtered Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXACIREF

The performance tracked is the closing price of the MSCI ACWI IMI Robotics & AI Filtered Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI PRIME EMERGING MARKETS

Objective and Investment Policy

Objective

To track the performance of Solactive GBS Emerging Markets Large & Mid Cap USD Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Solactive GBS Emerging Markets Large & Mid Cap USD Index is an equity index representative of the large and mid-cap markets across 26 emerging countries (as of October 2020).

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Index components are representative of the largest 85% (+/- 5%) of the free-float market capitalization in 26 emerging countries (as of October 2020). The Free Float Market capitalization is calculated as the multiplication of the shares outstanding in Free Float multiplied with the Trading Price of the share class as of the selection day.

Solactive GBS Emerging Markets Large & Mid Cap USD Index is the aggregate of the selected stocks on each country.

The stocks are weighted according to their Free Float Market Capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Solactive .

Solactive GBS Emerging Markets Large & Mid Cap USD Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SEMLMCUN

The performance tracked is the closing price of the Solactive GBS Emerging Markets Large & Mid Cap USD Index.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Objective and Investment Policy

Objective

To track the performance of Solactive GBS Developed Markets Eurozone Large & Mid Cap Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Solactive GBS Developed Markets Eurozone Large & Mid Cap Index is an equity index representative of the large and mid-cap markets in 10 developed Eurozone countries (as of October 2020).

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The Index components are representative of the largest 85% (+/- 5%) of the free-float market capitalization in 10 developed Eurozone countries: Austria, Belgium, Finland, France, Germany, Ireland, Italy, Netherlands, Portugal, Spain (as of October 2020).

The Free Float Market capitalization is calculated as the multiplication of the shares outstanding in Free Float multiplied with the Trading Price of the share class as of the selection day.

The stocks are weighted according to Free Float Market Capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Solactive.

Solactive GBS Developed Markets Eurozone Large & Mid Cap Index is calculated daily using the official closing prices of the stock exchanges on which the Index components are traded.

Solactive GBS Developed Markets Eurozone Large & Mid Cap Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SEZLMCN

The performance tracked is the closing price of the Solactive GBS Developed Markets Eurozone Large & Mid Cap Index.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 65% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

Objective and Investment Policy

Objective

To track the performance of Solactive GBS Developed Markets Large & Mid Cap USD Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Solactive GBS Developed Markets Large & Mid Cap USD Index is an equity index representative of the large and mid-cap markets across 23 developed countries.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Index components are listed and traded in 23 developed countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, the United States of America.

For each country, the Index components are ranked by Free Float Market Capitalization in descending order, and the equities corresponding to large and mid-cap securities are selected.

The Free Float Market capitalization is calculated as the multiplication of the shares outstanding in Free Float multiplied with the Trading Price of the share class as of the selection day.

Solactive GBS Developed Markets Large & Mid Cap Index is the aggregate of the selected stocks on each country.

The stocks are weighted according to their Free Float Market Capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Solactive.

Solactive GBS official indices are those calculated by Solactive using:

- the official closing prices of the stock exchanges on which the component securities are traded
- the WM Reuters closing (16:00 GMT) exchange rates.

Solactive GBS Developed Markets Large & Mid Cap USD Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SDMLMCUN

Objective and Investment Policy

Objective

To track the performance of Solactive United Kingdom Mid and Small Cap ex Investment Trust Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Solactive United Kingdom Mid and Small Cap ex Investment Trust Index is an equity index representative of the mid and small-cap markets listed and traded in the United Kingdom.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Sterling pound
- Index Composition

The starting universe includes all securities that compose the parent index, Solactive GBS United Kingdom All Cap. The parent index is composed of small, mid and large-cap equities covering all segments of the UK global stock market.

The securities are ranked in descending order of their total market capitalization. Top 100 securities are excluded from the eligible universe.

Inclusion in the index is then based on the following criteria :

- Securities must be listed on the London Stock Exchange
- Trading currency in GBP
- Securities currently included in the Index require an Average Daily Value Traded of at least USD 750,000 over the preceding 1-month and 6-month period to remain eligible, and
- To become eligible, securities currently not included in the Index require an Average Daily Value Traded of at least USD 1,000,000 over the preceding 1-month and 6-month period

Among the remaining securities, the 150 securities with the highest free float market capitalization are selected as the index constituents.

Those constituents are weighted according to the free float-adjusted market capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Solactive.

Solactive United Kingdom Mid and Small Cap ex Investment Trust Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SOLUKMSN

The performance tracked is the closing price of the Solactive United Kingdom Mid and Small Cap ex Investment Trust Index.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Objective and Investment Policy

Objective

To track the performance of Solactive GBS United States Large & Mid Cap Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Solactive GBS United States Large & Mid Cap Index is an equity index representative of the large and mid-cap securities listed and traded in the United States of America.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The equities are ranked by Free Float Market Capitalization in descending order, and the equities corresponding to large and mid-cap securities are selected.

The Free Float Market capitalization is calculated as the multiplication of the shares outstanding in Free Float multiplied with the Trading Price of the share class as of the selection day.

The stocks are weighted according to their Free Float Market Capitalization.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Solactive.

Solactive GBS official indices are those calculated by Solactive using:

- the official closing prices of the stock exchanges on which the component securities are traded
- the WM Reuters closing (16:00 GMT) exchange rates.

Solactive GBS United States Large & Mid Cap Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SUSLMCN

The performance tracked is the closing price of the Solactive GBS United States Large & Mid Cap Index.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EM ASIA SRI CLIMATE PARIS ALIGNED

Objective and Investment Policy

Objective

To track the performance of MSCI EM Asia SRI filtered PAB Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI EM Asia SRI Filtered PAB Index is an equity index based on the MSCI Emerging Markets (EM) Asia index representative of the large and mid-cap stocks across 9 Asian emerging market countries (as of November 2021) (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

MSCI EM Asia SRI Filtered PAB Index is constructed by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index and to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EM Asia SRI filtered PAB Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXMSFFNU

The performance tracked is the closing price of the MSCI EM Asia SRI filtered PAB Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Index Description

- General description of the Index

MSCI Europe SRI Filtered PAB Index is an equity index based on the MSCI Europe index representative of the large and mid-cap stocks across 15 developed market countries in Europe (as of November 2021) (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

MSCI Europe SRI Filtered PAB Index is constructed by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index and to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe SRI filtered PAB Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEUSXNE

The performance tracked is the closing price of the MSCI Europe SRI filtered PAB Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI WORLD SRI CLIMATE PARIS ALIGNED

Objective and Investment Policy

Objective

To track the performance of MSCI World SRI filtered PAB Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI World SRI Filtered PAB Index is an equity index based on the MSCI World index representative of the large and mid-cap stocks across 23 developed market countries (as of November 2021) (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

MSCI World SRI Filtered PAB Index is constructed by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index and to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI World SRI filtered PAB Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXWOSXNU

The performance tracked is the closing price of the MSCI World SRI filtered PAB Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of DAX 50 ESG+ NR Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The objective of the DAX 50 ESG+ Index is to reflect the performance of the 50 companies with the highest ESG score selected from the 75 largest companies in terms of free float Market Cap of the HDAX Index. Firms that fail to meet norms-based screening, controversial weapons screening, minimum ESG ratings and a series of business activity screenings will be excluded. The parent HDAX index focuses on large and medium sized companies by tracking the performance of 40 companies from DAX Index, the 50 companies from MDAX Index and the 30 companies from TecDAX index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The universe of the Index is defined by all stocks included in the HDAX Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by STOXX .

DAX 50 ESG+ NR Index value is available via Bloomberg. At the date of the prospectus, the ticker is: DAXESGPN

The performance tracked is the closing price of the DAX 50 ESG+ NR Index.

STOXX index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 65% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of MDAX ESG+ (NR) EUR Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MDAX ESG+ (NR) EUR Index is an equity index based on the MDAX Index (the "Parent Index") representative of medium capitalization companies (mid-caps) in Germany from traditional sectors, including media, chemical, industry, and financial services and technology that follow the companies included in the MDAX in terms of market capitalization and order book turnover. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. For inclusion in the MDAX ESG+, only companies that are listed on a regulated market are considered. Furthermore, the companies must demonstrate that their legal or operational base is in Germany or they must generate the bulk of their trading turnover on the Frankfurt Stock Exchange and have their head office in an EU or EFTA Member State.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The MDAX ESG+ (NR) EUR index objective is to reflect the performance of the MDAX index while using ESG exclusion filters to remove at least 20% of the MDAX constituents, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Stoxx .

MDAX ESG+ (NR) EUR Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MDXESGPN

The performance tracked is the closing price of the MDAX ESG+ (NR) EUR Index.

Stoxx index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of S&P 500 Scored and Screened+ Index (USD) NTR (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

S&P 500 Scored and Screened+ Index (USD) NTR Index (the "Index") is a broad-based, market-cap-weighted index that measures the performance of securities meeting sustainability criteria, while maintaining similar overall industry group weight as the S&P 500 (the "Parent Index"). The S&P500 Index is an equity index representative of the leading securities traded in the USA.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The S&P 500 Scored and Screened+ Index (USD) NTR Index initial universe includes all securities that compose its Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Standard & Poor's ("S&P").

The S&P 500 ESG+ Index is calculated by S&P using the official closing prices of stock exchanges on which the Index components are traded.

S&P 500 Scored and Screened+ Index (USD) NTR value is available via Bloomberg. At the date of the prospectus, the ticker is: SPXESAUN

The performance tracked is the closing price of the S&P 500 Scored and Screened+ Index (USD) NTR.

S&P index methodology, composition, revision rules and additional information concerning the Index underlying components are available on eu.spindices.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

The performance tracked is the closing price of the MSCI Ac Far East ex Japan ESG Leaders Select 5% Issuer Capped index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 55% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI AC FAR EAST EX JAPAN ESG SELECTION

(as from 02/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI Ac Far East ex Japan ESG Selection P-Series 5% Issuer Capped Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI Ac Far East ex Japan ESG Selection P-Series 5% Issuer Capped Index is an equity index based on the MSCI AC Far East ex Japan Index (the "Parent Index"), representative of the large and mid-cap markets across 2 Developed Markets (excluding Japan) and 7 Emerging Markets countries in the Far East, and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The securities are those who are included in the MSCI AC Far East Ex Japan index and in one the of the 3 following indices: the MSCI China ESG Leaders Select index, the MSCI EM ex China ESG Leaders Select index and the MSCI World ESG Leaders Select index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned Quarterly.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Ac Far East ex Japan ESG Selection P-Series 5% Issuer Capped Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXACFENU

The performance tracked is the closing price of the MSCI Ac Far East ex Japan ESG Selection P-Series 5% Issuer Capped Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 55% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 2%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI CHINA ESG SELECTION

(as from 02/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI China ESG Selection P-Series 5% Issuer Capped Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI China ESG Selection P-Series 5% Issuer Capped Index is an equity index based on the MSCI China Index ("Parent Index") representative of large and mid-cap stocks of China equity universe across China A shares, H shares, B shares, Red chips, P chips and foreign listings (e.g. ADRs) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities of the Parent Index. The securities are selected by applying a combination of values based exclusions and a best-in-class selection process to companies in the MSCI China Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI China ESG Selection P-Series 5% Issuer Capped Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXCNEGNU

The performance tracked is the closing price of the MSCI China ESG Selection P-Series 5% Issuer Capped Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EMERGING EX CHINA ESG LEADERS SELECT

(until 01/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI EM ex China Region ESG Leaders Select 5% Issuer Capped (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI EM ex China Region ESG Leaders Select 5% Issuer Capped is an equity index based on the MSCI Emerging Markets ex China Index ("Parent Index") representative of large and mid-cap stocks across 26 of the 27 Emerging Markets (EM) countries (as of January 2021) excluding China and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities of the Parent Index. The securities are selected by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EM ex China Region ESG Leaders Select 5% Issuer Capped value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEFEGNU

The performance tracked is the closing price of the MSCI EM ex China Region ESG Leaders Select 5% Issuer Capped .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EMERGING ESG LEADERS

(until 01/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI EMERGING Markets ESG Leaders Select 5% Issuer Capped ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI Emerging Markets ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI Emerging Markets Index ("Parent Index"), representative of the large and mid-cap securities of 27 emerging countries (as of November 2021) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities of the Parent Index.

The securities are selected by applying a combination of values based exclusions and a best-in-class selection process to companies in the MSCI Emerging Markets Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EMERGING Markets ESG Leaders Select 5% Issuer Capped value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEME5NU

The performance tracked is the closing price of the MSCI EMERGING Markets ESG Leaders Select 5% Issuer Capped .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EMERGING MARKETS ESG SELECTION

(as from 02/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI EM ESG Selection P-Series 5% Issuer Capped Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI EM ESG Selection P-Series 5% Issuer Capped Index is an equity index based on the MSCI Emerging Markets Index ("Parent Index"), representative of the large and mid-cap securities of 27 emerging countries (as of November 2021) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities of the Parent Index.

The securities are selected by applying a combination of values based exclusions and a best-in-class selection process to companies in the MSCI Emerging Markets Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EM ESG Selection P-Series 5% Issuer Capped Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEME5NU

The performance tracked is the closing price of the MSCI EM ESG Selection P-Series 5% Issuer Capped Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 2%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : US Dollar

The performance tracked is the closing price of the MSCI USA ESG LEADERS SELECT 5% Issuer Capped .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : US Dollar

AMUNDI MSCI USA ESG SELECTION

(as from 02/06/2025)

Objective and Investment Policy

Objective

To track the performance of MSCI USA ESG Selection P-Series 5% Issuer Capped Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI USA ESG Selection P-Series 5% Issuer Capped Index is an equity index based on the MSCI USA Index ("Parent Index"), representative of the large and mid-cap securities of the US market and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks. For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities of the Parent Index.

The securities are selected by applying a combination of values based exclusions and a best-in-class selection process to companies in the MSCI USA Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI USA ESG Selection P-Series 5% Issuer Capped Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXUSESL5

The performance tracked is the closing price of the MSCI USA ESG Selection P-Series 5% Issuer Capped Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI WORLD UNIVERSAL SELECT

Objective and Investment Policy

Objective

To track the performance of MSCI World Universal Select Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI World Universal Select is an equity index based on the MSCI World Index ("Parent Index"), representative of the large and mid-cap markets across 23 developed market countries. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The eligible universe is defined by excluding securities from Parent Index universe, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI World Universal Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXWOESUS

The performance tracked is the closing price of the MSCI World Universal Select Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Amundi MSCI Europe Climate Paris Aligned

Objective and Investment Policy

Objective

To track the performance of MSCI EUROPE Climate Paris Aligned Filtered Net EUR Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI EUROPE Climate Paris Aligned Filtered Net EUR Index is an equity index based on the MSCI Europe index (the "Parent Index") representative of the large and mid-cap stocks across the 15 developed European countries. The Index is designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy, while aligning with the Paris Agreement requirements. The Index incorporates the Task Force on Climate-Related Financial Disclosures (TCFD) recommendations and are designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

MSCI EUROPE Climate Paris Aligned Filtered Index is constructed using an optimization process that aims to achieve replicability and investability.

The Index features exclusions as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are those calculated by MSCI using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EUROPE Climate Paris Aligned Filtered Net EUR Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEUPFNE

The performance tracked is the closing price of the MSCI EUROPE Climate Paris Aligned Filtered Net EUR Index

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Amundi MSCI World Climate Transition

Objective and Investment Policy

Objective

To track the performance of MSCI World Climate Change CTB Select Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The MSCI World Climate Change CTB Select Index is an equity index based on the MSCI World Index ("Parent Index"): representative of the large and mid-cap securities across 23 Developed Markets countries (as of December 2020). The Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) label minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The Index aims to reduce its greenhouse gas (GHG) emissions intensity by at least 30% when compared to the Parent Index, and is designed to meet the year on year 7% decarbonisation target, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are those calculated by MSCI using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI World Climate Change CTB Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXWOTBNE

The performance tracked is the closing price of the MSCI World Climate Change CTB Select Index

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EUROPE ESG BROAD TRANSITION

Objective and Investment Policy

Objective

To track the performance of MSCI Europe ESG Broad CTB Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI Europe ESG Broad CTB Select Index is an equity index based on the MSCI Europe Index representative of the large and mid-cap securities across developed markets countries in Europe (the "Parent Index"). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

MSCI Europe ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the ESG score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Europe ESG Broad CTB Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEUEBSL

The performance tracked is the closing price of the MSCI Europe ESG Broad CTB Select Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI EMERGING MARKETS ESG BROAD TRANSITION

Objective and Investment Policy

Objective

To track the performance of MSCI Emerging Markets ESG Broad CTB Select Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI Emerging Markets ESG Broad CTB Select Index is an equity index based on the MSCI Emerging markets Index representative of the large and mid-cap markets across 27 emerging countries (as of November 2021) ("Parent Index"). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

MSCI Emerging Markets ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the ESG score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI Emerging Markets ESG Broad CTB Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEMEBSL

The performance tracked is the closing price of the MSCI Emerging Markets ESG Broad CTB Select Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 2%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Index Description

- General description of the Index

MSCI EMU ESG Broad CTB Select Net Total Return Index is an equity index based on the MSCI EMU Index (the "Parent Index") representative of the large and mid-cap securities across developed European Economic and Monetary Union ("EMU") countries. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

MSCI EMU ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the ESG score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EMU ESG Broad CTB Select Net Total Return Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEMUEBL

The performance tracked is the closing price of the MSCI EMU ESG Broad CTB Select Net Total Return Index .

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI MSCI WORLD CLIMATE PARIS ALIGNED

Objective and Investment Policy

Objective

To track the performance of MSCI World Climate Change Paris Aligned Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The MSCI World Climate Change Paris Aligned Select Index is an equity index based on the MSCI World Index ("Parent Index") representative of the large and mid-cap markets across 23 developed countries (as of March 2020). The index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) label minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The Index aims to reduce its greenhouse gases (GHG) intensity by at least 50% when compared to the Parent Index, and is designed to meet the year on year 7% decarbonisation target, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI World Climate Change Paris Aligned Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXWOPALI

The performance tracked is the closing price of the MSCI World Climate Change Paris Aligned Select Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI EURO CORP 0-1Y ESG

(until 30/04/2025)

Objective and Investment Policy

Objective

To track the performance of iBoxx MSCI ESG EUR Corporates 0-1 TCA Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

iBoxx MSCI ESG EUR Corporates 0-1 TCA Index is a bond index representative of euro-denominated, Investment Grade, fixed-rate bonds issued by private companies (known as 'corporate bonds') with a residual maturity ranging from 1 month to 1 year and applies additional sector and ESG criteria for security eligibility.

The Index is a Total Return Index: the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The iBoxx MSCI ESG EUR Corporates 0-1 Y TCA Index includes corporate bonds with the following eligibility criteria:

- euro-denominated securities; The issuer's domicile is not relevant for the bond selection
- fixed coupons;
- "investment-grade" bonds rated by at least one of the three rating agencies (Standard & Poors, Fitch Ratings and Moodys Investors Services). Investment grade is defined as BBB- or higher from Fitch and S&P and Baa3 or higher from Moodys (the rating used in the analysis of each eligible security is the average of the ratings issued by the 3 rating agencies);
- maturity at issue must be longer than 1 year;
- residual maturity ranging from 1 month to 1 year;
- the minimum amount outstanding per issue is EUR 500 Million, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Markit .

iBoxx MSCI ESG EUR Corporates 0-1 TCA Index value is available via Bloomberg. At the date of the prospectus, the ticker is: IBXXEEC1

The performance tracked by the Index is the 17h15 fixing (Paris time). Prices used in the index calculation are mid prices.

Markit index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [markit.com](https://www.markit.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GLOBAL AGG SRI

(until 30/04/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI Global Aggregate 500MM ex Securitized Sustainable SRI Sector Neutral Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI Global Aggregate 500MM ex Securitized Sustainable SRI Sector Neutral Index is a bond index, representative of the global fixed-rate investment grade debt market from both developed and emerging markets countries that follows the rules of the Bloomberg MSCI Global Aggregate 500MM ex Securitized Index (the "Parent Index") and applies sector and ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. fixed-rate investment-grade bonds denominated in local currency markets including treasuries, government-related and corporate issuers, with a minimum issue size of an equivalent of USD 500mm). Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI Global Aggregate 500MM ex Securitized Sustainable SRI Sector Neutral Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I36446US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. AMUNDI GLOBAL AGGREGATE BOND ESG

(as from 01/05/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI ESG Global Aggregate 500MM ex Securitized Sector Neutral Select Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI ESG Global Aggregate 500MM ex Securitized Sector Neutral Select Index is a bond index, representative of the global fixed-rate investment grade debt market from both developed and emerging markets countries that follows the rules of the Bloomberg MSCI Global Aggregate 500MM ex Securitized Index (the "Parent Index") and applies sector and ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. fixed-rate investment-grade bonds denominated in local currency markets including treasuries, government-related and corporate issuers, with a minimum issue size of an equivalent of USD 500mm). Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI ESG Global Aggregate 500MM ex Securitized Sector Neutral Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I36446US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

- General description of the Index

Bloomberg MSCI Global Corporate ESG Sustainability SRI 1-5 Year Index is a bond index comprising multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity that applies sector and additional ESG criteria for security eligibility.

The Index is a Total Return Index: the coupons paid by the index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The applicable universe comprises multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity and with a minimum par amount outstanding with fixed minimum issues sizes set for all eligible currencies, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg MSCI Global Corporate ESG Sustainability SRI 1-5 Year Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I36068US

The performance tracked by the Index is the close of business in the local markets that compose the index. Prices used in the index calculation are bid prices. The initial price for new corporate issues entering the index is the offer side.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GLOBAL CORPORATE BOND 1-5Y ESG

(as from 01/05/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI ESG Global Corporate 1-5 Year Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI ESG Global Corporate 1-5 Year Select Index is a bond index comprising multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity that applies sector and additional ESG criteria for security eligibility.

The Index is a Total Return Index: the coupons paid by the index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The applicable universe comprises multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity and with a minimum par amount outstanding with fixed minimum issues sizes set for all eligible currencies, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI ESG Global Corporate 1-5 Year Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I36068US. AMUNDI INDEX EURO CORPORATE SRI

(until 30/04/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI Euro Corporate ESG Sustainability SRI (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI Euro Corporate ESG Sustainability SRI Index is a bond index, representative of the corporate fixed-rate investment grade Euro denominated securities, that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") and applies sector and additional ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. corporate fixed-rate investment-grade Euro denominated bonds with a remaining maturity higher than 1 year and a minimum par amount outstanding of EUR 300 million). Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg MSCI Euro Corporate ESG Sustainability SRI value is available via Bloomberg. At the date of the prospectus, the ticker is: I35570EU

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are bid prices. The initial price for new corporate issues entering the index is the offer side; after the first month, the bid price is used.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI EUR CORPORATE BOND ESG

(as from 01/05/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI ESG Euro Corporate Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI ESG Euro Corporate Select Index is a bond index, representative of the corporate fixed-rate investment grade Euro denominated securities, that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") and applies sector and additional ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. corporate fixed-rate investment-grade Euro denominated bonds with a remaining maturity higher than 1 year and a minimum par amount outstanding of EUR 300 million). Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg MSCI ESG Euro Corporate Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I35570EU

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are bid prices. The initial price for new corporate issues entering the index is the offer side; after the first month, the bid price is used.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI INDEX EURO AGG SRI

(until 30/04/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI Euro Aggregate Sustainable SRI Sector Neutral (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI Euro Aggregate Sustainable SRI Sector Neutral Index is a bond index, representative of the fixed-rate investment grade Euro denominated securities universe that follows the rules of the Bloomberg Euro Aggregate Index (the "Parent Index") and applies sector and ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. fixed-rate investment-grade Euro denominated bonds including treasuries, government-related, corporate and securitised issues). Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg MSCI Euro Aggregate Sustainable SRI Sector Neutral value is available via Bloomberg. At the date of the prospectus, the ticker is: I35394EU

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI EURO AGGREGATE BOND ESG

(as from 01/05/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI ESG Euro Aggregate Sector Neutral Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI ESG Euro Aggregate Sector Neutral Select Index is a bond index, representative of the fixed-rate investment grade Euro denominated securities universe that follows the rules of the Bloomberg Euro Aggregate Index (the "Parent Index") and applies sector and ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. fixed-rate investment-grade Euro denominated bonds including treasuries, government-related, corporate and securitised issues). Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI ESG Euro Aggregate Sector Neutral Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I35394EU

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. AMUNDI INDEX EURO CORPORATE SRI 0-3 Y

(until 30/04/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI Euro Corporate ESG BBB+ Sustainability SRI 0-3 Year Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI Euro Corporate ESG BBB+ Sustainability SRI 0-3 Year Index is a bond index representative of the investment grade, euro-denominated bonds universe that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") with a remaining maturity constraint of 0 & 3 years and applies additional sector and ESG criteria for security eligibility.

The Index is a Total Return Index: the coupons paid by the index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. euro-denominated, fixed-rate investment-grade corporate bonds publicly issued) with a remaining maturity between 1 months and 3 years at the end of each month ; and a minimum per amount outstanding of EUR 300 million. Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg MSCI Euro Corporate ESG BBB+ Sustainability SRI 0-3 Year value is available via Bloomberg. At the date of the prospectus, the ticker is: I34717EU

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are bid prices. The initial price for new corporate issues entering the index is the offer side; after the first month, the bid price is used.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Index Description

- General description of the Index

Bloomberg MSCI ESG Euro Corp BBB+ 0-3 Year Select Index is a bond index representative of the investment grade, euro-denominated bonds universe that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") with a remaining maturity constraint of 0 & 3 years and applies additional sector and ESG criteria for security eligibility.

The Index is a Total Return Index: the coupons paid by the index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. euro-denominated, fixed-rate investment-grade corporate bonds publicly issued) with a remaining maturity between 1 months and 3 years at the end of each month ; and a minimum per amount outstanding of EUR 300 million. Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI ESG Euro Corp BBB+ 0-3 Year Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I34717EU

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are bid prices. The initial price for new corporate issues entering the index is the offer side; after the first month, the bid price is used.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI US Aggregate ex Securitized Sustainable SRI Sector Neutral Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI US Aggregate ex Securitized Sustainable SRI Sector Neutral Index tracks fixed-rate, investment-grade debt with at least USD500mn par amount outstanding. This index is based on the US Aggregate ex Securitized index (the "Parent Index") and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted because they are inconsistent with certain values-based business involvement criteria and those issuers with a "red" MSCI ESG Controversy Score. Additionally, the market of the three sectors (Treasury, Government-Related and Corporate) are reweighted to match the weights of these three sectors in the US Aggregate ex Securitized Index.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

Bloomberg MSCI US Aggregate ex Securitized Sustainable SRI Sector Neutral Index includes Treasury, Government-Related, and Corporate senior and subordinated bonds with at least one year until final maturity, regardless of optionality. In addition, principal and interest must be denominated in USD with USD500mn minimum par amount outstanding. Then, filters are applied as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg MSCI US Aggregate ex Securitized Sustainable SRI Sector Neutral Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37163US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI US AGGREGATE BOND ESG

(as from 01/05/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI ESG US Aggregate ex Securitized Sector Neutral Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI ESG US Aggregate ex Securitized Sector Neutral Select Index tracks fixed-rate, investment-grade debt with at least USD500mn par amount outstanding. This index is based on the US Aggregate ex Securitized index (the "Parent Index") and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted because they are inconsistent with certain values-based business involvement criteria and those issuers with a "red" MSCI ESG Controversy Score. Additionally, the market of the three sectors (Treasury, Government-Related and Corporate) are reweighted to match the weights of these three sectors in the US Aggregate ex Securitized Index.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

Bloomberg MSCI ESG US Aggregate ex Securitized Sector Neutral Select Index includes Treasury, Government-Related, and Corporate senior and subordinated bonds with at least one year until final maturity, regardless of optionality. In addition, principal and interest must be denominated in USD with USD500mn minimum par amount outstanding. Then, filters are applied as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI ESG US Aggregate ex Securitized Sector Neutral Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37163US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI USD CORPORATE BOND 0-3Y SRI

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI US Corporate 0-3 Year ESG Sustainability SRI Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index. The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI US Corporate 0-3 Year ESG Sustainability SRI Index is a bond index representative of the investment grade, USD-denominated corporate bonds universe that follows the rules of the Bloomberg US Aggregate Corporate Index (the "Parent Index") with a remaining maturity between 1 month and 3 years at the end of each month and applies additional maturity and ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. USD-denominated, fixed-rate investment-grade corporate bonds publicly issued) with a remaining maturity between 1 month and 3 years at the end of each month ; and a minimum per amount outstanding of USD 300 million. Inclusion in the Index is based on the currency denomination of a bond and not the country of risk of the issuer. Then, filters are applied as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI US Corporate 0-3 Year ESG Sustainability SRI Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37481US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. Objective and Investment Policy

Objective

To track the performance of MSCI EMU Climate Paris Aligned Filtered Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI EMU Climate Paris Aligned Filtered Index is an equity index based on the MSCI EMU index representative of the large and mid-cap stocks across developed market countries in the European Economic and Monetary Union (the "Parent Index"). The Index is designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy, while aligning with the Paris Agreement requirements. The Index incorporate the Task Force on Climate-Related Financial Disclosures (TCFD) recommendations and are designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

MSCI EMU Climate Paris Aligned Filtered Index is constructed using an optimization process that aims to achieve replicability and investability.

The Index features exclusions as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned semi-annually.

- Index Publication

The Index is calculated and published by MSCI("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EMU Climate Paris Aligned Filtered Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEMUPNE

The performance tracked is the closing price of the MSCI EMU Climate Paris Aligned Filtered Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on msci.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI CHINA CNY BONDS⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of Bloomberg China Treasury + Policy Bank Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Bloomberg China Treasury + Policy Bank Index is a bond index representative of CNY-denominated fixed rate Treasury and Policy Bank securities listed on the China Interbank market.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The Index includes CNY denominated fixed-rate Treasuries and Policy Bank debt issued in China Interbank market. The securities must have an amount outstanding par value of at least CNY 5Billion and a remaining maturity of at least 1 year to be eligible for inclusion in the Index.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg China Treasury + Policy Bank Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I32561US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : US Dollar

AMUNDI EUR CORPORATE BOND 1-5Y ESG

(until 30/04/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI Euro Corporate 1-5 Year ESG Sustainability SRI Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI Euro Corporate 1-5 Year ESG Sustainability SRI Bond Index is a fixed-rate, investment-grade corporate bond index that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") and applies additional ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. corporate fixed-rate investment-grade Euro denominated bonds with a remaining maturity higher than 1 year and up to, but not including, 5 years and a minimum par amount outstanding of EUR 300 million).

Then, filters are applied, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg MSCI Euro Corporate 1-5 Year ESG Sustainability SRI Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37162EU

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI EUR CORPORATE BOND 1-5Y ESG

(as from 01/05/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI ESG Euro Corporate 1-5 Year Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.
The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI ESG Euro Corporate 1-5 Year Select Index is a fixed-rate, investment-grade corporate bond index that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") and applies additional ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. corporate fixed-rate investment-grade Euro denominated bonds with a remaining maturity higher than 1 year and up to, but not including, 5 years and a minimum par amount outstanding of EUR 300 million).
Then, filters are applied, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI ESG Euro Corporate 1-5 Year Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37162EU

The performance tracked by the Index is the 4:15pm fixing (London time). Prices used in the Index calculation are bid prices. The initial price for new corporate issues entering the index is the offer side; after the first month, the bid price is used.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

AMUNDI GLOBAL AGGREGATE BOND

Objective and Investment Policy

Objective

To track the performance of Bloomberg Global Aggregate Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Bloomberg Global Aggregate Index is a bond index representative of the global investment grade fixed-rate debt markets from both developed and emerging markets issuers.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The securities composing the Index are rated Investment Grade (using middle rating of Moodys, S&P and Fitch) and have at least one year until final maturity. The Index is a multicurrency benchmark which is including treasury, government-related, corporate and securitized fixed-rate (including MBS and ABS), with fixed minimum issues sizes set for all eligible currencies.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg Global Aggregate Index value is available via Bloomberg. At the date of the prospectus, the ticker is: LEGATRUU

Prices used in the Index calculation are bid prices. Euro and Sterling Treasury bonds use mid prices.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI EURO GOVERNMENT BOND⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of Bloomberg Euro Treasury 50bn Bond Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Bloomberg Barclays Euro Treasury 50bn Bond Index offers exposure to fixed-rate, investment grade public obligations issued by sovereign countries participating in the European Monetary Union.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Index respects the following criteria: [br]- Treasury bonds only are included in the Index; [br]- Eligible bonds have at least EUR 300 mn outstanding nominal and are issued by Eurozone countries with at least EUR 50 bn in issuance. The list of countries eligible for the Index is reviewed on an annual basis. [br]- Countries must be rated investment grade (Baa3/BBB-/BBB-) or higher to enter the Index using the middle rating of Moody's, S&P and Fitch. [br]- Maturity must be at least one year until final maturity, regardless of optionality. [br]- Principal and interest must be denominated in EUR.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg official indices are those calculated by Bloomberg using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

Bloomberg Euro Treasury 50bn Bond Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I35205EU

The performance tracked by the Index** is the close of business in the local markets that compose the index. Prices used in the Index calculation are mid prices.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

Objective and Investment Policy

Objective

To track the performance of iBoxx MSCI ESG EUR High Yield Corporates TCA Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index. The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

iBoxx MSCI ESG EUR High Yield Corporates TCA Index is a bond index representative of euro-denominated BB/B rated bonds issued by corporate issuers that follows the rules of the iBoxx EUR High Yield TCA Index (the "Parent Index") and applies ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.*

- Index currency: Euro
- Index Composition

The eligible universe of the Index includes all securities that compose the Parent Index, which comprises euro denominated bonds issued by public or private corporate issuers with the following eligibility criteria:

- only EUR denominated debt from corporate issuers is eligible, independent of country of risk or origin.
- all bonds must have an average credit rating of BB or B. The average rating is computed by iBoxx, based on the credit ratings provided by the three rating services: Fitch Ratings, Moody's Investors Service or S&P Global Ratings.
- all eligible bonds must have a remaining time to maturity of at least 2 years for inclusion, measured from the respective rebalancing date to the maturity date. For bonds already included in the Index, the minimum time to maturity is 1 year at each monthly rebalancing.
- all bonds require a minimum amount outstanding of EUR 300 million in order to be eligible for the Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Markit.

iBoxx MSCI ESG EUR High Yield Corporates TCA Index value is available via Bloomberg. At the date of the prospectus, the ticker is: IBXXLHYT

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are mid prices. New securities entering the Index are included in the Index at their respective ask prices.

Markit index methodology, composition, revision rules and additional information concerning the Index underlying components are available on markit.com

*These exclusions will be applied by the Fund from 1 May 2025.

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. AMUNDI EUR SHORT TERM HIGH YIELD CORPORATE BOND ESG

Objective and Investment Policy

Objective

To track the performance of iBoxx MSCI ESG EUR High Yield Corporates 1-3 TCA index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.
The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

iBoxx MSCI ESG EUR High Yield Corporates 1-3 TCA Index is a bond index representative of euro-denominated BB/B rated bonds issued by corporate issuers that follows the rules of the iBoxx EUR High Yield Corporates 1-3 TCA index (the "Parent Index") and applies ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.*

- Index currency: Euro
- Index Composition

The eligible universe of the Index includes all securities that compose the Parent Index, which comprises euro denominated bonds issued by public or private corporate issuers with the following eligibility criteria:

- only EUR denominated debt from corporate issuers is eligible, independent of country of risk or origin.
- all bonds must have an average credit rating of BB or B. The average rating is computed by iBoxx, based on the credit ratings provided by the three rating services: Fitch Ratings, Moody's Investors Service or S&P Global Ratings.
- to qualify for the index all eligible bonds must have a remaining time to maturity of at least 2 years, measured from the respective rebalancing date to the maturity date. For bonds already included in the Index, the minimum time to maturity is 1 year at each monthly rebalancing. All bonds must have at the rebalancing day a time to maturity between one and three year.
- all bonds require a minimum amount outstanding of EUR 300 million in order to be eligible for the Index.

Then, the Index screens out the constituents of the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Markit .

iBoxx MSCI ESG EUR High Yield Corporates 1-3 TCA index value is available via Bloomberg. At the date of the prospectus, the ticker is: IBXXME1T

Markit index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [markit.com](https://www.markit.com)

*These exclusions will be applied by the Fund from 1 May 2025.

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI EUR FLOATING RATE CORPORATE BOND ESG

Objective and Investment Policy

Objective

To track the performance of iBoxx MSCI ESG EUR FRN Investment Grade Corporates TCA Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index. The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

iBoxx MSCI ESG EUR FRN Investment Grade Corporates TCA Index is a bond index representative of euro-denominated investment grade floating rate note (FRN) bonds issued by corporate issuers from developed countries that follows the rules of the iBoxx EUR FRN Investment Grade Corporates TCA Index (the "Parent Index") and applies ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.*

- Index currency: Euro
- Index Composition

The eligible universe of the Index includes all securities that compose the Parent Index, which comprises euro denominated senior floating rated notes (FRNs) bonds issued by corporate issuers from developed countries with the following eligibility criteria:

- all bonds must have an average credit rating equivalent to investment grade. The average credit rating is computed by iBoxx, based on the credit ratings provided by the three rating services: Fitch Ratings, Moody's Investors Service or S&P Global Ratings. Investment grade is defined as BBB- or higher from Fitch Ratings and S&P Global Ratings and Baa3 or higher from Moody's Investor Service.
- all eligible bonds must have a remaining time to maturity of at least 1 month measured from the respective rebalancing date to the maturity date.
- all bonds require a minimum amount outstanding of EUR 300 million in order to be eligible for the Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Markit.

iBoxx MSCI ESG EUR FRN Investment Grade Corporates TCA Index value is available via Bloomberg. At the date of the prospectus, the ticker is: IBXXFRNT

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are mid prices. New securities entering the Index are included in the Index at their respective ask prices.

Markit index methodology, composition, revision rules and additional information concerning the Index underlying components are available on markit.com

*These exclusions will be applied by the Fund from 1 May 2025.

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GLOBAL HIGH YIELD CORPORATE BOND ESG

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI Global Corporate High Yield SRI Sustainable Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The Index offers exposure to the high yield corporate bond market denominated in USD, EUR and GBP.

This index is based on the Bloomberg Global High Yield Corporate Index (the "Parent Index") and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted according to pre-defined Business Involvement Screens and issuers with a "Red" MSCI ESG Controversy Score.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.*

- Index currency: US Dollar
- Index Composition

The applicable universe comprises USD, EUR and GBP denominated high yield bonds issued by companies in developed markets, and with a minimum par amount outstanding with fixed minimum issues sizes set for all eligible currencies, as further described in Annex 1 -ESG Related Disclosures to this Prospectus.

*These exclusions will be applied by the Fund from 1 May 2025.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Prices used in the Index calculation are bid prices. The initial price for new corporate issues entering the index is the offer side; after the first month, the bid price is used.

Bloomberg MSCI Global Corporate High Yield SRI Sustainable Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I35333US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GLOBAL EMERGING BOND MARKET IBOXX

Objective and Investment Policy

Objective

To track the performance of Markit iBoxx USD Liquid Emerging Markets Sovereigns Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Markit iBoxx USD Liquid Emerging Markets Sovereigns Index is a bond index representative of US dollar-denominated bonds issued by the governments or central banks of emerging countries.

The index is a Total Return Index : the coupons paid by the index constituents are included in the Index return.

- Index currency: US Dollar
- Index Composition

The Markit iBoxx USD Liquid Emerging Markets Sovereigns Index includes bonds with the following eligibility criteria:

- US dollar-denominated bonds with fixed coupons or with a step clause (ability to modify the coupons rate during the bonds duration, under conditions specific to each bond);
- issued in a total amount of at least 500 million US dollars;
- maturity over 2 years when entering the index (1.25 years for bonds already in the index);
- bonds with a minimum average CCC rating by Fitch, Moodys and Standard and Poor's;
- the issuer shall not have defaulted on its external debt and have a long-term debt rated by one of the following rating agencies: Fitch, Moodys or Standard & Poors. Default is based on the information provided by the rating agencies (Fitch, Moodys or Standard & Poors), or with a D or RD rating for Fitch, C or Ca for Moodys and D or SD for S&P.

Each country is represented by at least two issues. The weight of each country is calculated taking into account all the issues in USD for that country.

The weight of each index component is based on its market value.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by Markit.

Markit iBoxx USD Liquid Emerging Markets Sovereigns Index value is available via Bloomberg. At the date of the prospectus, the ticker is: IBXXLES1

The performance tracked by the Index is the 4:00 pm fixing (New York time). Prices used in the Index calculation are mid prices.

Markit index methodology, composition, revision rules and additional information concerning the Index underlying components are available on markit.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GLOBAL INFLATION-LINKED BOND SELECT⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of J.P. Morgan Global Inflation 1-10 Year Tilted Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

J.P. Morgan Global Inflation 1-10 Years Tilted Index is a bond index representative of local currency denominated inflation-linked investment grade government bonds issued by a fixed list of 12 developed markets, namely Australia, Canada, Denmark, France, Germany, Italy, Japan, Spain, Sweden, United Kingdom, and United States that applies a weight tilt toward issuers ranked higher based on JESG scores, and underweight issuers that rank lower.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The Index comprises international inflation-linked investment grade bonds issued in local currency by governments of 12 developed countries, namely Australia, Canada, Denmark, France, Germany, Italy, Japan, Spain, Sweden, United Kingdom, and United States with remaining maturity between 1 and 10 years.

The Index applies J.P. Morgan ESG (JESG) issuer scores* to adjust the weights of index constituents from the respective baseline indices. The JESG index scores are an amalgamation of Verisk Maplecroft and Sustainalytics on an equal weight basis. The scores range from 0 - 100, with 100 classified as the best possible score.

The JESG scores are divided into bands that are used to scale each issue's baseline index market value. JESG bands are rebalanced on a quarterly basis, during the month-end rebalancing in January, April, July, and October.

The Index is weighted by market capitalization subject to tilts based on JESG scores ; absolute difference between weight in the Index and market cap based weight, cannot exceed 5%.

In addition to 5% maximum change with respect to market capitalization based weights, each country weight due to tilt based on JESG Scores, cannot exceed twice its market capitalization based weight. The weights change monthly on each rebalance day, and those weights remain active for the remainder of that month.

*For more information on the score, screen and bands, please refer to the Index methodology available on jpmorgan.com.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by J.P. Morgan .

J.P. Morgan Global Inflation 1-10 Year Tilted Index value is available via Bloomberg. At the date of the prospectus, the ticker is: JPILGLTL

J.P. Morgan index methodology, composition, revision rules and additional information concerning the Index underlying components are available on jpmorgan.com

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology. The sub-fund will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI EURO GOVERNMENT TILTED GREEN BOND⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of Bloomberg Euro Treasury Green Bond Tilted Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The Bloomberg Euro Treasury Green Bond Tilted Index is based on the Euro Treasury 50bn Bond Index (the "Parent Index"), and measures the performance of investment grade, EUR-denominated, fixed-rate government debt. The Index is tilted such that, on a rebalancing date, at least 30% of the Index's market value is allocated to securities classified as Green Bonds and the remaining percentage is allocated to non-Green Bonds, and the risk profiles of the Index and the Parent Index are comparable.

The index is a Total Return Index : the coupons paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The index respects the following criteria:

- Eligible bonds have at least EUR 300 mn outstanding nominal and are issued by Eurozone countries with at least EUR 50 bn in issuance. The list of countries eligible for the index is reviewed on an annual basis.
- Countries must be rated investment grade (Baa3/BBB-/BBB-) or higher to enter the index using the middle rating of Moody's, S&P and Fitch.
- Maturity must be at least one year until final maturity, regardless of optionality.
- Principal and interest must be denominated in EUR.
- The index is rebalanced monthly. Prior to the end of the month, the index composition for the following month is determined based on the Parent Index values in order to set the total weight of green bonds to at least 30%, and maintain a comparable risk profile with the one of the Parent Index.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

All index-eligible bonds are priced by Bloomberg's evaluated pricing service, BVAL. The performance tracked by the Index is the 16h15 fixing (London time). Prices used in the index calculation are mid prices.

Bloomberg Euro Treasury Green Bond Tilted Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37637EU

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are bid prices.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GOVT BOND HIGHEST RATED EURO INVESTMENT GRADE⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of FTSE Eurozone Highest-Rated Government Bond Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

FTSE Eurozone Highest-Rated Government Bond Index is a bond index representative of government bonds issued by eurozone member countries with a maturity longer than 1 year and at least two ratings equal to AAA or equivalent with the three rating agencies S&P, Moodys and Fitch.

The index is a Total Return Index : the coupons paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The FTSE Eurozone Highest-Rated Government Bond Index includes at least five issuers. If an issuer is downgraded, such issuer shall only be replaced if another issuer in turn becomes eligible in order to meet the minimum number of issuers required for the index. In other words, the securities are the highest-rated debt securities of sovereign states in the eurozone.

The eligibility criteria for the bonds comprising the FTSE Eurozone Highest-Rated Government Bond Index are as follows:

- nominal value and coupons denominated in euros, with no options and no convertibility;
- traded on the MTS platform (pan-European electronic platform for the listing and trading of bonds in euros);
- issued by a sovereign government of one of the Eurozone countries defined in the index provider's methodology;
- maturity ranging of over one year;
- issued in a total amount of at least EUR 2 billion.

The weight of each index component is based on its market value.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by FTSE("FTSE").

FTSE Eurozone Highest-Rated Government Bond Index value is available via Bloomberg. At the date of the prospectus, the ticker is: EM3AG5

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are bid prices.

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on ftse.com

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

AMUNDI GOVT BOND LOWEST RATED EURO INVESTMENT GRADE⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of FTSE Eurozone Lowest-Rated Government Bond IG Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

FTSE Eurozone Lowest-Rated Government Bond IG Index is a bond index representative of government bonds of Eurozone member countries (as defined in the index provider's methodology) with lower creditworthiness compared to those issued by other Eurozone sovereign states.

The index is a Total Return Index : the coupons paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The FTSE Eurozone Lowest-Rated Government Bond IG Index includes bonds with the following eligibility criteria:

- nominal value and coupons denominated in euros, with no options and no convertibility;
- traded on the MTS platform (pan-European electronic platform for the listing and trading of bonds in euros);
- issued by a sovereign government of Eurozone countries defined in the index provider's methodology;
- maturity of over one year;
- with at least two ratings below "AAA" or one rating below the equivalent of the AAA rating by one of the rating agencies S&P, Moodys and Fitch;
- with at least two Investment Grade ratings, also by the rating agencies S&P, Moodys and Fitch i.e. greater or equal to BBB- at S&P and Fitch and Baa3 at Moodys;
- issued in a total amount of at least EUR 2 billion;
- issuer not included in the FTSE Eurozone Highest-Rated Government Bond Index (comprising countries rated "AAA" by at least two of the aforementioned rating agencies or countries that may no longer be meeting the rating criterion, but despite that are still part of the Index under the five-country minimum inclusion criterion);
- total weight of each issuer limited to 30%.

The weight of each index component is based on its market value. If the number of countries falls below 4, the countries are equally weighted.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by FTSE("FTSE").

FTSE Eurozone Lowest-Rated Government Bond IG Index value is available via Bloomberg. At the date of the prospectus, the ticker is: EMTSIG5

AMUNDI ITALY BTP GOVERNMENT BOND 1-3Y⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of FTSE Eurozone Italy Government 1-3Y (Mid Price) Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Benchmark Index is the FTSE Eurozone Italy Government 1-3Y (Mid Price) Index, denominated in Euros.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Benchmark Index is composed of Italian sovereign bonds with maturities of one to three years. The initial index components were selected using the same criteria as those used for the other FTSE Government indexes, described below.

To qualify for the Benchmark Index, bonds must meet the following criteria:

- Nominal bonds, with fixed coupons, redeemable at maturity in local currency, without embedded options and nonconvertible
- Traded on the MTS platform
- Issued by the Italian government
- Having a minimum outstanding issuance of two billion euros (as of May 31, 2022)

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by FTSE ("FTSE").

FTSE Eurozone Italy Government 1-3Y (Mid Price) Index value is available via Bloomberg. At the date of the prospectus, the ticker is: FMMPITA5

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : Euro

AMUNDI ITALY BTP GOVERNMENT BOND 10Y⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of FTSE Eurozone Target Maturity Government Bond Italy (Mid Price) Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Benchmark Index is the FTSE Target Maturity Government Bond Italy (Mid Price) Index denominated in Euros.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Benchmark Index is composed of Italian sovereign bonds having an average residual maturity of 10 years. The initial index components were selected using the same criteria as those used for the other FTSE Government indexes, described below. To qualify for the Benchmark Index, bonds must meet the following criteria:

- Nominal bonds, with fixed coupons, redeemable at maturity in local currency, without embedded options and non-convertible
- Traded on the MTS platform
- Issued by the Italian government
- Having a minimum outstanding issuance of two billion euros (as of May 31, 2022)

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by FTSE ("FTSE").

FTSE Eurozone Target Maturity Government Bond Italy (Mid Price) Index value is available via Bloomberg. At the date of the prospectus, the ticker is: FMMPITX5

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on ftse.com

AMUNDI EUR CORPORATE BOND

Objective and Investment Policy

Objective

To track the performance of Bloomberg Euro Corporate Bond Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Bloomberg Euro Corporate Bond Index is a broad-based benchmark that measures the investment grade, euro-denominated, fixed-rate corporate bond market. Inclusion is based on currency denomination of a bond and not country of risk of the issuer.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Index components are representative of the corporate fixed-rate bonds, issued in euro and that have an investment grade credit rating.

The issuers' domicile could be non-European, only the bond's currency, credit rating, size and time to maturity are taken into account for the selection in the index.

The minimum time to maturity of each bond is at least one year until final maturity.

The minimal amount outstanding per issue is EUR 300 Million.

Senior and subordinated issues are included.

The bonds are weighted according to their market value.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg Euro Corporate Bond Index value is available via Bloomberg. At the date of the prospectus, the ticker is: LECPTREU

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are bid prices.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI PRIME EURO GOV BONDS 0-1Y

Objective and Investment Policy

Objective

To track the performance of Solactive Eurozone Government Bond 0-1 Year Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Solactive Eurozone Government Bond 0-1 Year Index aims to track the performance of Euro denominated government bonds and bills with a remaining time to maturity between 1 month and 1 year.

The Index is a Total Return Index: the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Index includes bonds and bills issued by central governments from Eurozone countries that are rated as investment grade by either Moody's Investors Service or S&P Ratings. For the avoidance of doubt if one of both agencies rates the country as investment grade it is eligible for the index.

To be eligible for inclusion in the Index, all instruments must be denominated in euro, have a minimum amount outstanding of at least 1.5 billion Euros and an effective time to maturity of one year or less. Only fixed coupon and zero coupon instruments are eligible for the index. The issuing country must have a combined amount outstanding in eligible instruments of at least 5 billion Euros. Each index component is weighted according to its market value. Additionally, the market cap weight of each issuing country is capped at 25%.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Solactive.

Solactive Eurozone Government Bond 0-1 Year Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SOLEUS01

The performance tracked by the Index is the 17:15 fixing (Paris time).

Prices used in the Index calculation are bid prices. Bonds added in a rebalancing are included the Index at ask price on the relevant rebalance day.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. Objective and Investment Policy

Objective

To track the performance of Solactive Eurozone Government Bond Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Solactive Eurozone Government Bond Index is a bonds index, representative of domestic government bonds issued by euro zone countries that have an investment grade credit rating from one rating agency (Standard & Poors or Moodys).

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Index constituents are representative of domestic government bonds issued by euro zone countries that have an investment grade credit rating from one rating agency (Standard & Poors or Moodys), i.e. the issuer's rating must be equal or higher than BBB- for Standard & Poors or Baa3 for Moodys.

To be eligible in the index, the bonds must be issued in euro, have a fixed coupon, a minimum time to maturity of 1 year, and a minimum outstanding amount of 1.5 billion euro.

The bonds are weighted according to their market value.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Solactive.

Solactive Eurozone Government Bond Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SOLEUSOV

The performance tracked by the Index is the 17:15 fixing (Paris time). Prices used in the Index calculation are bid prices.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. AMUNDI PRIME GLOBAL GOVERNMENT BOND⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of Solactive Global Developed Government Bond Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Solactive Global Developed Government Bond Index is a bond index including the fixed-rate government bonds from the main developed, Investment Grade rated countries.

The Index is a Total Return Index : the coupons paid by the index constituents are included in the index return.

- Index currency: Euro
- Index Composition

To be included in the Index, the country must be rated Investment grade by one rating agency (Standard & Poors or Moodys), i.e. the country's bonds rating must be equal or higher than BBB- for Standard & Poors or Baa3 for Moodys, and the total market value of the bonds, issued in local currency, must be higher than 1% of the total market value of the eligible bonds universe.

The eligible universe is made up of bonds issued by developed government, Investment Grade issuers, in local currency, with a time to maturity longer than one year, and whose outstanding amount is larger than 1.5 billion of its local currency, except for Japan where the minimum size is JPY 150 billion, Denmark where the minimum size is DKK 15 billion, and Sweden , where the minimum size is SEK 15 billion.

The outstanding amount of each bonds is adjusted by the holdings of the central bank of each country, when the data is public.

The bonds are weighted in the index according to their market value.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Solactive.

Solactive Global Developed Government Bond Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SOLGDGA

The performance tracked by the Index is the close of business in the local markets that compose the index.

Prices used in the Index calculation are bid prices.

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI USD CORPORATE BOND

Objective and Investment Policy

Objective

To track the performance of Bloomberg US Corporate Liquid Issuer Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Bloomberg US Corporate Liquid Issuer Index is a bond index that measures the more liquid subset of the Bloomberg US Corporate Index, which tracks the investment grade, fixed-rate, taxable corporate bond market and includes USD-denominated securities publicly issued by US and non-US industrial, utility, and financial issuers (the Parent Index).

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities that compose the Parent Index. Then the following criteria are applied to be eligible for the Index :

- Bonds must have at least three years remaining to maturity and a minimum USD750mn par amount outstanding to be eligible for the Index.
 - In addition, issuers must have at least USD2bn minimum par amount outstanding in the Parent Index to be included.
 - Issuers with Emerging Markets country of risk as per the Bloomberg index definition are excluded.
- Issuers are also capped at 3% by market value.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg US Corporate Liquid Issuer Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I38697US

The performance tracked by the Index is the 16:00 fixing (New York time). Prices used in the Index calculation are bid prices.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI US TREASURY BOND 0-1Y

Objective and Investment Policy

Objective

To track the performance of Bloomberg US Short Treasury Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Bloomberg US Short Treasury Index is a bond index representative of USD-denominated bills, bonds and notes issued by the US government. The index includes treasury bills issued in fixed maturity terms of 4, 13, 26, and 52 weeks and treasury notes and bonds that have fallen below one year to maturity.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The Index includes securities with the following eligibility criteria:

- Only United States Government Treasury Bills, Notes and Bonds are eligible
- USD-denominated Treasury Bills, Bonds and Notes
- Minimum remaining time to Maturity of more than 1 month on a rebalancing date
- Maximum remaining time to Maturity of 1 year or less on a rebalancing date
- Securities must be rated investment grade (Baa3/BBB-/BBB- or higher)
- The weight of each index component is based on its market value.
- US Treasuries held in the Federal Reserve SOMA account (both purchases at issuance and net secondary market transactions) are deducted from the total amount outstanding.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg US Short Treasury Index value is available via Bloomberg. At the date of the prospectus, the ticker is: LT12TRUU

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

AMUNDI SHORTDAX DAILY (-1X) INVERSE

Objective and Investment Policy

Objective

To track the performance of SHORTDAX Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Index, which is calculated by STOXX Ltd., is tied to the performance of the German blue chip DAX® index (Performance Index) (the "Base Index") and tracks at index level the performance of an investment with a short position in relation to the DAX® Index.

The DAX® Index calculated by STOXX Ltd. comprises the 40 largest German companies with the highest turnovers that are listed on the Frankfurt Stock Exchange.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Index, which is calculated by STOXX Ltd., is tied to the performance of the German blue chip DAX® index (Performance Index) (the "Base Index") and tracks at index level the performance of an investment with a short position in relation to the DAX® Index.

The performance of the ShortDAX® TR Index, which is determined daily, approximates the reverse performance of the Base Index. A positive change in the Base Index will result in a negative change and a negative change in the Base Index will result in a positive change of similar scopes in terms of percentage on a daily basis in the Index.

In addition to the inverse DAX® performance, the Index also contains interest payments resulting from the investment strategy in twice the amount of Euro Short Term Rate ("€STR"). Interest accrues in twice the same amount for the investment volume as well as for the funds received from short-selling. In addition, the lending costs incurred in connection with existing short positions are taken into account when calculating the Index.

The euro short-term rate (€STR) reflects the wholesale euro unsecured overnight borrowing costs of banks located in the euro area. The daily compounded €STR is calculated and published by the European Central Bank ("ECB"). The method of calculation of €STR is accessible at:

https://www.ecb.europa.eu/stats/financial_markets_and_interest_rates/euro_short_term_rate/html/index.en.html.

Index Calculation Method:

$$\text{Index}(t) = \text{Index}(T) \times [1 - (\text{Dax}(t)/\text{Dax}(T) - 1)] + \text{Index}(T) \times (2 \times \text{€STR}(T) - \text{Cm}) \times d/360$$

Where:

Index(t) = Index level at the valuation time t

Index(T) = Index closing price on the preceding valuation date T

DAX(t) = Base Index level at the valuation time t

DAX(T) = Closing price of the Base Index on the preceding valuation date T

€STR(T) = Euro Short Term Rate on the preceding valuation date T

Cm = Monthly determined securities lending costs

d = number of days between the valuation date and the preceding valuation date T

Investors should be aware that the Index almost mirrors the daily performance of the Base Index and does so in percentage and not in absolute terms. If the Base Index rises and then falls by the exact number of points on the following day, this means that the Index will not reach its initial level.

Investing in the sub-fund is associated with specific risks if the Base Index develops positively. This positive performance results in a negative performance of the investment.

General Information on the Base Index:

The DAX® Index calculated by STOXX Ltd. comprises the 30 largest German companies with the highest turnovers that are listed on the Frankfurt Stock Exchange (hereinafter the "Index Components"). The Index is calculated as a performance index, i.e. it takes into account dividend and bonus payments by the Index Components in the index calculation. A weighting limit of 10% applies to all index components. The composition of the Index and the weighting of the Index components are reviewed on a quarterly basis in March, June, September and December. Reweighting transactions do not affect the charges payable by the sub-fund and therefore have no impact on the performance of the sub-fund.

The above Index overview summarises the key features of the Index at the time this Prospectus was drawn up, but does not intend to provide a full Index description. Further information regarding the Index is available from the website of the Index Administrator. Investors are advised to obtain information on a regular basis from the aforesaid website on the current Index composition or possible Index adjustments or changes (e.g. with regard to the calculation method applied). In the event of any inconsistencies between the above Index or Base Index summary and the Index offeror's full Index description, the Index offeror's full description shall be authoritative.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by STOXX .

SHORTDAX Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SHORTDAX

The performance tracked is the closing price of the SHORTDAX Index .

STOXX index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GERMAN BUND DAILY (-1X) INVERSE⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of Solactive Bund Daily (-1x) Inverse Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Index tracks the performance of a hypothetical fixed-income investment in the underlying bond futures, with the investment rolling from one contract to the next taking a liquidity position and transaction costs into account.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Solactive Bund Daily (-1x) Inverse Index is tied to the performance of the Euro-Bund Future and reflects the performance of an investment with a short position in the Euro-Bund Future plus consideration of a liquidity position and transaction costs.

The Euro Bund Future relates to a synthetic 10-year bond issued by the Federal Republic of Germany. It is the most liquid and important futures contract within the European fixed-income segment and is thus regarded as a benchmark for the effective interest rate on 10-year federal bonds.

The following relationship applies: The Index will fall if interest rates relating to 10-year bonds fall, and the Index will rise if 10-year interest rates rise.

Investors should be aware that the Index almost inverts the daily performance of the Euro Bund Future and does so in percentage and not absolute terms. If the Euro Bund Future rises and then falls by the exact same number of basis points on the following day, this means that the Index will not regain its initial level.

Investing in the Subfund entails specific risks if the performance of the Euro Bund Future is positive. This positive performance results in a negative performance of the investment.

Rolling Procedure:

As futures expire, the rolling future strategy regularly has to roll its exposure from one futures contract to the next. This happens during the roll period. A roll period occurs quarterly. The first day of the roll (the roll period start date) is eight Business Days before the roll determination date. The roll determination date is the trading date closest to the 10th of March, June, September and December. If the 10th of these months is not a Business Day, the roll determination date is the first trading day following the 10th day of the month. There are five Business Days in total in a roll period, with the exposure being moved from the lead contract month future to the next contract month future in five steps of 20%. The final day of the roll (the roll period end date) is therefore the Business Day four trading days after the start of the roll period.

More detailed information regarding the rolling procedure may be taken from the Index description that is available at www.solactive.com.

- Index Revision

The Index rebalancing is planned on the roll period of the underlying bond futures.

- Index Publication

The Index is calculated and published by Solactive .

Solactive Bund Daily (-1x) Inverse Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SOD11BUN

Solactive index methodology, composition, revision rules and additional information concerning the Index underlying components are available on solactive.de

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

Objective and Investment Policy

Objective

To track the performance of Bloomberg Global Corporate IG select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Bloomberg Global Corporate IG Select Index is a bond index, representative of global fixed-rate investment grade debt issued by corporate issuers from developed markets within the industrial, utility and financial sectors and that are part of the Organization for Economic Co-operation and Development (OECD) countries.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The securities composing the Index are rated Investment Grade (using middle rating of Moodys, S&P and Fitch) and have at least one year until final maturity. The Index is a multicurrency benchmark which is including corporate fixed-rate debt with a minimum par amount outstanding with fixed minimum issue sizes set for all eligible currencies. Only bonds from OECD currencies and OECD countries are selected and bonds from emerging markets currencies and countries are excluded. The list of OECD currencies and EM currencies is reviewed annually. To be eligible for the index, bonds must have both an OECD country of risk and country of incorporation. Issuers from Emerging Markets country of risk are excluded, as per the Bloomberg EM Country definition.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg Global Corporate IG select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37936US

Prices used in the Index calculation are bid prices. The initial price for new corporate issues entering the Index is the offer side; after the first month, the bid price is used.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index, but it must follow investment grade and OECD criteria for holding securities. For a short period of time, up to three months, exceptions to these restrictions may be made in the event of securities that were part of the benchmark index but were downgraded from investment grade level.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of FTSE EPRA/NAREIT Developed Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The FTSE EPRA/NAREIT Developed Index is an equity index representative of the listed real estate companies and REITS worldwide.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

EPRA stands for European Public Real Estate Association and NAREIT National Association of Real Estate Investment Trust.

- Index currency: Euro
- Index Composition

Each stock of the Index is weighted in function of the size of its capitalization, adjusted with its free float.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by FTSE ("FTSE").

FTSE official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

FTSE EPRA/NAREIT Developed Index value is available via Bloomberg. At the date of the prospectus, the ticker is: TRNGLE

The performance tracked is the closing price of the FTSE EPRA/NAREIT Developed Index .

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

(1) This sub-fund is not an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

AMUNDI USD CORPORATE BOND 1-5Y ESG

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI US Corporate 1-5 Year ESG Sustainability SRI Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index. The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI US Corporate 1-5 Year ESG Sustainability SRI Index is a bond index, representative of the corporate fixed-rate, investment grade, USD denominated securities that follows the rules of the Bloomberg US Aggregate Corporate Index (the "Parent Index") with a remaining maturity between 1 year and 5 years at the end of each month and applies additional ESG criteria for security eligibility.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The applicable universe includes all securities that compose the Parent Index (i.e. USD-denominated, fixed-rate investment-grade corporate bonds publicly issued) with a remaining maturity between 1 year and 5 years at the end of each month ; and a minimum per amount outstanding of USD 300 million. Then, filters are applied as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI US Corporate 1-5 Year ESG Sustainability SRI Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37545US

The performance tracked by the Index is the 4pm New York time fixing. Prices used in the Index calculation are bid prices. The initial price for new corporate issues entering the Index is the offer side; after the first month, the bid price is used.

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Sub-fund base currency : US Dollar

AMUNDI MSCI EMU SMALL CAP ESG BROAD TRANSITION

Objective and Investment Policy

Objective

To track the performance of MSCI EMU Small Cap ESG Broad CTB Select Custom Net EUR Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index. The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI EMU Small Cap ESG Broad CTB Select Custom Net EUR Index is an equity index based on the MSCI EMU Small Cap Index (the "Parent Index") representative of small-cap securities across developed European Economic and Monetary Union ("EMU") countries. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with a strong MSCI ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

MSCI EMU Small Cap ESG Broad CTB Select Custom Net EUR Index is constructed by applying a combination of values based exclusions and an optimization process to increase the MSCI ESG Score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EMU Small Cap ESG Broad CTB Select Custom Net EUR Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEMSCCT

The performance tracked is the closing price of the MSCI EMU Small Cap ESG Broad CTB Select Custom Net EUR Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 52% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI STOXX EUROPE SELECT DIVIDEND 30

Objective and Investment Policy

Objective

To track the performance of STOXX Europe Select Dividend 30 Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

STOXX Europe Select Dividend 30 Index is an equity index representative of the stock-market performance of the large European companies that pay the most dividends in their respective countries, while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

- Index currency: Euro
- Index Composition

The Index is derived from the STOXX 600 index. It measures the stock-market performance of large European companies that pay the most dividends in their respective countries. It covers a universe of 600 stocks in the following countries: Germany, Austria, Belgium, Denmark, Spain, Finland, France, Czech Republic Ireland, Italy, Luxembourg, Norway, the Netherlands, Portugal, the United Kingdom, Sweden and Switzerland.

Each stock in the Index is weighted according to its net annual dividend payout ratio such that the stocks with the highest dividend payout ratio have the highest weighting.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by STOXX .

STOXX official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

STOXX Europe Select Dividend 30 Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SD3R

The performance tracked is the closing price of the STOXX Europe Select Dividend 30 Index.

STOXX index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through an indirect replication by investing into financial derivatives instruments delivering the performance of the Index in exchange for the performance of the assets held by the sub-fund.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Plan d'Epargne en Actions (PEA) : Eligible

German Investment Tax Act : At least 90% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

Derivatives are integral to the sub-fund's investment strategies. The sub-fund will swap the performance of the assets held by the sub-fund for that of the Index through a derivative contract or total return swap. For further information please refer to sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods for Index and UCITS ETF sub-funds" of this prospectus.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI USD CORPORATE BOND CLIMATE PARIS ALIGNED

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI USD Corporate PAB Green Tilted Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The Index Bloomberg MSCI USD Corporate PAB Green Tilted Index is constructed from the Bloomberg US Corporate Index (the "Parent Index") and intends to be representative of the USD-denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB label. The index sets an initial 50% decarbonization of absolute GHG emissions and carbon intensity relative to the standard Bloomberg US Corporate Index, followed by an annual 10% decarbonization trajectory of both measures, and uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The applicable universe includes Corporate (industrial, utility and financial institutions) senior and subordinated bonds with at least one year until final maturity, regardless of optionality. In addition, principal and interest must be denominated in USD with USD300mn minimum par amount outstanding.

Then, filters are applied as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI USD Corporate PAB Green Tilted Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I37953US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI USD HIGH YIELD CORPORATE BOND ESG

(until 30/04/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI US Corporate High Yield SRI Sustainable Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI US Corporate High Yield SRI Sustainable Bond Index tracks fixed-rate, high-yield corporate bond with at least USD300mn par amount outstanding. This index is based on the Bloomberg US Corporate High Yield Index (the "Parent Index") and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted according to pre-defined Business Involvement Screens and issuers with a "Red" MSCI ESG Controversy Score.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

Bloomberg MSCI US Corporate High Yield SRI Sustainable Index includes Corporate (industrial, utility and financial institutions) senior and subordinated bonds with at least one year until final maturity, regardless of optionality. In addition, principal and interest must be denominated in USD with USD300mn minimum par amount outstanding.

Then, filters are applied as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI US Corporate High Yield SRI Sustainable Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I35279US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

- General description of the Index

Bloomberg MSCI ESG Euro Corporate High Yield Select Index tracks fixed-rate, high-yield corporate bond with at least EUR300mn par amount outstanding. This index is based on the Bloomberg Euro Corporate High Yield Index (the "Parent Index") and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted according to pre-defined Business Involvement Screens and issuers with a "Red" MSCI ESG Controversy Score.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: Euro
- Index Composition

Bloomberg MSCI ESG Euro Corporate High Yield Select Index includes Corporate (industrial, utility and financial institutions) senior and subordinated bonds with at least one year until final maturity, regardless of optionality. In addition, principal and interest must be denominated in EUR with EUR300mn minimum par amount outstanding.

Then, filters are applied as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI ESG Euro Corporate High Yield Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I35259EU

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI FIXED MATURITY 2027 ITALY BTP GOVERNMENT BOND¹

Objective and Investment Policy

Objective

To track the performance of FTSE Italy Government 2027 Maturity Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Italy Government 2027 Maturity Index is a bond index representative of fixed rate, euro-denominated government bonds issued by Eurozone member country Italy and maturing in 2027.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The initial composition of the Index is determined using the following rules:

- Fixed-rate government bonds
- Eligible issuing countries: Italy
- Principal and interest must be denominated in EUR
- Bonds must mature on or between 1st January 2027 and 15th December 2027.

The weight of each bond comprising the Index is based on its market value.

The list of government bonds comprising the Index is static. The outstanding amount of each bond will be set at inception and will remain fixed until its maturity.

The outstanding amount of each bond will be set at inception and the Index constituents will remain fixed until one year prior to Maturity Date.

During this final year, the bonds comprised within the Index will gradually mature through the year and interest and principal payments received from matured bonds during the month will be reinvested in government securities issued by France or Germany (Treasury bills). The remaining time to maturity of each Treasury bill will be between 1 and 6 months as of each monthly rebalancing date and with a 28% cap.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by FTSE ("FTSE").

FTSE official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

FTSE Italy Government 2027 Maturity Index value is available via Bloomberg. At the date of the prospectus, the ticker is: CFIIT27

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

¹ In the 12 months prior to maturity date, the sub-fund may no longer qualify as an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010.

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Credit	Management
Currency	Market
Derivatives	Sampling index replication
Hedging risk (hedged share class)	Sustainability
Index replication	Use of techniques and Instruments
Interest rate	Fixed maturity*
Listing market liquidity (ETF share class)	

*Please note that the sub-fund has a fixed maturity on 31 décembre 2027. On the maturity date, upon decision of the Board, the shareholders of the sub-fund may have their shares redeemed without further notice or shareholder approval. In this case, payment of redemption proceeds will be paid to the shareholders on or around the maturity date. Additionally, the sub-funds may be terminated at or around the Maturity Date.

Bonds invested in by the sub-fund to track the return of the Index will mature throughout the final year of its term and it is important for investors to take this into consideration before making any investment in the sub-fund in the final year and in the period approaching the final year.

For example, investors seeking exposure to euro government bonds should be aware that the sub-fund may not be suitable for new investment in its final year or in the period approaching its final year.

Please note that the sub-fund does not seek to return any predetermined amount at maturity or in periodic distributions.

Planning Your Investment

Designed for Investors who understand the risks of the sub-fund and plan to invest for at least 5 years.

The sub-fund may appeal to investors who:

- are interested in investment growth in the long term
- are looking to replicate the performance of the Index while accepting its associated risks and volatility
- intend to hold their investment until all the bonds constituents in the Index have matured.

Please refer to the section "Terms with specific meanings" for the definitions of the terms "Business Day" and "Transaction Day".

Transaction deadline for share classes not denominated as "UCITS ETF": 14:00 CET on the relevant Transaction Day.

Transaction deadline for share classes denominated as "UCITS ETF": 18:00 CET on the relevant Transaction Day.

In addition, technical net asset values ("T-NAV") may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a Business Day nor a Transaction Day. These T-NAV are merely indicative and will not be the basis for purchasing, switching, redeeming and/or transferring shares.

AMUNDI FIXED MATURITY 2028 EURO GOVERNMENT BOND YIELD + ¹

Objective and Investment Policy

Objective

To track the performance of FTSE Euro Yield+ Government 2028 Maturity Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

Euro Yield+ Government 2028 Maturity Index is a bond index representative of fixed rate, euro-denominated government bonds issued by Eurozone member countries and maturing in 2028.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The initial composition of the Index is determined using the following rules:

- Fixed-rate government bonds
- Eligible issuing countries: Italy, Portugal and Spain;
- Principal and interest must be denominated in EUR
- Bonds must mature on or between 1st January 2028 and 15th December 2028.

The weight of each bond comprising the Index is based on its market value.

The list of government bonds comprising the Index is static. The outstanding amount of each bond will be set at inception and will remain fixed until its maturity.

The outstanding amount of each bond will be set at inception and the Index constituents will remain fixed until one year prior to Maturity Date.

During this final year, the bonds comprised within the Index will gradually mature through the year and interest and principal payments received from matured bonds during the month will be reinvested in government securities issued by France or Germany (Treasury bills). The remaining time to maturity of each Treasury bill will be between 1 and 6 months as of each monthly rebalancing date and with a 28% cap.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by FTSE ("FTSE").

FTSE official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

FTSE Euro Yield+ Government 2028 Maturity Index value is available via Bloomberg. At the date of the prospectus, the ticker is: CFIEY28

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

¹ In the 12 months prior to maturity date, the sub-fund may no longer qualify as an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010.

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Risks of ordinary market conditions

Credit	Management
Currency	Market
Derivatives	Sampling index replication
Hedging risk (hedged share class)	Sustainability
Index replication	Use of techniques and Instruments
Interest rate	Fixed maturity*
Investment fund	
Listing market liquidity (ETF share class)	

*Please note that the sub-fund has a fixed maturity on 31 décembre 2028. On the maturity date, upon decision of the Board, the shareholders of the sub-fund may have their shares redeemed without further notice or shareholder approval. In this case, payment of redemption proceeds will be paid to the shareholders on or around the maturity date. Additionally, the sub-funds may be terminated at or around the Maturity Date.

Bonds invested in by the sub-fund to track the return of the Index will mature throughout the final year of its term and it is important for investors to take this into consideration before making any investment in the sub-fund in the final year and in the period approaching the final year.

For example, investors seeking exposure to euro government bonds should be aware that the sub-fund may not be suitable for new investment in its final year or in the period approaching its final year.

Please note that the sub-fund does not seek to return any predetermined amount at maturity or in periodic distributions.

- the WM Reuters closing (16:00 GMT) exchange rates.

FTSE Euro Broad Government 2029 Maturity Index value is available via Bloomberg. At the date of the prospectus, the ticker is: CFIIEB29

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on ftse.com

¹ In the 12 months prior to maturity date, the sub-fund may no longer qualify as an index-tracking sub-fund within the meaning of the article 44 of the Law dated December 17, 2010.

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Risks of ordinary market conditions

Concentration	Investment fund
Credit	Management
Currency	Market
Derivatives	Sampling index replication
Hedging risk (hedged share class)	Sustainability
Index replication	Use of techniques and Instruments
Interest rate	Fixed maturity*
Listing market liquidity (ETF share class)	

*Please note that the sub-fund has a fixed maturity on 31 décembre 2029. On the maturity date, upon decision of the Board, the shareholders of the sub-fund may have their shares redeemed without further notice or shareholder approval. In this case, payment of redemption proceeds will be paid to the shareholders on or around the maturity date. Additionally, the sub-funds may be terminated at or around the Maturity Date.

Bonds invested in by the sub-fund to track the return of the Index will mature throughout the final year of its term and it is important for investors to take this into consideration before making any investment in the sub-fund in the final year and in the period approaching the final year.

For example, investors seeking exposure to euro government bonds should be aware that the sub-fund may not be suitable for new investment in its final year or in the period approaching its final year.

Please note that the sub-fund does not seek to return any predetermined amount at maturity or in periodic distributions.

AMUNDI MSCI EM ASIA ESG BROAD TRANSITION

Objective and Investment Policy

Objective

To track the performance of MSCI EM Asia ESG Broad CTB Select Net USD Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

MSCI EM Asia ESG Broad CTB Select Net USD Index is an equity index based on the MSCI EM Asia Index (the "Parent Index") representative of the large and mid-cap securities across Emerging Markets countries in Asia. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with a strong MSCI ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

For further information on the exclusions applied by the Index pursuant to the EU Climate Transition Benchmarks (CTB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

MSCI EM Asia ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the ESG score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by MSCI ("MSCI").

MSCI official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

MSCI EM Asia ESG Broad CTB Select Net USD Index value is available via Bloomberg. At the date of the prospectus, the ticker is: MXEFAECT

The performance tracked is the closing price of the MSCI EM Asia ESG Broad CTB Select Net USD Index.

MSCI index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [msci.com](https://www.msci.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

German Investment Tax Act : At least 52% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GLOBAL CORPORATE SRI 1-5Y HIGHEST RATED

(until 30/04/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI Global Corporate A+ ESG Sustainability SRI 1-5 Year Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI Global Corporate A+ ESG Sustainability SRI 1-5 Year Index is a bond index comprising multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity that applies sector and additional ESG criteria for security eligibility.

The Index is a Total Return Index: the coupons paid by the index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The applicable universe comprises multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity and with a minimum par amount outstanding with fixed minimum issues sizes set for all eligible currencies. In addition, bonds must be rated A- or higher by at least 2 credit rating agencies (Moody's, S&P, or Fitch). Additional ESG criteria are further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg.

Bloomberg MSCI Global Corporate A+ ESG Sustainability SRI 1-5 Year Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I38487US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [bloomberg.com](https://www.bloomberg.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GLOBAL CORPORATE BOND 1-5Y HIGHEST RATED ESG

(as from 01/05/2025)

Objective and Investment Policy

Objective

To track the performance of Bloomberg MSCI ESG Global Corporate A+ 1-5 Year Select Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

Bloomberg MSCI ESG Global Corporate A+ 1-5 Year Select Index is a bond index comprising multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity that applies sector and additional ESG criteria for security eligibility.

The Index is a Total Return Index: the coupons paid by the index constituents are included in the index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc). Those exclusions are provided for in Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

- Index currency: US Dollar
- Index Composition

The applicable universe comprises multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity and with a minimum par amount outstanding with fixed minimum issues sizes set for all eligible currencies. In addition, bonds must be rated A- or higher by at least 2 credit rating agencies (Moody's, S&P, or Fitch). Additional ESG criteria are further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg MSCI ESG Global Corporate A+ 1-5 Year Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I38487US

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, thermal coal, nuclear weapons or unconventional oil & gas as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI LIFECYCLE 2030⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of FTSE Lifecycle 2030 Screened Select Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The Index aims to represent the performance of a diversified multi-asset universe of securities, where the weight of each eligible asset classes is adjusted over time based on a glidepath, which reduces its equity exposure and increases its fixed income exposure until November 2030 (the "Index Target Date").

The Index is comprised of eligible global equity securities from the FTSE Developed Screened Select Index and EUR-denominated fixed income securities from the FTSE Euro Broad Investment-Grade Screened Select Corporate Bond Index, the FTSE EMU Government Bond Select Index, the FTSE EMU Government Green Bond Select Index and the FTSE EMU Government Bond 0-1 Year Select Index.

In addition, the Index takes into account Environmental, Social and Governance (ESG) factors in its construction to reduce exposure to certain companies whose products have negative social or environmental impacts.

The Index is a Net Total Return Index :

- dividends net of tax paid by the index equity constituents are included in the Index return.
- the coupons paid by the index fixed income constituents are included in the index return.

- Index currency: Euro
- Index Composition

The applicable universe consists of all the securities comprised in the five following underlying indexes:

- FTSE Developed Screened Select Index is an equity index based on the weighted market capitalization of the FTSE Developed Index, representing the performance of large and mid-cap companies in developed markets belonging to three regions, namely America, EMEA (Europe, the Middle East and Africa) and APAC (Asia & Pacific), that applies a combination of value-based exclusions and a best-in-class selection process, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- FTSE Euro Broad Investment-Grade Screened Select Corporate Bond Index is a bond index based on the weighted market capitalization of the FTSE Euro Broad Investment Grade Corporate Index - Developed Markets, a multi-sector benchmark representative of investment grade, Euro-denominated, government sponsored, collateralized and corporate bonds that applies a combination of value-based exclusions and a best-in-class selection process, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- FTSE EMU Government Green Bond Select Index is a bond index that measures the performance of fixed-rate, EUR-denominated investment grade sovereign bonds issued by the European Monetary Union (EMU) participating countries, that are classified as a 'Green Bond' by the Climate Bond Initiative (CBI) data and are issued in order to fund projects that have positive environmental outcomes, as further described in Annex 1 – ESG Related Disclosures to this Prospectus

- FTSE EMU Government Bond Select Index is a bond index that measures the performance of fixed-rate, investment grade, EUR-denominated sovereign bonds issued by EMU participating countries that meet the specific entry criteria of the FTSE World Government Bond Index (WGBI) such as country classification, accessibility level or minimum market size of EUR 40 billion.

- FTSE EMU Government Bond 0-1 Year Select Index is a bond index that measures the performance of fixed-rate, EUR-denominated, investment grade sovereign bonds with a time to maturity below 1 year, issued by EMU-participating countries that meet specific entry criteria of the FTSE World Government Bond Index (WGBI) such as country classification, accessibility level or minimum market size of EUR 40 billion.

The weight of each underlying indexes in the Index is based on a pre-determined glidepath (as per the Index methodology) that represents the shifting of asset classes and underlying indexes over time until the Index Target date.

The glidepath is pre-defined as per the Index methodology and illustrated in the table below:

Year to Index	FTSE Developed	FTSE Euro Broad Investment-Grade	FTSE EMU Government Bond Select	FTSE EMU Government Green Bond Select	FTSE EMU Government Bond 0-1 Year
Target Date	Screened Select Index	Screened Select Corporate Bond Index	Bond Select Index	Green Bond Select Index	Bond 0-1 Year Select Index
November 2030 (T)	Select Index	Corporate Bond Index	Index	Select Index	Select Index
T-6.25	23%	51%	21%	5%	0%
T-6	22%	52%	21%	5%	0%
T-5	18%	54%	22%	5%	0%
T-4	15%	57%	23%	5%	0%
T-3	11%	59%	25%	5%	0%
T-2	7%	62%	26%	5%	0%
T-1	4%	64%	27%	5%	0%
T-0	0%	50%	0%	0%	50%
T+1	0%	0%	0%	0%	100%
T+2	0%	0%	0%	0%	100%
T+3	0%	0%	0%	0%	100%

From the Index Target Date and as illustrated in the table above, the Index will gradually comprise eligible securities from the FTSE EMU Government Bond 0-1 Years Select Index.

The sub-fund will be liquidated within three (3) years following the Index Target Date subject to a prior shareholder notice. The shareholders of the sub-fund will therefore have their shares redeemed in accordance with the timeline in such notice.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by FTSE ("FTSE").

FTSE official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

FTSE Lifecycle 2030 Screened Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: CFIILC30

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

⁽¹⁾ This sub-fund description may be adjusted at the time of the Target Date to reflect any changes to the investment policy.

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI LIFECYCLE 2039⁽¹⁾

Objective and Investment Policy

Objective

To track the performance of FTSE Lifecycle 2039 Screened Select Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The Index aims to represent the performance of a diversified multi-asset universe of securities, where the weight of each eligible asset classes is adjusted over time based on a glidepath, which reduces its equity exposure and increases its fixed income exposure until November 2039 (the "Index Target Date").

The Index is comprised of eligible global equity securities from the FTSE Developed Screened Select Index and EUR-denominated fixed income securities from the FTSE Euro Broad Investment-Grade Screened Select Corporate Bond Index, the FTSE EMU Government Bond Select Index, the FTSE EMU Government Green Bond Select Index and the FTSE EMU Government Bond 0-1 Year Select Index.

In addition, the Index takes into account Environmental, Social and Governance (ESG) factors in its construction to reduce exposure to certain companies whose products have negative social or environmental impacts.

The Index is a Net Total Return Index :

- dividends net of tax paid by the index equity constituents are included in the Index return.
- the coupons paid by the index fixed income constituents are included in the index return.

- Index currency: Euro
- Index Composition

The applicable universe consists of all the securities comprised in the five following underlying indexes:

- FTSE Developed Screened Select Index is an equity index based on the weighted market capitalization of the FTSE Developed Index, representing the performance of large and mid-cap companies in developed markets belonging to three regions, namely America, EMEA (Europe, the Middle East and Africa) and APAC (Asia & Pacific), that applies a combination of value-based exclusions and a best-in-class selection process, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- FTSE Euro Broad Investment-Grade Screened Select Corporate Bond Index is a bond index based on the weighted market capitalization of the FTSE Euro Broad Investment Grade Corporate Index - Developed Markets, a multi-sector benchmark representative of investment grade, Euro-denominated, government sponsored, collateralized and corporate bonds that applies a combination of value-based exclusions and a best-in-class selection process, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

- FTSE EMU Government Green Bond Select Index is a bond index that measures the performance of fixed-rate, EUR-denominated investment grade sovereign bonds issued by the European Monetary Union (EMU) participating countries, that are classified as a 'Green Bond' by the Climate Bond Initiative (CBI) data and are issued in order to fund projects that have positive environmental outcomes, as further described in Annex I – ESG Related Disclosures to this Prospectus

- FTSE EMU Government Bond Select Index is a bond index that measures the performance of fixed-rate, investment grade, EUR-denominated sovereign bonds issued by EMU participating countries that meet the specific entry criteria of the FTSE World Government Bond Index (WGBI) such as country classification, accessibility level or minimum market size of EUR 40 billion.

- FTSE EMU Government Bond 0-1 Year Select Index is a bond index that measures the performance of fixed-rate, EUR-denominated, investment grade sovereign bonds with a time to maturity below 1 year, issued by EMU-participating countries that meet specific entry criteria of the FTSE World Government Bond Index (WGBI) such as country classification, accessibility level or minimum market size of EUR 40 billion.

The weight of each underlying indexes in the Index is based on a pre-determined glidepath (as per the Index methodology) that represents the shifting of asset classes and underlying indexes over time until the Index Target date.

The glidepath is pre-defined as per the Index methodology and illustrated in the table below:

Year to Index Target Date November 2039 (T)	FTSE Developed Screened Select Index	FTSE Euro Broad Investment-Grade Screened Select Corporate Bond Index	FTSE EMU Government Bond Select Index	FTSE EMU Government Green Bond Select Index	FTSE EMU Government Bond 0-1 Year Select Index
T-15.25	56%	30%	10%	5%	0%
T-15	55%	30%	10%	5%	0%
T-14	51%	32%	11%	5%	0%
T-13	48%	35%	12%	5%	0%
T-12	44%	37%	14%	5%	0%
T-11	40%	40%	15%	5%	0%
T-10	37%	42%	16%	5%	0%
T-9	33%	45%	17%	5%	0%
T-8	29%	47%	19%	5%	0%
T-7	26%	50%	20%	5%	0%
T-6	22%	52%	21%	5%	0%
T-5	18%	54%	22%	5%	0%
T-4	15%	57%	23%	5%	0%
T-3	11%	59%	25%	5%	0%
T-2	7%	62%	26%	5%	0%
T-1	4%	64%	27%	5%	0%
T-0	0%	50%	0%	0%	50%
T+1	0%	0%	0%	0%	100%
T+2	0%	0%	0%	0%	100%
T+3	0%	0%	0%	0%	100%

From the Index Target Date and as illustrated in the table above, the Index will gradually comprise eligible securities from the FTSE EMU Government Bond 0-1 Years Select Index.

The sub-fund will be liquidated within three (3) years following the Index Target Date subject to a prior shareholder notice. The shareholders of the sub-fund will therefore have their shares redeemed in accordance with the timeline in such notice.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by FTSE ("FTSE").

FTSE official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

FTSE Lifecycle 2039 Screened Select Index value is available via Bloomberg. At the date of the prospectus, the ticker is: CFIILC39

FTSE index methodology, composition, revision rules and additional information concerning the Index underlying components are available on [ftse.com](https://www.ftse.com)

⁽¹⁾ This sub-fund description may be adjusted at the time of the Target Date to reflect any changes to the investment policy.

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI GLOBAL TREASURY BOND

Objective and Investment Policy

Objective

To track the performance of Bloomberg Global Aggregate Treasuries Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The Bloomberg Global Aggregate Treasuries Index is a subset of its parent index, the Bloomberg Global Aggregate Index, (the "Parent Index"), filtering for securities with a sector of treasury only. The parent index is a multi-currency bond index composed of local currency treasury, government-related, corporate and securitized fixed-rate investment grade bonds from both developed and emerging markets issuers.

The Index is a Total Return Index : the coupons paid by the Index constituents are included in the index return.

- Index currency: US Dollar
- Index Composition

The Index is a multi-currency benchmark which includes fixed-rate treasury bonds with fixed minimum issues sizes set for all eligible currencies. The securities composing the Index are rated Investment Grade (using middle rating of Moodys, S&P and Fitch) and have at least one year until final maturity.

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg Global Aggregate Treasuries Index value is available via Bloomberg. At the date of the prospectus, the ticker is: LGTRTRUU

Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund does not integrate sustainability risks nor take into account principal adverse impact of investments on sustainability factors in its investment process as its objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

AMUNDI EURO GOVERNMENT LOW DURATION TILTED GREEN BOND

Objective and Investment Policy

Objective

To track the performance of Bloomberg Euro Treasury Low Duration Green Bond Tilted Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index. The sub-fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation, as further described in Annex 1 - ESG Related Disclosures to this Prospectus.

Index Description

- General description of the Index

The Bloomberg Euro Treasury Low Duration Green Bond Tilted Index combines the Bloomberg Euro Treasury 50bn 3-5 Bond Index with the Bloomberg Euro Treasury Green Bond 1M+ Select Country Index, measuring the performance of investment grade, EUR-denominated, fixed-rate government debt.

The Index is a Total Return Index: the coupons paid by the index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Bloomberg Euro Treasury Low Duration Green Bond Tilted Index combines the Bloomberg Euro Treasury 50bn 3-5 Bond Index with the Bloomberg Euro Treasury Green Bond 1M+ Select Country Index to measure the performance of EUR-denominated, investment-grade, fixed-rate government bonds issued by the EMU countries. The Index adjusts the weighting of individual green bonds based on their remaining years to maturity. Furthermore, the total market value of green bonds must constitute 30% of the Index. Country weights are aligned with the Bloomberg Euro Treasury 50bn 3-5 Bond Index. Further ESG criteria are described in the Annex 1 - ESG Related Disclosure to this Prospectus

- Index Revision

The Index rebalancing is planned monthly.

- Index Publication

The Index is calculated and published by Bloomberg .

Bloomberg Euro Treasury Low Duration Green Bond Tilted Index value is available via Bloomberg. At the date of the prospectus, the ticker is: I38964EU
Bloomberg index methodology, composition, revision rules and additional information concerning the Index underlying components are available on bloomberg.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents.

The sub-fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The sub-fund integrates sustainability risks and takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

Objective and Investment Policy

Objective

To track the performance of STOXX Europe Total Market Defense Capped Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

Index Description

- General description of the Index

The STOXX Europe Total Market Defense Capped Index is an equity index based on STOXX Europe Total Market Index (the "Parent Index") and is designed to capture the performance of companies classified in the Aerospace and Defense sector, according to the Industry Classification Benchmark ("ICB"), and that have a proven revenue exposure to defense activities. The defense revenue exposure is defined using Revere (RBICS) data and the Index aims to capture companies with proven exposure to the Defense theme. The Parent Index covers approximately 95 percent of the free float market capitalisation across 17 European countries: Austria, Belgium, Poland, Denmark, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

The Index is a Total Return Index: the dividends paid by the index constituents are included in the index return.

- Index currency: Euro
- Index Composition

The Index universe is defined by all the stocks included in the Parent Index. Then, all securities in the universe are screened for the below information at the review cut-off date:

Step 1. ICB Classification screening: Only constituents whose ICB sector classification belongs to the Aerospace and Defense ICB sector are eligible.

Step 2. Selection screening:

- Eligible companies that are part of Defense ICB Subsector are included in the Index.
- The remaining eligible companies are evaluated based on their revenue exposure to the combined core and extended revenue sub-themes as defined in the Index methodology. Only companies with a revenue exposure greater than 0 are selected, where the revenue exposure to the extended revenue sectors only includes the portion of revenue that are relevant to defense and military activity.

All securities in the universe that passed the above-selection screenings are selected for final Index composition. Each stock is then weighted based on its free-float market-capitalization with a 10% cap.

- Index Revision

The Index rebalancing is planned quarterly.

- Index Publication

The Index is calculated and published by STOXX .

STOXX official indices are calculated using:

- the official closing prices of the stock exchanges on which the component securities are traded;
- the WM Reuters closing (16:00 GMT) exchange rates.

STOXX Europe Total Market Defense Capped Index value is available via Bloomberg. At the date of the prospectus, the ticker is: SXDCR

The performance tracked is the closing price of the STOXX Europe Total Market Defense Capped Index.

STOXX index methodology, composition, revision rules and additional information concerning the Index underlying components are available on stoxx.com

Management Process

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The sub-fund takes into account principal adverse impacts of investments on sustainability factors in its investment process as outlined in more detail in section "Sustainable Investing" of this prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons as defined in "Replication Methods".

German Investment Tax Act : At least 60% of the sub-fund's net asset value is continuously invested in equities listed on a stock exchange or traded on an organized market. For the sake of clarity investments in Real Estate Investment Trusts (as such term is defined by the German Ministry of Finance) and UCITS or UCIs are not included in this percentage.

Tracking Error

The tracking error measures the volatility of the difference between the return of the sub-fund and the return of the Index. In normal market conditions, it is anticipated that the sub-fund will track the performance of the Index with a tracking error of up to 1%. The return, used to compute the tracking error of the sub-fund, is determined before taking into account any swing pricing mechanism.

Techniques and instruments on securities and Derivatives

In order to deal with inflows and outflows and also with some local market specificities (market access and liquidity, local tax); the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. In case of such replication, the sub-fund may hold deposits while keeping full exposure to the Index.

The sub-fund may enter into any efficient portfolio management techniques and instruments relating to transferable securities and money market instruments, such as securities lending and borrowing, reverse purchase agreement and repurchase agreement for the purposes of efficient portfolio management as described and in compliance with sections "Techniques and Instruments on Securities Financing Transactions" and "Replication Methods" of this prospectus. In particular, such techniques and instruments may be used in order to generate additional income.

The maximum and expected proportions of the sub-fund's assets that can be subject to SFT and TRS are disclosed in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS".

NOTES ON SUB-FUND COSTS

These notes apply only to the share class tables in "sub-fund Descriptions".

General The charges you pay as an investor in the sub-fund go to cover sub-fund operating costs, including marketing and distribution costs. These ongoing charges reduce the performance of your investment.

One-off charges taken before or after you invest These may be deducted from your investment or your redemption proceeds, and are paid to sales agents and authorised intermediaries. The fees shown are maximums. To find out the actual fee for a transaction, contact your financial adviser or the transfer agent (section "The SICAV").

Charges taken from the sub-fund over a year These charges are the same for all shareholders of a given share class.

SUSTAINABLE INVESTING

Disclosure Regulation

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby establishing a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonised approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector.

The scope of the Disclosure Regulation is extremely broad, covering a very wide range of financial products (e.g. UCITS funds, alternative investment funds, pension schemes etc.) and financial market participants (e.g. E.U. authorised investment managers and advisers). It seeks to achieve more transparency regarding how financial market participants integrate Sustainability Risks into their investment decisions and consider adverse sustainability impacts in the investment process. Its objectives are to (i) strengthen protection for investors of financial products, (ii) improve the disclosures made available to investors by financial market participants and (iii) improve the disclosures made available to investors regarding the financial products, to amongst other things, enable investors make informed investment decisions.

For the purposes of the Disclosure Regulation, the management company meets the criteria of a "financial market participant", whilst the SICAV and each sub-fund of the SICAV qualifies as a "financial product".

Taxonomy Regulation

The Taxonomy Regulation aims to identify economic activities which qualify as environmentally sustainable (the "Sustainable Activities").

Article 9 of the Taxonomy Regulation identifies such activities according to their contribution to six environmental objectives: (i) Climate change mitigation; (ii) Climate change adaptation; (iii) Sustainable use and protection of water and marine resources; (iv) Transition to a circular economy; (v) Pollution prevention and control; (vi) Protection and restoration of biodiversity and ecosystems.

An economic activity shall qualify as environmentally sustainable where that economic activity contributes substantially to one or more of the six environmental objectives, does not significantly harm any of the other five environmental objectives ("do no significant harm" or "DNSH" principle), is carried out in compliance with the minimum safeguards laid down in Article 18 of the Taxonomy Regulation and complies with technical screening criteria that have been established by the European Commission in accordance with the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the relevant Sub-Funds that take into account the European Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the relevant Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities.

The Sub-Funds identified as Article 8 or Article 9 in their respective relevant sub-fund Description may commit or may not commit to invest at the date of this Prospectus, in economic activities that contribute to the environmental objectives set out in the Article 9 of the Taxonomy Regulation.

For more information on Amundi's approach to the Taxonomy Regulation please refer to Annex 1 – ESG Related Disclosures to this Prospectus and to the Amundi ESG Regulatory Statement on www.amundi.lu

Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022

On 6 April 2022, the European Commission published its Level 2 Regulatory Technical Standards ("RTS") under both the Disclosure Regulation and the Taxonomy Regulation. The RTS were accompanied by five annexes, which provide mandatory disclosure templates.

The RTS are a consolidated set of technical standards, which provide additional detail on the content, methodology and presentation of certain existing disclosure requirements under the Disclosure Regulation and the Taxonomy Regulation.

Commission Delegated Regulation (EU) 2022/1288, setting out the RTS was published on 25 July 2022 in the Official Journal of the EU (OJ). The RTS will apply from 1 January 2023.

Further to art. 14.(2) of the RTS, information about the environmental of social characteristics of art. 8 sub-funds is available in Annex 1- ESG Related Disclosures to this Prospectus.

Further to art. 18. (2) of the RTS, information about sustainable investments of art. 9 sub-funds, if applicable, is available in Annex 1- ESG Related Disclosures to this Prospectus.

For further details on how a sub-fund complies with the requirements of the Disclosure Regulation, the Taxonomy Regulation and the RTS, please refer to the relevant sub-fund description, the annual financial statements of the Fund, and also to Annex 1- ESG Related Disclosures to this Prospectus.

Minimum Standards and Exclusion

Since its creation, the Amundi group of companies ("Amundi") has made responsible investment and corporate responsibility one of its founding pillars, based on the conviction that economic and financial actors have a greater responsibility towards sustainable society and that ESG is a long-term driver of financial performance.

Amundi considers that, in addition to economic and financial aspects, the integration within the investment decision process of ESG dimensions, including sustainability factors and sustainability risks, allows a more comprehensive assessment of investment risks and opportunities.

Integration of Sustainability Risks by Amundi

Amundi's approach to Sustainability Risks relies on three pillars: a targeted exclusion policy, integration of ESG scores in the investment process and stewardship.

Therefore, for passively managed sub-funds, Amundi excludes controversial weapons manufacturers from most of its passively managed sub-funds as disclosed in each sub-fund description. Amundi has also developed a range of passively managed sub-funds that replicate indices that explicitly take into account sustainability risks and principal adverse impact on sustainability factors in their methodologies. For this particular range of passively managed sub-funds, the management process excludes companies in contradiction with the Responsible Investment Policy described below, such as those which do not respect international conventions, internationally recognized frameworks or national regulations.

In addition Amundi has developed its own ESG rating approach. The Amundi ESG rating aims to measure the ESG performance of an issuer, i.e. its ability to anticipate and manage sustainability risks and opportunities inherent to its industry and individual circumstances.

Amundi ESG rating process is based on the "best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

ESG rating and analysis is performed within the ESG Research team of Amundi, which is also used as an independent and complementary input into the decision process.

The Amundi ESG rating is a ESG quantitative score translated into seven grades, ranging from A (the best scores) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G.

For Corporate issuers the ESG performance is assessed by comparison with the average performance of its industry, through the three ESG dimensions:

1. Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
2. Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of human rights in general.
3. Governance dimension: This assesses the capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi's scoring methodology for sovereign issuers relies on a set of about 50 criteria deemed relevant by Amundi ESG Research team to address Sustainability risks and Sustainability factors.

For more information on the 38 criteria considered by Amundi please refer to the Responsible Investment Policy and Amundi ESG Regulatory Statement available on www.amundi.lu.

The Amundi ESG rating also considers potential negative impacts of the issuer's activities on Sustainability (principal adverse impact of investment decisions on Sustainability Factors, as determined by Amundi) including on the following indicators:

- Greenhouse gas emission and Energy Performance (emissions and energy use criteria)
- Biodiversity (waste, recycling, biodiversity and pollution criteria, responsible management forest criteria)
- Water (water criteria)
- Waste (waste, recycling, biodiversity and pollution criteria)
- Social and employee matters (community involvement and human rights criteria, employment practices criteria, board structure criteria, labour relations criteria and health and safety criteria)
- Human rights (community involvement & human rights criteria)
- Anti-corruption and anti-bribery (ethics criteria)

Stewardship activity is an integral part of Amundi's ESG strategy. Amundi has developed an active stewardship activity through engagement and voting. The Amundi Engagement Policy applies to all Amundi funds and is included in the Responsible Investment Policy.

More detailed information are included in the Amundi's Responsible Investment Policy and in the Amundi's Sustainable Finance Statement available at www.amundi.com

Investors' attention is drawn to the fact that the fiduciary duty and regulatory obligation in passive management is to replicate as closely as possible an index. Therefore, the Investment Managers have to meet the contractual objective to deliver a passive exposure in line with the replicated index. As a result, the Investment Managers may have to invest and/or stay invested in securities comprised in an index and impacted by an event of serious controversies, acute sustainability risks or material negative impact on sustainability factors that may lead to an exclusion from Amundi's actively managed products or ESG ETF/index products.

Should you want to consider an ESG alternative, you will find a wide range of options within our responsible investing range.

Impact of Sustainability Risks on a Sub-Fund's returns

Despite the integration of Sustainability risks in the sub-funds' investment strategies as detailed above and in the Amundi ESG Regulatory Statement, certain Sustainability risks will remain unmitigated. Unmitigated or residual Sustainability risks at the issuer level may result, when they materialise, over time horizons that can be also long-term, in a lower financial performance of certain holdings of the sub-funds. Depending on the exposure of the sub-funds to the affected securities, the impact of unmitigated or residual Sustainability risks on the sub-fund's financial performance can have varying levels of severity.

Integration of Amundi's Sustainability Risks approach at Sub-Fund level

The sub-funds listed below are classified pursuant to article 8 of the Disclosure Regulation and aim to promote environmental or social characteristics and to invest in companies that follow good governance practices.

The sub-funds listed above, unless otherwise specified in the management process, exclude all issuers specified in the exclusion list of the Responsible Investment Policy as outlined above.

The SICAV does not currently have Sub-Funds that have sustainable investment as their objective pursuant to Article 9 of the Disclosure Regulation.

Finally, in accordance with Amundi's global responsible investment policy, the Investment Managers of all other sub-funds, not classified pursuant to article 8 or 9 of the disclosure regulation, except if otherwise stated in the relevant sub-fund description, integrate sustainability risks in their investment processes as a minimum via a stewardship approach and, potentially, depending on their investment strategy and asset classes, also via a targeted exclusion policy.

Principal Adverse Impact

Principal Adverse Impacts ("PAIs") are negative, material or likely to be material effects on Sustainability Factors that are caused, compounded by or directly linked to investment decisions by the issuer.

For passively managed Sub-Funds, Amundi considers PAIs via a combination of approaches: exclusions, engagement, vote, controversies monitoring.

For Sub-Funds classified under art. 8 and art. 9 of the Disclosure Regulation, information on PAI consideration is detailed in the dedicated section of the relevant pre-contractual annex to this prospectus.

For all other Sub-Funds not classified pursuant to art. 8 or art. 9 of the Disclosure Regulation Amundi considers only indicator n.14 (Exposure to controversial weapons anti-personnel mines, cluster munitions, chemical weapons and biological weapons) of Annex 1, Table 1 of the RTS. and therefore such sub-funds take into account PAIs of investments on Sustainability Factors in their investment process by excluding securities of companies involved in the production or sale of controversial weapons, except if otherwise stated in the relevant sub-fund description.

Information on PAI on Sustainability factors is available in the SICAV's annual report and in the Amundi's Sustainable Finance Statement available at www.amundi.com.

Taxonomy

The Investment Managers of all sub-funds, except if otherwise stated in the relevant sub-fund description, do not integrate a consideration of environmentally sustainable economic activities (as prescribed in the Taxonomy Regulation) in the management process of the relevant sub-fund. Therefore, for the purpose of the Taxonomy Regulation, it should be noted that the investments underlying these sub-funds do not take into account the EU criteria for environmentally sustainable economic activities.

Guidelines on funds' names using ESG or sustainability-related terms

On 14 May 2024 ESMA published the Guidelines on funds' names using ESG or sustainability-related terms (the 'Guidelines'). They entered into force on 21 November 2024 for new Sub-Funds and will enter into force on 21 May 2025 for Sub-Funds created on or before 21 November 2024. Their objective is to protect investors against misleading sub-funds names which may contain inaccurate sustainability claims and to provide guidance to fund managers in relation to what ESG or sustainability-related names they can use in their funds.

All the Sub-Funds in scope of the Guidelines must comply with the two rules below, namely:

- Minimum 80% of their investments is used to meet environmental or social characteristics in case of art. 8 Sub-Funds, or sustainable investment objectives in case of art. 9 Sub-Funds.
- Compliance with the exclusions under either the EU Paris-Aligned Benchmarks ("PAB") or EU Climate Transition Benchmarks ("CTB").

Additional obligations are specified in the Guidelines depending on whether the Sub-Fund's names contain 'transition', 'impact', 'sustainable' or any terms derived from these words, or a combination of them.

The PAB exclusions as per Art. 12 (1) (a)-(g) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks are:

- (a) companies involved in any activities related to controversial weapons.
- (b) companies involved in the cultivation and production of tobacco.
- (c) companies that benchmark administrators find in violation of the United Nations Global Compact (UNGC) principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- (d) companies that derive 1 % or more of their revenues from exploration, mining, extraction, distribution or refining of hard coal and lignite.
- (e) companies that derive 10 % or more of their revenues from the exploration, extraction, distribution or refining of oil fuels.
- (f) companies that derive 50 % or more of their revenues from the exploration, extraction, manufacturing or distribution of gaseous fuels.
- (g) companies that derive 50 % or more of their revenues from electricity generation with a GHG intensity of more than 100 g CO₂ e/kWh.

The CTB exclusions as per Art. 12 (1) (a)-(c) of the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks are:

- (a) companies involved in any activities related to controversial weapons.
- (b) companies involved in the cultivation and production of tobacco.
- (c) companies that benchmark administrators find in violation of the United Nations Global Compact (UNGC) principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

When a Sub-Fund complies with the PAB exclusions this has been disclosed in the Index methodology section of the relevant Sub-Fund and in the relevant section of the Sustainability Annex.

When a Sub-Fund complies with the CTB exclusions this has been disclosed in the Index methodology section of the relevant Sub-Fund and in the relevant section of the Sustainability Annex.

RISK DESCRIPTIONS

All investments involve risk. The risks of some of these sub-funds may be comparatively high.

The risk descriptions below correspond to the risk factors named in the information about the sub-funds. To permit the risks to be read properly in connection with any sub-fund's named risks, each risk is described as for an individual sub-fund.

The risk information in this prospectus is intended to give an idea of the main and material risks associated with each sub-fund, any sub-fund could be affected by other risks in this section as well as risks not named here, and the risk descriptions themselves are not intended as exhaustive.

Any of these risks could cause a sub-fund to lose money, to perform less well than similar investments, to experience high volatility (ups and downs in NAV), or to fail to meet its objective over any period of time.

RISKS OF ORDINARY MARKET CONDITIONS

Risks included in this section are generally present to a material degree in ordinary market conditions, but also tend to be present — and more potent — in unusual market conditions.

Concentration risk To the extent that the sub-fund invests a large portion of its assets in a limited number of industries, sectors, or issuers, or within a limited geographical area, it can be more risky than a fund that invests more broadly. When a sub-fund invests a large portion of its assets in a particular issuer, industry, type of bond, country or region, or in a series of closely interconnected economies, its performance will be more strongly affected by any business, economic, financial, market or political conditions affecting the area of concentration. This can mean both higher volatility and a greater risk of loss.

Country risk - China In China, it is uncertain whether a court would protect the sub-fund's right to securities it may purchase. A sub-fund may invest in Chinese markets via several programs, whose regulations are untested and subject to change. The application and interpretation of such investment regulations are relatively untested and there is no certainty as to how they will be applied and there is no precedent or certainty as to how the wide discretion of the PRC authorities and regulators may be exercised now or in the future.

For investment in China equities, a sub-fund may invest via the Stock Connect (Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect) or other programs. Stock Connect is a new trading program that links stock markets in China and Hong Kong and may be subject to additional risk factor. Stock Connect is subject to quota limitations, which may restrict a sub-fund's ability to deal via Stock Connect on a timely basis. The structure of these schemes does not require full accountability of some of its component entities and leaves investors such as the sub-fund with relatively little standing to take legal action in China. In addition, the Security exchanges in China may tax or limit short-swing profits, recall eligible stocks, set maximum trading volumes (at the investor level or at the market level) or may otherwise limit or delay trading.

For investment in China Bonds, a sub-fund may invest via a direct access to the China Interbank Bond Market (CIBM) and the Bond Connect North Bound. Some of the sub-funds may seek exposure to RMB fixed income securities without particular license or quota directly on the CIBM via an onshore bond settlement agent or the Bond Connect North Bound. The CIBM direct access and Bond Connect North Bound are relatively new rules and regulations. Certain restrictions may be imposed by the authorities on investors participating in the CIBM Direct Access and/or bond settlement agent and/or the Bond Connect North Bound and/or sub-custody which may have an adverse effect on the Sub-Fund's liquidity and performance.

Credit risk A bond or money market security could lose value if the issuer's financial health deteriorates.

If the financial health of the issuer of a bond or money market security weakens, or if the market believes it may weaken, the value of the bond or money market security may fall. The lower the credit quality of the debt, the greater the credit risk.

In some cases an individual issuer could go into default (see "Default risk" under "Risks of Unusual Market Conditions"), even though ordinary conditions prevail in the general market.

Currency risk Changes in currency exchange rates could reduce investment gains or increase investment losses, in some cases significantly. Exchange rates can change rapidly and unpredictably. Therefore investors are exposed to the currency exchange risk between the currencies of either the underlying securities forming the index or the sub-fund portfolio (as relevant) and the currency of the sub-fund share in which they invested.

The currency risk could extend to 100% of the sub-fund.

Collateral management Counterparty risk arising from investments in OTC financial derivative instruments and securities lending transactions and repurchase agreements is generally mitigated by the transfer or pledge of collateral in favour of the relevant Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Sub-Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

A Sub-Fund may also incur a loss in reinvesting cash collateral received, where permitted. Such a loss may arise due to a decline in the value of the investments made. A decline in the value of such investments would reduce the amount of collateral available to be returned by the Sub-Fund to the counterparty as required by the terms of the transaction. The Sub-Fund would be required to cover the difference in value between the collateral originally received and the amount available to be returned to the counterparty, thereby resulting in a loss to the Sub-Fund.

Custody risk The SICAV's securities are generally held for the benefit of the SICAV's shareholders on the depositary or its sub-depositary's balance sheet and are generally not co-mingled with the depositary or the sub-depositary's assets. This provides protection for the SICAV's securities in the event of the insolvency of either the depositary or its sub-depositary.

However, in certain markets a risk may arise where segregation is not possible, and the securities are co-mingled with the sub-depositary's assets or pooled with the securities of other clients of the sub-depositary. The loss would then be spread across all clients in the pool and would not be restricted to the client whose securities were subject to loss.

Derivatives risk Certain derivatives could behave unexpectedly or could expose the sub-fund to losses that are significantly greater than the cost of the derivative.

Derivatives in general are highly volatile and do not carry any voting rights. The pricing and volatility of many derivatives (especially credit default swaps) may diverge from strictly reflecting the pricing or volatility of their underlying reference(s). In difficult market conditions, it may be impossible or unfeasible to place orders that would limit or offset the market exposure or losses created by certain derivatives.

A sub-fund may gain limited exposure (through, including but not limited to, derivatives and shares or units of other collective investment schemes) to issuers with exposures which may not comply with socially responsible investment ("SRI") requirements and/or ESG criteria applied by the index provider. There may be potential inconsistencies in the ESG criteria or the ESG ratings applied by the underlying collective investment schemes invested in by a sub-fund.

Fixed maturity risk

Given their Objectives, sub-funds with fixed maturity are designed for Investors who understand the nature and specific risks associated with fixed maturity products and plan to invest until the maturity date. A subscription in these sub-funds during the final year of their respective terms may not be suitable, as the bonds included in their respective indices will progressively reach their respective maturity throughout the final year of their respective terms.

Sub-funds with fixed maturity are invested in bonds with a defined maturity date. On the maturity date of the sub-funds and unless decided otherwise by the Board, the shareholders of shares in sub-funds with fixed maturity may have their shares redeemed without further notice or shareholder approval. In this case, payment of redemption proceeds will be paid to such shareholders on or around the maturity date. Additionally, these sub-funds may be terminated at or around the maturity date.

The UCITS ETF share classes of sub-funds with fixed maturity will also be delisted from all relevant stock exchanges on or around the maturity date (subject to individual stock exchange requirements).

The sub-funds with fixed maturity do not seek to return any predetermined amount at maturity or in periodic distributions and should not therefore be regarded as a liability driven investment solution.

Throughout the term of a sub-fund with fixed maturity, such sub-funds will provide investment exposure to bonds which have a decreasing term to maturity. As the bonds approach maturity, their price will generally move closer to their face value and this will impact the net asset value of this sub-fund. If a bond is trading above face value, its price will come down as it approaches maturity, and vice versa.

In the final 12 months prior to the maturity of a sub-funds with fixed maturity, as the bonds invested in by such sub-fund to track its Index mature, this sub-fund will receive an increasing amount of cash from the maturing bonds (subject to any issuer default).

In accordance with the applicable Index methodology, a sub-fund with fixed maturity will invest the cash in instruments with a remaining time to maturity as of each monthly rebalancing date. As a result, the composition and risk and reward profile of this sub-fund at launch will be significantly different to the composition and risk and reward profile of the same sub-fund during the final 12 months prior the maturity date.

Investment in these sub-funds with fixed maturity should not be considered as an alternative to investing in a regular deposit account. Investment in these sub-funds is not insured or guaranteed by the SICAV, the Investment Manager, an affiliate or any government agency. The value of an investment in sub-funds with fixed maturity is capable of fluctuation and an investor may not recover the full amount invested.

Sub-funds with fixed maturity are designed for investors who intend to hold their investment until the relevant maturity date. Whilst aiming to provide a similar return to the return of the Index, sub-funds with fixed maturity offers no such guarantee that this objective will be achieved and investors may suffer a loss of capital. In scenarios where investors wish to redeem their shares prior to the maturity date the loss of capital may be greater. The sub-funds with fixed maturity may also see an enhanced risk in the case that investors representing significant proportions of these sub-funds wish to redeem their shares prior to the maturity date. Given the changing nature of the assets held during the final year of the sub-funds with fixed maturity's, the risks incurred by investors will change over time.

Investors investing the Final Year will not benefit from the yield and/or capital gain as if they were invested over the full period.

Investor Tax Treatment Specific to the sub-funds with fixed maturity

Prospective investors should be aware that the tax treatment applicable under the laws of the jurisdiction(s) in which they are subject to tax may differ depending on whether they hold their shares in a sub-funds with fixed maturity until such shares are redeemed on the maturity date or they sell their shares on an authorized exchange through a broker and such sale is settled prior to the maturity date.

Index Calculation Risk The Sub-Funds track indices which are determined, calculated and maintained by index sponsors. Index sponsors may experience operational risks that may generate errors in the determination, composition or calculation of the relevant index that Sub-Funds track, leading to losses in the Sub-Funds' investments or deviation with the index objective as described in the index methodology and the Sub-Funds' description.

• OTC derivatives

Because OTC derivatives are in essence private agreements between a sub-fund and one or more counterparties, they are less highly regulated than market-traded securities. OTC derivatives carry greater counterparty risk and liquidity risk, and it may be more difficult to force a counterparty to honor its obligations to a sub-fund. The list of counterparties contracts will be available in the annual report. This counterparty default risk is limited by the regulatory OTC derivatives counterparty limits. Mitigation techniques aiming to limit this risk are used, such as collateral policy or resets in OTC Swaps.

If a counterparty ceases to offer a derivative that the sub-fund had been planning on using, the sub-fund may not be able to find a comparable derivative elsewhere and may miss an opportunity for gain or find itself unexpectedly exposed to risks or losses, including losses from a derivative position for which it was unable to buy an offsetting derivative. There are no assurances that the value of collateral held will be sufficient to cover the amount owed to the SICAV. The management company will apply a haircut on any collateral received, in order to mitigate this counterparty risk. The SICAV may enter into OTC derivatives cleared through a clearinghouse that serves as a central counterparty to reduce counterparty risk and increase liquidity, but it does not eliminate those risks completely. The central counterparty requires margin from the clearing broker which will in turn require margin from the SICAV. There is a risk of loss by a SICAV of its initial and variation margin deposits.

Certain eligible OTC derivatives may be submitted for clearing to regulated central clearing counterparties and the reporting of certain details to trade repositories and appropriate procedures and arrangements to measure, monitor and mitigate operational and counterparty risk may be taken in respect of OTC derivatives which are not subject to mandatory clearing. Some of the regulatory obligations have not been finalised by the date of this prospectus. It is difficult to predict their full impact on the SICAV, which may include an increase in the overall costs of entering into and maintaining OTC derivatives.

You should be aware that the applicable laws requiring central clearing of OTC derivatives may in due course adversely affect the ability of the sub-funds to adhere to their respective investment policies and achieve their investment objective.

Investments in OTC derivatives may also be subject the risk of differing valuations arising out of different permitted valuation methods. Inaccurate valuation can result in inaccurate recognition of gains or losses and counterparty exposure. There also may be a legal or documentation risk that the parties may disagree as to the proper interpretation of the terms of the agreement. Such risks are generally mitigated by the use of industry-standard agreements.

Because it is generally impractical for the SICAV to divide its OTC derivative transactions among a wide variety of counterparties, a decline in the financial health of any one counterparty could cause significant losses. Conversely, if any sub-fund experiences any financial weakness or fails to meet an obligation, counterparties could become unwilling to do business with the SICAV, which could leave the SICAV unable to operate efficiently and competitively.

• Exchange-traded derivatives

While exchange-traded derivatives are generally considered lower-risk than OTC derivatives, there is still the risk that a suspension of trading in derivatives or in their underlying assets could make it impossible for the sub-fund to realise gains or avoid losses, which in turn could cause a delay in handling redemptions of shares. There is also a risk that settlement of exchange-traded derivatives through a transfer system may not happen when or as expected.

Emerging markets risk Emerging markets are less established than developed markets and therefore involve higher risks, particularly market, liquidity, currency risks and interest rate risks, and the risk of higher volatility. Reasons for this higher risk include:

- political, economic, or social instability
- fiscal mismanagement or inflationary policies
- unfavorable changes in regulations and laws and uncertainty about their interpretation
- failure to enforce laws or regulations, or to recognise the rights of investors as understood in developed markets
- excessive fees, trading costs or taxation, or outright seizure of assets
- rules or practices that place outside investors at a disadvantage
- incomplete, misleading, or inaccurate information about securities issuers
- lack of uniform accounting, auditing and financial reporting standards
- manipulation of market prices by large investors
- arbitrary delays and market closures
- fraud, corruption and error.

Emerging markets countries may restrict securities ownership by outsiders or may have less regulated custody practices, leaving the sub-fund more vulnerable to losses and less able to pursue recourse.

In countries where, either because of regulations or for efficiency, the sub-fund uses depository receipts (tradable certificates issued by the actual owner of the underlying securities), P-notes or similar instruments to gain investment exposure, the sub-fund takes on risks that are not present with direct investment. These instruments involve counterparty risk (since they depend on the creditworthiness of the issuer) and liquidity risk, may trade at prices that are below the value of their underlying securities, and may fail to pass along to the sub-fund some of the rights (such as voting rights) it would have if it owned the underlying securities directly.

To the extent that emerging markets are in different time zones from Luxembourg, the sub-fund might not be able to react in a timely fashion to price movements that occur during hours when the sub-fund is not open for business.

For purposes of risk, the category of emerging markets includes markets that are less developed, such as most countries in Asia, Africa, South America and Eastern Europe, as well as countries that have successful economies but may not offer the same level of investor protection as exists in, for example, Western Europe, the US and Japan.

Equity risk Equities can lose value rapidly and can remain at low prices indefinitely and typically involve higher risks than bonds or money market instruments. Equities of rapidly grown companies can be highly sensitive to bad news, because much of their value is based on high expectations for the future. Equities of companies that appear to be priced below their value may continue to be undervalued.

If a company goes through bankruptcy or a similar financial restructuring, its equities may lose most or all of their value.

Hedging risk Any attempts to hedge (reduce or eliminate certain risks) may not work as intended, and to the extent that they do work, they will generally eliminate potentials for gain along with risks of loss.

Any measures that the sub-fund takes that are designed to offset specific risks may work imperfectly, may not be feasible at times, or may fail completely. To the extent that no hedge exists, the sub-fund or share class will be exposed to all risks that the hedge would have protected against.

The sub-fund may use hedging within its portfolio. With respect to any designated share classes, the sub-fund may hedge the currency exposure of the class (relative to the portfolio's reference currency or relative to the currency exposure(s) of the relevant sub-fund portfolio.). Hedging involves costs, which reduce investment performance.

Illiquid securities risk Certain securities may, by nature, be hard to value or sell at a desired time and price, especially in any quantity.

This includes securities that are labeled as illiquid, such as Rule 144A securities, as well as a security of any type that represents a small issue, trades infrequently, or is traded on markets that are comparatively small or that have long settlement times.

Investment fund risk As with any investment fund, investing in the sub-fund involves certain risks an investor would not face if investing in markets directly:

- the actions of other investors, in particular sudden large outflows of cash, could interfere with orderly management of the sub-fund and cause its NAV to fall
- The investor cannot direct or influence how money is invested while it is in the sub-fund
- the sub-fund's buying and selling of investments may not be optimal for the tax efficiency of any given investor
- the sub-fund is subject to various investment laws and regulations that limit the use of certain securities and investment techniques that might improve performance; to the extent that the sub-fund decides to register in jurisdictions that impose narrower limits, this decision could further limit its investment activities
- because the sub-fund is based in Luxembourg, any protections that would have been provided by other regulators (including, for investors outside Luxembourg, those of their home regulator) may not apply
- because certain sub-fund shares are exchanged on the primary market or are not publicly traded, the only option for liquidating shares is generally redemption, which could be subject to delays and any other redemption policies set by the sub-fund
- to the extent that the sub-fund invests in other UCITS / UCIs, it may incur a second layer of investment fees, which will further erode any investment gains
- to the extent that the sub-fund uses efficient portfolio management techniques, such as securities lending, securities borrowing, repurchase transactions and reverse repurchase transactions as well as TRS, and in particular if it reinvests collateral associated with these techniques, the sub-fund takes on counterparty, liquidity, legal, custody (e.g. absence of the assets' segregation) and operational risks, which can have an impact on the performance of the sub-fund concerned. To the extent that related parties (companies of the same group as the management company or as the investment manager or as the sub-investment manager) may intervene as either counterparty or agent (or in any other role...) in efficient portfolio management operations, and in particular in securities' lending operations, a potential conflict of interest risk may arise. The Management Company is responsible for managing any conflict that might arise and avoid that such conflicts negatively impact shareholders. All the revenues arising from repurchase transactions and stock lending transactions shall be returned to the relevant sub-fund following the deduction of any direct and indirect operational costs and fees. Such direct and indirect operational costs and fees, which shall not include hidden revenue, shall include fees and expenses payable to agents or counterparties at normal commercial rates. Amundi group policy for prevention and management of conflicts of interest is available on the website of Amundi (<http://www.amundi.com> or <http://www.amundiETF.com>).
- the investment manager or its designees may at times find their obligations to the sub-fund to be in conflict with their obligations to other investment portfolios they manage (although in such cases, all portfolios will be dealt with equitably).

High Yield risk The high yield debt securities involve special considerations and risks, including the risks associated with international investing generally, such as currency fluctuations, the risks of investing in countries with smaller capital markets, limited liquidity, price volatility and restrictions on foreign investment.

Investment in high yield debt securities is subject to risks of interest rate, currency, market, credit and security. Compared to investment-grade bonds, the high yield bonds are normally lower-rated securities and will usually offer higher yields to compensate for the reduced creditworthiness or increased risk of default that these securities carry.

Interest rate risk When interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment.

Replication of index risk The Sub-Funds track indices that replicate the performance of underlying securities the prices of which change continuously, and can fall based on a wide variety of factors. Due to the Sub-Funds' index-tracking objective, the performance of the Sub-Funds will follow the performance of their specific index whether their performance is rising or falling.

Indirect replication - Implications in terms of exposure to the index and counterparty risk Where the exposure of the sub-fund to the index is indirect (or swap-based) only which means that the sub-fund seeks to replicate the performance of the index by investing into financial derivative instruments rather than by directly holding the index underlying components.

Entering into financial derivative instruments such as a swap agreement will not make the sub-fund a holder of, or give the sub-fund a direct investment position in, any of the index underlying components or any component included therein. The sub-fund will have no rights with respect to the index underlying components.

Therefore any amounts payable in respect of shares in the sub-fund will be made in cash and investors will not have any rights to receive delivery of any index underlying components (see section "Secondary market for UCITS ETF shares").

The sub-fund will be exposed to a credit risk on the counterparties with which it trades in relation to OTC financial derivative instruments used to replicate the performance of the index, such as swap agreements. Such derivatives are not afforded the same protection as may apply to derivatives traded and cleared on exchanges. The counterparty for the OTC derivatives will be the specific company or firm involved in the transaction, rather than a recognized exchange and accordingly the insolvency, bankruptcy or default of a counterparty with which a sub-fund trades such OTC derivative could result in substantial losses to the sub-fund. In addition, in exceptional circumstances, the counterparty for the OTC derivatives may be unable to fulfil its obligations towards the sub-fund due to regulatory reasons, change in the tax or accounting laws or other circumstances. In such cases, there is a risk that the sub-fund's exposure to the index could be interrupted or terminated. The investment objective of the sub-fund may not be achieved and the sub-fund may be unable to recover any losses incurred being understood that there is a daily reset of the swap and a counterparty risk limit of 10%.

Leverage risk The sub-fund's net exposure above the sub-fund net asset value makes its share price more volatile.

To the extent that the sub-fund uses derivatives to increase its net exposure to any market, rate, basket of securities or other financial reference source, fluctuations in the price of the reference source will be amplified at the sub-fund level.

Listing market liquidity risk The UCITS ETF shares' stock market price may deviate from its indicative net asset value. The liquidity of the sub-fund's units in a stock market may be affected by any suspension that could, in particular, but not only, be due to:

- i) the suspension or halt of the calculation of the index by the index provider,
- ii) the suspension of the market(s) on which are listed the underlyings of the index,
- iii) a relevant listing market not being able to obtain or to calculate the sub-fund's indicative net asset value,
- iv) a violation by a market maker of the rules applicable in the relevant listing market,
- v) failure of the systems, in particular of IT or electronic systems in a relevant listing market,
- vi) any other event that prevents the calculation of the sub-fund's indicative net asset value or the trading in Fund units.

Management risk The sub-fund's management team may be wrong in its analysis, assumptions, or projections.

This includes projections concerning industry, market, economic, demographic, or other trends.

Market risk

Prices of many securities change continuously, and can fall based on a wide variety of factors.

Examples of these factors include:

- political and economic news
- government policy
- changes in technology and business practices
- changes in demographics, cultures and populations
- natural or human-caused disasters
- weather and climate patterns
- scientific or investigative discoveries
- costs and availability of energy, commodities and natural resources.

The effects of market risk can be immediate or gradual, short-term or long-term, narrow or broad.

MBS / ABS / TBA risk Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity, credit and interest rate risks.

MBSs (a category that includes collateralised mortgage obligations, or CMOs) and ABSs represent an interest in a pool of debt, such as credit card receivables, auto loans, student loans, equipment leases, home mortgages and home equity loans.

When interest rates fall, these securities are often paid off early, as the mortgage-holders and other borrowers refinance the debt underlying the security.

When interest rates rise, the borrowers of the underlying debt tend not to refinance their low-interest debt.

MBSs and ABSs also tend to be of lower credit quality than many other types of debt securities. To the extent that the debts underlying an MBS or ABS go into default or become uncollectable, the securities based on those debts will lose some or all of their value.

With to-be-announced (TBA) securities, because the sub-fund does not know until 48 hours after it places a purchase order which actual MBSs or ABSs will be used to fill the order, the sub-fund cannot take steps to counter any decline in the value of a specific security during the 48-hour period.

Prepayment and extension risk Any unexpected behaviour in interest rates could hurt the performance of callable debt securities (securities whose issuers have the right to pay off the security's principal before the maturity date).

When interest rates fall, issuers tend to pay off these securities and re-issue new ones at lower interest rates. When this happens, the sub-fund may have no alternative but to reinvest the money from these prepaid securities at a lower rate of interest ("prepayment risk").

At the same time, when interest rates rise, borrowers tend not to prepay their low-interest mortgages. This may lead the sub-fund to receiving below-market yields until interest rates fall or the securities mature ("extension risk"). It can also mean that the sub-fund must either sell the securities at a loss or forgo the opportunity to make other investments that may turn out to have performed better.

The prices and yields of callable securities typically reflect the assumption that they will be paid off at a certain point before maturity. If this prepayment happens when expected, the sub-fund generally will not suffer any adverse effects. However, if it happens substantially earlier or later than expected, it can mean that the sub-fund effectively overpaid for the securities. Other factors as well can affect when or if an individual security is prepaid, including the presence or absence of any optional redemption and mandatory prepayment features, the default rate of the underlying assets and the nature of any turnover in the underlying assets.

Prepayment and extension considerations can also affect the sub-fund's duration, increasing or decreasing sensitivity to interest rates in undesired ways. In some circumstances, the failure of rates to rise or fall when anticipated could cause prepayment or extension risks as well.

Real estate investments risk Real estate and related investments can be hurt by any factor that makes an area or individual property less valuable.

Specifically, investments in real estate holdings or related businesses or securities (including interests in mortgages) can be hurt by natural disasters, economic declines, overbuilding, zoning changes, tax increases, population or lifestyle trends, environmental contamination, defaults on mortgages, failures of management, and other factors that may affect the market value or cash flow of the investment.

Sampling index replication Index replication by investing in a portfolio comprising all the index components might be costly and/or not be always possible or operationally practicable. In some circumstances the sub-fund's Investment Manager may use optimized replication methodology, in particular a sampling index replication strategy. In doing so, the sub-fund's Investment Manager will attempt to replicate the index either by:

- i) investing through a selection of representative transferable securities constituting the benchmark index but potentially with different weighting compared to the index constituents and/or;
- ii) by investing in a portfolio of transferable securities that might not be comprised within this index or other eligible assets as financial derivative instruments.

While the sub-fund will seek to track the performance of the index through a sampling index replication strategy, there is no guarantee that the sub-fund will achieve perfect tracking and the sub-fund may potentially be subject to an increase of the tracking error risk, which is the risk that sub-fund return may not track exactly the return of the index, from time to time. In addition, the use of representative sampling may result in divergence of the sub-fund's overall ESG characteristics or ESG risk from those of the benchmark index.

Small and mid-cap stock risk Stocks of small and mid-size companies can be more volatile than stocks of larger companies.

Small and mid-size companies often have fewer financial resources, shorter operating histories, and less diverse business lines, and as a result can be at greater risk of bankruptcy or other long-term or permanent business setbacks. Initial public offerings (IPOs) can be highly volatile and can be hard to evaluate because of a lack of trading history and relative lack of public information.

Style risk Different investment styles typically go in and out of favor depending on market conditions and investor sentiment.

At any given time, for instance, a growth-style portfolio may underperform a value-style portfolio, or vice-versa, and either may at any time underperform the market as a whole.

Securities identified as undervalued may remain undervalued indefinitely, or may prove to have been fairly valued. With securities identified as offering above-average growth potential, a significant portion of the market price can be based on high expectations for future performance, and the price can fall rapidly and significantly if it begins to appear that these high expectations might not be met.

Sustainable investment risk

The Management Company considers the PAIs of the investments on Sustainability factors when selecting the benchmark index the performance of which is replicated.

As indicated in each sub-funds' descriptions certain sub-funds are established with either (i) investment policies that seek to promote environmental and social characteristics or (ii) a reduction of carbon emissions objective. For these sub-funds the relevant Investment Manager excludes securities in accordance with the Management Company's exclusion list as described in the Responsible Investment Policy described above.

Certain sub-funds and replicated indices may have an investment universe that focuses on companies that meet specific criteria including ESG scores and relate to certain sustainable development themes and demonstrate adherence to environmental, social and corporate governance practices. Accordingly, the universe of such sub-funds and indices may be smaller than that of other sub-funds and indices. Investors should note that the benchmark index solely relies on analysis from the benchmark index administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the SICAV, nor any of its service providers or the Management Company or Investment Managers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the benchmark index administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the benchmark index and therefore the portfolio of the sub-fund.

It should also be noted that analysis of companies' ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

Such sub-funds and indices may (i) underperform the market as a whole if such investments underperform the market and/or (ii) underperform relative to their parent index or to the index eligible universe that do not utilize ESG criteria and/or could cause the sub-fund to sell for ESG related concerns investments that both are performing and subsequently perform well.

Exclusion or disposal of securities of issuers that do not meet certain ESG criteria from the index methodology or sub-fund's investment universe may cause the index and the sub-fund to perform differently compared to similar indices and funds that do not have such a Responsible Investment Policy or ESG component in their index methodology and that do not apply ESG screening criteria when selecting investments.

Sub-funds will vote proxies in a manner that is consistent with the relevant ESG exclusionary criteria, which may not always be consistent with maximizing the short-term performance of the relevant issuer. Further information relating to Amundi's ESG voting policy may be found at www.amundi.com.

The selection of assets may rely on a proprietary ESG scoring process (such as the index provider's) that relies partially or totally on third party data. Data provided by third parties may be incomplete, inaccurate or unavailable and as a result, there is a risk that the Investment Manager may incorrectly assess a security or issuer.

Sustainability risk an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

Risks related to environmental issues includes, but is not limited to, climate risk, both physical and transition risk. Physical risk arises from the physical effects of climate change, acute or chronic. For example, frequent and severe climate-related events can impact products and services and supply chains. Transition risk whether policy, technology, market or reputation risk arises from the adjustment to a low-carbon economy in order to mitigate climate change.

Risks related to social issues can include but are not limited to human rights, health and safety, inequality, integration and labour rights.

Risks related to governance related risks can include but are not limited to risks around significant and recurring breaches of international agreements, corruption, board independence, ownership & control, or audit & tax management.

These risks can impact an issuer's operational effectiveness and resilience as well as its public perception, and reputation affecting its profitability and in turn, its capital growth, and ultimately impacting the value of the components of the index tracked by the Sub-Fund.

Sustainability data risk

The index provider evaluates securities for inclusion and/or weighting in the benchmark index based on ESG criteria and data provided by the index provider or third parties. The index provider's evaluation of securities' ESG characteristics depends on these criteria and data, which may vary by index provider, and no assurance can be given that they will be complete, accurate or current. The management company makes no representation as to the validity and accuracy of the index provider's evaluation of the ESG characteristics of securities or the criteria and data used in such evaluation.

While index providers of the benchmark indices of the sub-funds provide descriptions of what each benchmark index is designed to achieve, index providers do not generally provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in respect of their benchmark indices or in their index methodology documents, nor any guarantee that the published indices will be in line with their described benchmark index methodologies. Errors in respect of the quality, accuracy and completeness of the data may occur from time to time and may not be identified and corrected for a period of time, in particular where the indices are less commonly used. The impacts of Sustainability risk are likely to develop over time and new Sustainability risks may be identified as further data and information become available.

Risk linked to regulatory changes regarding the definition of ESG criteria

Regulatory changes or interpretations regarding the definitions and/or use of ESG criteria could have a material adverse effect on the sub-fund's ability to invest in accordance with its investment policies, as well as the ability of certain classes of investors to invest in sub-funds following an ESG strategy such as the sub-fund.

Risk of divergence with the investors' criteria on minimum ESG standards

Investors may differ in their interpretations of what constitutes positive or negative ESG characteristics of a company, an instrument or Sub-Fund. Neither the SICAV, nor an instrument or portfolio, makes any representation or otherwise as to the suitability of the benchmark index and the sub-fund in meeting an investor's criteria on minimum ESG standards or otherwise. Investors are advised to carry out their own review as to whether the benchmark index and the sub-fund accords with their own ESG criteria.

Risk related to ESG categorisations or country labels

Certain sub-funds have adopted or obtained ESG categorisations (for example under SFDR or the French AMF rules) or country labels (for example Belgian Febelfin or French SRI). Where such sub-funds track a benchmark index and they cease to meet the requirements of their ESG categorisations or labels, it is intended that they will be brought back in line with their respective benchmark indices on or around the next index rebalancing. At such point, the sub-funds will be rebalanced in line with their respective benchmark indices, subject to any restrictions applicable to the sub-funds as a result of their ESG categorisations or country labels but not applied by the index provider to their benchmark indices (whether due to such restrictions not being part of the index methodology or by error).

If a sub-fund must not hold a security of its benchmark index to comply with a restriction as a result of its ESG categorisation or country label which is not met by its benchmark index, this could increase the tracking difference and the Tracking Error of the sub-fund. Such increase could be made worse by market volatility. There may be conditions from time to time in which an index provider finds that it is not possible to rebalance a benchmark index to meet, on an optimal basis, all the ESG and non-ESG targets of the benchmark index at the same time and the index provider may choose to relax certain ESG or non-ESG targets based on its rules in order to carry out that rebalancing. If this happens, it will in turn impact the performance of the sub-fund tracking such benchmark index at such rebalancing.

Rules and standards for ESG categorisations and labels are constantly evolving. As such rules evolve over time, they may become stricter and may diverge from the index methodologies and the investment objectives, policies or strategies of the sub-funds and may even conflict with each other. It may not be possible or practicable for a sub-fund to continue to comply with the changing rules while maintaining its existing investment objective, policy and strategy or it may not be in the best interest of the sub-fund and its shareholders as a whole to do so. In such situations, the sub-fund may cease to hold certain ESG categorisations or labels after the expiry of the period given to remain compliant with the applicable rules for the ESG categorisations or labels.

Risk related to index reviews or rebalancing

The index provider may evaluate security-level ESG data (including ratings) and, if applicable, ESG objectives or constraints that are relevant to the benchmark index only at index reviews or rebalancing. Securities included in the benchmark index may cease to meet the relevant ESG criteria but may nevertheless remain in the benchmark index and the sub-fund until the next review or rebalance by the index provider. As a result, certain securities in the benchmark index, or the benchmark index as a whole, may not meet the relevant ESG objectives or constraints at all times. If the ESG assessment of a security in the benchmark index or the sub-fund changes, neither the sub-fund nor the Management Company accepts any liability in relation to such change.

The Management Company does not monitor securities in the benchmark index with respect to ESG objectives or constraints applied by the index provider and is not responsible for changes to the ESG assessment of a security in the benchmark index between rebalances.

Risk linked to ESG methodologies

Indices with an Environmental, Social and Governance ("ESG") component are usually using a best in class approach or an ESG rating improvement approach. Both approaches are relative to an investment universe. It may occur however that companies with low ESG rating may be included in the index composition and that the overall ESG scoring of the index would be lower than the overall ESG rating of a non-ESG index based on a different investment universe.

Due to the ESG criteria being applied to the relevant parent index / investment universe in order to determine eligibility for inclusion in the relevant benchmark index, the benchmark index will comprise a narrower universe of securities compared to the parent index / investment universe and securities of the benchmark index are also likely to have different Global Industry Classification Standard (GICS®) sector weightings and factor weightings compared to the parent index / investment universe.

The impacts of risks related to ESG investing are likely to change over time, and new sustainability risks & factors may be identified as further data and information regarding ESG factors and impacts become available. In addition, methodologies for ESG investing continue to develop, and the ESG methodology applied by the benchmark index administrator may change over time.

Investors should note that the determination that a sub-fund is subject to the disclosure requirements of a financial product under Article 8 of SFDR is made solely on the basis that the benchmark index promotes environmental and social characteristics. The SICAV is solely relying on the activities conducted by and information provided by the benchmark index administrator or other data providers (as applicable) to make this determination.

Risk related to ESG Score computation

It should be noted that most ESG scores and ratings are not defined in absolute terms, but in relative terms, comparing a company to a peer group. As a result, companies generally perceived by the market as having mediocre ESG practices could be potentially well rated if the other companies of their peer group had lower standards than theirs in terms of ESG practices. Companies' ESG score is computed by an ESG rating agency based on raw data, models and estimates which are collected/computed according to methods specific to each player. Most of them use a variety of information vectors and channels: questionnaires sent to companies, use of information published by the entities concerned by the data or by trusted third parties (press agencies, nongovernmental agencies), use of data produced by other suppliers of the sector through subscriptions or partnerships. The information collected may be supplemented, specified or corrected through discussions with the companies to which the data pertains. Rating agencies publish guidance on their methodology and provide additional information on request. However, there is a lack of standardization, and since the methodologies are proprietary, the information provided can be incomplete, especially with regard to the precise description of the variables used in calculating the scores, the processing of data gaps and the weighting of the various variables and components of the score as well as the calculation methods. There may also be a time lag between the date as at which the data is captured and the date on which the data is used, which may impact the timeliness and quality of the data.

None of the sub-fund, the SICAV, the Manager nor the Investment Manager makes any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of the benchmark index provider's information/data providers, ESG ratings, screening criteria or the way they are implemented. In the event that the status of a security previously deemed eligible for inclusion in the benchmark index should change, none of the sub-fund, the SICAV, the manager nor the Investment Manager accepts liability in relation to such change.

Use of techniques and instruments:

Securities lending risk Loaned securities may not be returned or returned in a timely manner in the event of a default, bankruptcy or insolvency of the borrower, and rights to the collateral may be lost if the lending agent defaults. Should the borrower of securities fail to return securities lent by a sub-fund, there is a risk that the collateral received may be realised at a value lower than the value of the securities lent out, whether due to inaccurate pricing of the collateral, adverse market movements in the value of the collateral, a deterioration in the credit rating of the issuer of the collateral, or the illiquidity of the market in which the collateral is traded. As a sub-fund may reinvest the cash collateral received from borrowers. Reinvestment of the cash collateral received in connection with securities lending transactions involves risks associated with the type of investments made and the risk that the value on return of the reinvested cash collateral may decline below the amount owed to the counterparties, and may create a leverage effect which will be taken into account for the calculation of the Fund's global exposure. Delays in the return of securities on loan may restrict the ability of the sub-fund to meet delivery obligations under security sales or payment obligations arising from redemption requests. Securities lending also carries operational risks such as the non-settlement of instructions associated with securities lending. Such operational risks are managed by means of procedures, controls and systems implemented by the securities lending agent and the Management Company. The use of securities lending transactions also involves legal risks. The characterization of a transaction or a party's legal capacity to enter into it could render the financial contract unenforceable and the insolvency or bankruptcy of a counterparty could pre-empt otherwise enforceable contract rights. The use of securities lending transactions also involves operational risk, i.e. the risk of losses due to errors, service disruptions or other failures, as well as fraud, corruption, electronic crime, instability, terrorism or other irregular events in the settlement and accounting process. A sub-fund entering into securities lending transactions may also be exposed to custody risk, i.e. the risk of loss on assets held in custody in the event of a custodian's (or sub-custodian's) insolvency, negligence, fraud, poor administration or inadequate recordkeeping. In addition, a sub-fund that engages in securities lending may receive collateral which may not comply with the sustainability requirements and/or ESG criteria applied by the index provider.

Volatility risk Changes in the volatility patterns of relevant markets could create sudden and/or material changes in the sub-fund's share price.

RISKS OF UNUSUAL MARKET CONDITIONS

Risks included in this section are generally not present to a material degree in normal market conditions (although they may be present to a limited degree). During unusual market conditions, however, these risks can be among the most serious.

Counterparty risk An entity with which the sub-fund does business (e.g. entering into OTC derivative agreements or efficient portfolio management techniques such as repurchase or securities lending transactions) could become unwilling or unable to meet its obligations to the sub-fund.

Default risk The issuers of certain bonds could become unable to make payments on their bonds.

Liquidity risk Any security could become hard to value or to sell at a desired time and price.

Liquidity risk could affect the sub-fund's ability to repay repurchase proceeds by the deadline stated in the prospectus.

Legal risk The use of efficient portfolio management techniques and financial derivative instruments involves legal risks. The characterization of a transaction or a party's legal capacity to enter into it could render the financial contract unenforceable and the insolvency or bankruptcy of a counterparty could pre-empt otherwise enforceable contract rights.

Operational risk In any country, but especially in emerging markets, there could be losses due to errors, absence or impossibility of the assets' segregation, service disruptions or other failures, as well as fraud, corruption, electronic crime, instability, terrorism or other irregular events. Operational risks may subject the sub-fund to errors affecting valuation, pricing, accounting, tax reporting, financial reporting, and trading, among other things. Operational risks may go undetected for long periods of time, and even if they are detected it may prove impractical to recover prompt or adequate compensation from those responsible.

Standard practices risk Investment management practices that have worked well in normal market conditions could prove ineffective or detrimental at other times.

GENERAL INVESTMENT POLICIES

Each sub-fund, and the SICAV itself, must comply with all applicable EU and Luxembourg laws and regulations, as well as certain circulars, technical standards and other requirements. This section presents, in synthesised form, the portfolio management requirements of the 2010 law, the main law governing the operation of a UCITS, as well as the ESMA requirements for risk monitoring and management. In case of any discrepancy the law itself (which is in French) would prevail.

In the case of any detected violation of the 2010 law, the appropriate sub-fund(s) must comply with the relevant policies a priority in its securities trades and management decisions, taking due account of the interests of its shareholders. Except where noted, all percentages and restrictions apply to each sub-fund individually.

PERMITTED SECURITIES AND TRANSACTIONS

The table below describes the types of securities and transactions that are allowable to any UCITS under the 2010 law. Most sub-funds set limits that are more restrictive in one way or another, based on their investment objectives and strategy. No sub-fund will make use of the investments described in Rows 6 and 9 except as described in "sub-fund Descriptions". A sub-fund's usage of a security or technique must be consistent with its investment policies and restrictions. A sub-fund that invests or is marketed in jurisdictions outside the EU may be subject to further requirements (not described here) from regulators in those jurisdictions.

A sub-fund does not need to comply with investment limits when exercising subscription rights, so long as any violations are corrected as described above. No sub-fund can acquire assets that come with unlimited liability attached, and no sub-fund can underwrite securities of other issuers.

Except for situations of exceptionally unfavourable market conditions where a temporary breach of the 20% limit is required by the circumstances and justified having regard to the interests of the shareholders, sub-funds of the Company may hold up to 20% of their net assets in bank deposits at sight that are accessible at any time, in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions.

Security / Transaction	Requirements	
1. Transferable securities and money market instruments	Must be listed or dealt on an official stock exchange in an eligible state, or must trade in a regulated market in an eligible state that operates regularly, is recognised, and is open to the public.	Recently issued securities must pledge to seek a listing on a stock exchange or regulated market in an eligible state and must receive it within 12 months of issue.
2. Money market instruments that do not meet the requirements in row ⁽¹⁾	Must be subject (either at the securities level or the issuer level) to investor protection and savings regulation and also must meet one of the following criteria: - issued or guaranteed by a central, regional or local authority or a central bank of a EU member, the European Central Bank, the European Investment Bank, the EU, an international authority to which at least one EU nation belongs, a sovereign nation, or in the case of a federation, a federal state; - issued by an issuer or undertaking whose securities qualify under row 1 above; - issued or guaranteed by an issuer that is subject to EU prudential supervision rules or to other prudential rules the CSSF accepts as equivalent.	Can also qualify if issuer belongs to a category recognised by the CSSF, is subject to investor protections that are equivalent to those described directly at left, and meets one of the following criteria: - issued by a company with at least EUR 10 million in capital and reserves that publishes annual account; - issued by an entity dedicated to financing a group of companies at least one of which is publicly listed; - issued by an entity dedicated to financing securitisation vehicles that benefit from a banking liquidity line.
3. Shares of UCITS or UCIs that are not linked to the SICAV	Must be authorised by an EU member or by a state that the CSSF considers to have equivalent laws and adequate cooperation between authorities. Must issue annual and semi-annual financial reports. Must be limited by constitutional documents to investing no more than 10% of assets in other UCITS or UCIs.	Must be subject either to EU regulatory supervision and investor protections for a UCITS or to equivalent of those outside the EU (especially regarding asset segregation, borrowing, lending, and uncovered sales of transferable securities and money market instruments).
4. Shares of UCITS or UCIs that are linked to the SICAV	Must meet all requirements in row 3. The UCITS/UCI cannot impose any charges for buying, switching or redeeming shares.	The prospectus of any sub-fund with substantial investments in other UCITS/UCIs must state maximum management fees for the sub-fund itself and for UCITS/ UCIs it intends to hold.
5. Shares of other sub-funds of the SICAV	Must meet all requirements in rows 3 and 4. The target sub-fund cannot invest, in turn, in the acquiring sub-fund (reciprocal ownership).	The acquiring sub-fund surrenders all voting rights in shares it acquires. The shares do not count as assets of the acquiring

¹ A UCITS/UCI is considered to be linked to the SICAV if both are managed or controlled by the same or affiliated management companies, or if the SICAV directly or indirectly holds more than 10% of capital or voting rights of the UCITS/UCI

	At the time of investment, the target sub-fund must not have more than 10% of its assets in any other sub-fund.	sub-fund for purposes of minimum asset thresholds. Adhering to these requirements exempts the SICAV from the requirements of the Law of 10 August 1915.
6. Real estate and commodities, including precious metals	Investment exposure is allowed only through transferable securities, derivatives, or other allowable types of investments.	The SICAV may directly purchase real estate or other tangible property that is directly necessary to its business. Ownership of precious metals or commodities, directly or through certificates, is prohibited.
7. Credit institution deposits	Must be able to be withdrawn on demand and must not have a maturity longer than 12 months.	Institutions either must be headquartered in a EU Member State or, if not, subject to EU prudential rules or to other prudential rules the CSSF accepts as equivalent.
8. Ancillary liquid assets	Bank deposits at sight that are accessible at any time	
9. Derivatives and equivalent cash-settled instruments	Underlying investments or reference indicators must be those described in rows 1, 2, 3, 4, 6 and 7, or must be indices, interest rates, forex rates or currencies. In all cases, these investments or indicators, and any investments they deliver, must be within scope for the sub-fund's non-derivative investments. Total exposure cannot exceed 100% of sub-fund assets.	OTC derivatives must meet all of the following criteria: • be in categories approved by the CSSF; • have reliable daily valuations that are accurate and independent; • be able to be sold, liquidated or otherwise closed at fair value at any time; • be with counterparties that are subject to prudential supervision; • have risk profiles that can adequately be measured • counterparty risk cannot exceed 10% of the sub-fund assets when the counterpart is a credit institution or 5% with other counterparties.
10. Transferable securities and money market instruments that do not meet the requirements in rows 1, 2, 6 and 7	Limited to 10% of sub-fund assets.	
11. Securities lending and borrowing, repurchase agreements and reverse repurchase agreements	The volume of transactions must not interfere with a sub-fund's pursuit of its investment policy or its ability to meet redemptions.	The cash collateral from the transactions must be invested in high-quality, short term investments. Lending or guaranteeing loans to third parties for any other purposes is prohibited.
12. Techniques and instruments for efficient portfolio management	Must relate to transferable securities or money market instruments.	This category includes derivatives. See "More about Derivatives and Techniques" below.
13. Borrowing	Except for back-to-back loans used for acquiring foreign currencies, all loans must be temporary and are limited to 10% of sub-fund's net assets.	

DIVERSIFICATION REQUIREMENTS

To ensure diversification, a sub-fund cannot invest more than a certain amount of its assets in one body or one category of securities. For purposes of this table and the next, "body" means an individual company, except for the 20% limits in the "In aggregate" column, which are monitored at the group or consolidated level. These diversification rules do not apply during the first six months of a sub-fund's operation.

Maximum investment/exposure, as a % of sub-fund assets			
Category of securities	In any one Issuer	In aggregate	other
A. Transferable securities and money market instruments issued or guaranteed by an any nation, a public local authority within the EU, or an international body to which at least one EU member belongs.	35%	35%	A sub-fund may invest in as few as six issues if it is investing in accordance with the principle of risk spreading and meets both of the following criteria: 1. the issues are transferable securities or money market instruments issued or guaranteed a sovereign entity, a public local authority within the EU or an international body to which at least one EU member belongs; 2. the sub-fund invests no more than 30% in any one issue
B. Covered Bonds* and bonds issued before 8 July 2022 subject to certain legally defined investor protections** and issued by a credit institution domiciled in the EU.	25%		
C. Any transferable securities and money market instruments other than those described in rows A and B above.	10%	20%	20% in all companies within a single issuer. 40%, in aggregate, in all issuers or bodies in which a sub-fund has invested more than 5% of its assets.
D. Credit institution deposits.	20%		
E. OTC derivatives with a counterparty that is a credit institution as defined in row 7 (previous table).	10% exposure		
F. OTC derivatives with any other counterparty.	5% exposure	10%	UCI compartments whose assets are segregated are each considered a separate UCI. Assets held by the UCITS/UCIs do not count for purposes of complying with rows A - F of this table.
G. Units of UCITS or UCIs as defined in rows 3 and 4 (previous table).	20%		

* Bonds that fall under the definition of covered bonds in point (1) of Article 3 of Directive (EU) 2019/2162 of the European Parliament and of the Council of 27 November 2019 on the issue of covered bonds and covered bond public supervision

** Bonds must invest the proceeds from their offerings to maintain full liability coverage and to give priority to bond investor repayment in case of issuer bankruptcy

INDEX TRACKING FUNDS

Components	Maximum Index weighting		
	In any one Component	In one single component only	Other terms and requirements
A. Transferable securities and money market instruments as defined in rows 1 and 2 of the permitted securities and transactions table	20%	Up to 35% in exceptional circumstances such as when the security is highly dominant in the regulated market in which it trades.	
B. Units of UCITS or UCI			
C. Derivatives (OTC or dealt-in on a regulated market)			
D. Other than article 41(1) of 2010 Law eligible assets			

Factors that may influence the ability of the sub-funds to track the performance of the indices:

The ability of the sub-fund to track the performance of the index may be affected by the following factors:

the re-weightings of the index which is tracked by the sub-fund may generate transaction and/or trading and/or stamp duty costs;
the existence of market fees;
and/or due to minor valuation discrepancies that would not be such as to result in the calculation of the sub-fund's net asset value being suspended. These discrepancies may be due to some commodities being temporarily unavailable in index or to exceptional circumstances that may have caused distortions in the index weightings, including cases of suspension or temporary disruption in the listing of securities in the index.

LIMITS TO PREVENT SIGNIFICANT INFLUENCE

These limits, which apply at the SICAV level, are intended to prevent the SICAV from the risks that could arise for it and the issuer if the SICAV were to own a significant percentage of a given security or issuer.

Category of securities	Maximum ownership, as a % of the total value of the securities issue	
Securities carrying voting rights	Less than would allow the SICAV significant management influence	
Non-voting securities of any one Issuer	10%	These limits can be disregarded at purchase if not calculable at that time - securities described in row A (previous table) - shares of EU funds that represent the only way a sub-fund can invest in the EU fund's home country and that comply with the applicable articles of the 2010 Law
Debt securities of any one issuer	10%	
Money market securities of any one issuer	10%	
Shares of any one UCITS or UCI	25%	

FEEDER FUNDS

The SICAV can create sub-funds that qualify as a master fund or a feeder fund. It can also convert existing sub-funds into feeder funds, or switch any feeder fund to a different master fund. The rules below apply to any sub-fund that is a feeder fund.

Security	Investment Requirements	Other Terms and Requirements
Units of the master fund	At least 85% of assets.	
Derivatives and ancillary liquid assets	Up to 15% of assets.	Derivatives must only be used for hedging. In measuring derivatives exposure, the sub-fund must combine its own direct exposure with the exposure created by the master fund.

The master fund and feeder fund must have the same Business Days, share valuation days and financial year. The cut-off times for order processing must be coordinated so that orders for shares of the feeder fund can be processed and the resulting orders for shares of the master fund can be placed before the master fund's cut-off time.

MANAGEMENT AND MONITORING OF GLOBAL RISK EXPOSURE

The management company uses a risk-management process, approved and supervised by its board, that enables it to monitor and measure the overall risk profile of each sub-fund. Risk calculations are performed every Business Day.

There are three possible risk measurement approaches, as described below. The management company chooses which approach each sub-fund will use, based on the sub-fund's investment strategy. Where a sub-fund's use of derivatives is mostly for hedging and efficient portfolio management purposes, the commitment method is usually used. Where a sub-fund may use derivatives extensively, Absolute VaR is usually used, unless the sub-fund is managed with respect to a benchmark, in which case Relative VaR is used.

The board can require a sub-fund to use an additional approach (for reference only, however, not for purposes of determining compliance), and can change the approach if it believes the current method no longer adequately expresses the sub-fund's overall market exposure.

Approach	Description
Absolute Value-at-Risk (Absolute VaR)	The sub-fund seeks to estimate the maximum loss it could experience in a month (meaning 20 Business Days), and requires that 99% of the time, the sub-fund's worst outcome is no worse than a 20% decline in net asset value.
Relative Value-at-Risk (Relative VaR)	The sub-fund seeks to estimate the maximum loss it could experience beyond the estimated maximum loss of a benchmark (typically an appropriate market index or combination of indexes). The sub-fund calculates the amount that, with 99% certainty, is the limit for how much the sub-fund could underperform the benchmark over a month (20 Business Days). The absolute VaR of the sub-fund cannot exceed twice that of the benchmark.
Commitment	The sub-fund calculates all derivatives exposures as if they were direct investments in the underlying positions. This allows the sub-fund to include the effects of any hedging or offsetting positions as well as positions taken for efficient portfolio management. A sub-fund using this approach must ensure that its overall market exposure from derivatives commitments does not exceed 210% of total assets (100% from direct investment, 100% from derivatives and 10% from borrowings).

Any sub-fund that uses the Absolute or Relative VaR approaches must also calculate its expected gross level of leverage, which is stated in "sub-fund Descriptions". Under certain circumstances, gross leverage might exceed this percentage. This percentage of leverage might not reflect adequately the risk profile of the sub-funds and should be read in conjunction with the investment policy and objectives of the sub-funds. Gross leverage is a measure of total derivative usage and is calculated as the sum of the notional exposure of the derivatives used, without any netting that would allow opposite positions to be considered as cancelling each other out. As the calculation neither takes into account whether a particular derivative increases or decreases investment risk, nor takes into account the varying sensitivities of the notional exposure of the derivatives to market movements, this may not be representative of the actual level of investment risk within a sub-fund. The mix of derivatives and the purposes of any derivative's use may vary with market conditions.

For purposes of compliance and risk monitoring, any derivatives embedded in transferable securities or money market instrument count as derivatives, and any exposure to transferable securities or money market instruments gained through derivatives (except for index-based derivatives) counts as investment in those securities or instruments. Derivatives contracts carry significant counterparty risk. Although the sub-funds use various techniques to mitigate exposure to counterparty risk, this risk is still present and could affect investment results. Counterparties used by the SICAV are identified in the annual report.

Replication Methods for passively managed sub-fund

Form of replication		Method of Replication	Diversification (Index and Portfolio)	Additional information
Indirect Replication	Unfunded	In order to gain exposure to the index performance, the sub-fund exchanges through a TRS the performance of the portfolio against payment by the swap counterparty of the performance of the Index. In such a case, it is intended that the sub-fund's portfolio will be invested mainly in : equities and equity linked instruments, money market instruments and money market funds, for equity sub-funds; and negotiable debt instruments, convertible bonds, and money market funds, for the other sub-funds. The swaps' notional amount is usually adjusted on a daily basis but will be adjusted a minima when subscriptions and redemptions are received by the sub-fund. The principal amount of the sub-fund's assets that will be subject to the total return swap will represent under normal circumstances 100% of the sub-fund's net asset value and 100% as a maximum. The basket held by the sub-fund may be adjusted daily such that its value will generally be at least 100% of the sub-fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the OTC swap contract mentioned above is less than or close to zero, which will limit the counterparty risk arising from the OTC swap. The management reserves the right to not hold if stated in the relevant "Sub-Fund Description" securities of companies involved in the production or sale of controversial weapons as further described in Amundi's Global Responsible Investment Policy.	The counterparty to the OTC swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the sub-fund's portfolio or over the underlying of the financial derivatives instruments. Unless otherwise mentioned in the "sub-fund Description", the use of swap will not involve leverage. The NAV of the sub-fund will increase (or decrease) according to the valuation of the OTC swap. Adjustments of the OTC swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method. The valuation of the OTC swap agreements will be provided by the counterparty but the management company will make its own independent valuation thereof. The valuation of the OTC swap agreements will be checked by the auditor of the SICAV during their annual audit mission. Despite all measures taken by the SICAV to reach its replication objective, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.	Information on the updated composition of the basket of assets held in the sub-fund and the counterparty risk resulting from the swap is available on the page dedicated to the sub-fund on Amundi ETF's website at amundiETF.com. The frequency of any updates and/or the date on which the information above is updated is also set out on the same page of the above mentioned website. The sub-fund will not enter into any securities lending transactions.

Direct Replication	Full	The sub-fund may carry out its investment objective by investing in a portfolio of transferable securities or other eligible assets that will typically comprise the constituents composing the financial index as set out in the "Sub-Fund Description" and in a proportion extremely close to their proportion in the index. The management reserves the right to not invest (i) in securities comprised in the index where their weighting would be too small or if buying or detaining such constituent would be detrimental to the performance of the sub-fund and/or (ii), if stated in the relevant "Sub-Fund Description, in securities of companies involved in the production or sale of controversial weapons as further described in Amundi's Global Responsible Investment Policy, in securities of companies in breach of international conventions on Human or Labor Rights or that violate, repeatedly and seriously, one or more of the ten principles of the Global Compact*, in securities of companies involved in Tobacco production or distribution or of companies with significant exposure to Thermal coal or of companies with significant exposure to nuclear weapons or unconventional oil & gas. *United Nations Global Compact (UN Global Compact): "A call to companies to align strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals." The exclusion of these securities is based on Amundi's methodology as described in Section "Overview of the Responsible Investment Policy".	The sub-fund may also engage in transactions as financial derivative instruments ("FDI") mainly for achieving the objectives under (i) and (ii) below, including futures transactions, FX swap, forward contracts, non-deliverable forwards, spot foreign exchange transactions, to: i. reduce the level of tracking errors; or ii. optimise its cash management; or iii. reduce transaction costs or allowing exposure in the case of illiquid securities or securities which are unavailable for market or regulatory reasons; or iv. assist in achieving its investment objective and dealing with some local market specificities (market access, liquidity, local tax) and for reasons such as generating efficiencies in gaining exposure to the constituents of the financial index or to the financial index itself; or v. hedging against foreign exchange rate risk.	The sub-fund may employ techniques and instruments relating to transferable securities and money market instruments, such as securities lending or borrowing, provided that such techniques and instruments are used for the purposes of efficient portfolio management, in accordance with the "Sub-Fund Description". The use of such techniques and instruments should not result in a change of the declared investment objective of any sub-fund or substantially increase the stated risk profile of the sub-fund. In order to limit the exposure of a sub-fund to the risk of default of the counterparty under a repurchase agreement, the sub-fund will receive cash or other assets as collateral. Each sub-fund's maximum and expected proportions of the sub-fund's assets that can be subject to securities lending or borrowing transactions under normal circumstances is defined in the table "USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS" for each sub-fund.

Direct Replication	Sampling	In order to optimize Direct Replication method and to reduce the costs of investing directly in all constituents of the financial index, a sub-fund may decide to use a "sampling" technique that consists in investing in a selection of representative constituent of financial index as set out in the relevant "sub-fund Description". A sub-fund may invest in a selection of transferable securities representative of the financial index as set out in its considered "sub-fund Description" in proportions that do not reflect their weight within the financial index as set out in its considered "sub-fund Description", and as the case may be invest in securities that are not constituents of the financial index. The management company also reserves the right not to invest in securities mentioned in (ii) above.		

MORE ABOUT DERIVATIVES AND TECHNIQUES

TYPES OF DERIVATIVES THE SUB-FUNDS MAY USE

A derivative is a financial contract whose value depends on the performance of one of more reference assets (such as a security or basket of securities, an index or an interest rate). Although the sub-funds specific investment policy does not rule out the use of any type of derivative, the following types currently make up the most common derivatives used by the sub-funds:

Core Derivatives — may be used by any sub-fund, consistent with its investment policy

- financial futures
- options, such as options on equities, interest rates, indices, bonds, currencies,
- commodity indices warrants,
- forwards, such as foreign exchange contracts
- swaps (contracts where two parties exchange the returns from two different assets, indices, or baskets of the same), such as foreign exchange, interest rate, but NOT including total return swaps, credit default swaps, commodity index swaps, volatility or variance swaps.

Additional Derivatives — any intent to use will be disclosed in "Sub- Fund Descriptions"

Total return swaps (contracts where one party transfers to another party the total performance of a reference assets, including all interest, fee income, market gains or losses, and credit losses). Total return swaps entered into by the sub-funds are in the form of unfunded swaps. An unfunded swap is a swap where no upfront payment is made by the total return receiver at inception. A funded swap is a swap where the total return receiver pays an upfront amount in return for the total return of the reference asset. Funded swaps tend to be costlier due to the upfront payment requirement.

credit derivatives, such as credit default swaps (contracts where a bankruptcy, default, or other "credit event" triggers a payment from one party to the other).

- TBA derivatives (forward contracts on a generic pool of mortgages. Overall characteristics of this pool is specified) but the exact securities to be delivered to the buyer are determined 2 days before delivery, rather than at the time of the original trade)
- structured financial derivatives, such as credit-linked and equity- linked securities.
- contracts for difference (contracts whose value is based on the difference between two reference measurements) such as a basket of securities.

Futures are generally exchange-traded. All other types of derivatives are generally OTC. For any index-linked derivatives, the index provider determines the rebalancing frequency.

PURPOSES OF DERIVATIVES USE

Consistent with its investment policy, a sub-fund may use derivatives for hedging against various types of risk, for efficient portfolio management or to gain exposure to certain investments or markets.

Currency hedging A sub-fund may engage in direct hedging (taking a position in a given currency that is in the opposite direction from the position created by other portfolio investments) and in cross-hedging (reducing the effective exposure to one currency while increasing the effective exposure to another).

Currency hedging can be done at the sub-fund level and at the share class level (for share classes that are hedged to a different currency than the sub-fund's base currency or to a different currency than the currency exposure(s) of the relevant sub-fund portfolio).

When a sub-fund holds assets that are denominated in multiple currencies, there is a greater risk that currency fluctuations will in practice not be fully hedged.

Interest rate hedging For interest rate hedging, the sub-funds typically use interest rate futures, interest rate swaps, writing call options on interest rates or buying put options on interest rates.

Credit risk hedging A sub-fund can use credit default swaps to hedge the credit risk of its assets. This includes hedges against the risks of specific assets or issuers as well as hedges against securities or issuers to which the sub-fund is not directly exposed.

Duration hedging seeks to reduce the exposure to interest rates parallel shifts along the curves. Such hedging can be done at the sub-fund level.

Efficient portfolio management The sub-funds can use any allowable derivative for efficient portfolio management. Efficient portfolio management includes cost reduction, cash management, the orderly maintenance of liquidity and related practices (for instance, maintaining 100% investment exposure while also keeping a portion of assets liquid to handle redemptions of shares and the buying and selling of investments). Efficient portfolio management does not include any activities that create leverage at the overall portfolio level.

Gaining exposure The sub-funds can use any allowable derivative as a substitute for direct investment, that is, to gain investment exposure to any security, market, index, rate, or instrument that is consistent with the sub-fund's investment objective and policy. This exposure may exceed the one than would be obtained through direct investment in that position (leverage effect).

A sub-fund can also sell a credit default swap as a way of gaining a specific credit exposure. Selling a credit default swap could generate large losses if the issuer or security on which the swap is based experiences a bankruptcy, default or other "credit event".

TECHNIQUES AND INSTRUMENTS ON SECURITIES FINANCING TRANSACTIONS

Consistent with its investment policy each sub-fund may use the techniques and instruments on securities Financing Transactions described in this section.

Each sub-fund must ensure that it is able at all times to meet its redemption obligations towards shareholders and its delivery obligations toward counterparties.

No sub-fund may sell, pledge, or give as security any securities received through these contracts.

Securities lending and borrowing

In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. Securities and instruments that may be subject to lending transactions include equities, bonds, money market instruments and exchange traded funds. Through such transactions, a sub-fund may lend securities or instruments with any counterparty that is subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law.

A sub-fund may lend portfolio securities or instruments either directly or through one of the following:

- a standardised lending system organised by a recognised clearing institution;
- a lending system organised by a financial institution that specializes in this type of transaction.

The borrower must provide a guarantee (in the form of collateral) that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

Each sub-fund may borrow securities only in exceptional circumstances, such as:

- when securities that have been lent are not returned on time;
- when, for an external reason, the sub-fund could not deliver securities when obligated to

Reverse repurchase and repurchase agreement transactions

Under these transactions, the sub-fund respectively buys or sells securities and has either the commitment right or the obligation to sell back or buy back (respectively) the securities at a later date and a specific price. A sub-fund may enter into repurchase agreements only with counterparties that are subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law.

The securities and counterparties allowed for these operations must comply with CSSF circular 08/356 and CSSF circular 13/559 and CSSF circular 14/592.

MANAGEMENT OF COLLATERAL FOR OTC DERIVATIVE TRANSACTIONS AND TECHNIQUES AND INSTRUMENTS ON SECURITIES FINANCING TRANSACTIONS

When a sub-fund enters into OTC Derivative transactions including Total Return Swaps and techniques and instruments on securities Financing Transactions, all collateral used to reduce counterparty risk exposure should comply with the ESMA guidelines 2014/937 and CSSF Circular 14/592.

Acceptable Collateral

As part of OTC Derivative transactions (including Total Return Swaps) and temporary purchases and sales of securities, the sub-fund may receive securities and cash as a guarantee (collateral).

Any collateral received other than cash should be of high quality, highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation.

It should be sufficiently diversified in terms of country, markets, issue and issuers and shall not entail on an aggregate basis an exposure to a given issuer for more than 20 % of its Net Asset Value.

Securities received as collateral, in compliance with and as listed in the CSSF Circular 08/356, must adhere to the criteria defined by the management company. They must be:

- liquid;
- transferable at any time;
- diversified in compliance with the Fund's eligibility, exposure and diversification rules;
- issued by an issuer that is not an entity of the counterparty or its group and it is expected not to display a high correlation of the performance of the counterparty.

For bonds, securities will also be issued by high-quality issuers located in the OECD whose minimum rating may be AAA to BBB- on Standard & Poor's rating scale or with a rating deemed equivalent by the management company. Bonds must have a maximum maturity of 50 years.

Cash collateral received should only be (i) placed on deposit with entities prescribed in Article 41 1) (f) of the 2010 Law, (ii) invested in high-quality government bonds, (iii) used for the purpose of reverse repo transactions provided the transactions are with credit institutions subject to prudential supervision and the concerned Sub-Fund is able to recall at any time the full amount of cash on accrued basis, (iv) invested in short-term money market funds as defined in the Guidelines on a Common Definition of European Money Market Funds.

These criteria are detailed in a Risks policy which can be viewed on the website at www.amundi.com and may be subject to change, especially in the event of exceptional market circumstances.

All assets received as collateral should comply with the ESMA guidelines 2012/832 as to liquidity, valuation, issuer credit quality, correlation and diversification with a maximum exposure to a given issuer of 20% of the net assets.

The assets received as collateral are held in custody by the Depository.

Valuation of collateral:

Collateral received is valued daily at the market price (mark-to-market method).

Haircuts may be applied to the collateral received (which depends on the type and sub-types of collaterals), taking into account credit quality, price volatility and any stress-test results. Haircuts on debt securities are namely based on the type of issuer and the duration of these securities. Higher haircuts are used for equities.

Margin calls are made daily, unless stipulated otherwise in a master agreement covering these transactions if it has been agreed with the counterparty to apply a trigger threshold.

The collateral policy of the SICAV is made available to investor on the website at www.amundi.com.

Reinvestment of assets provided as guarantee

Any cash provided as a guarantee can only be reinvested in compliance with CSSF circular 08/356.

Any other assets provided as a guarantee will not be re-used.

Operational costs

The net revenues (that represent the gross revenues minus the direct and indirect operational costs and fees) achieved from techniques and instruments on securities financing transactions remain with the relevant sub-fund. Direct and indirect operational costs and fees may be deducted from the gross revenues delivered to the sub-fund. These costs represent 35% of the gross revenues and are paid to Amundi Intermediation for its role as securities' lending agent. Out of the 35% it receives, Amundi Intermediation, covers its own fees and costs and shall pay any relevant indirect fee and cost (including 5% to CACEIS acting as collateral agent). Such direct fees and costs are determined in accordance with market practice and consistent with the current market levels. The remaining 65% of the gross revenue goes to the Fund.

As of the prospectus date, Amundi Intermediation acts as Securities Lending Agent. It is in charge of counterparty selection and best execution. The Custodian, Caceis Bank, Luxembourg Branch, acts as collateral manager and performs the settlement of securities lending transaction. Both Amundi Intermediation and Caceis Bank, Luxembourg Branch are related parties to the Management Company, Amundi Luxembourg S.A. Such transactions may be executed with related parties, belonging to Credit Agricole Group such as Crédit Agricole CIB and CACEIS. The counterparties with whom securities lending transactions are entered will be detailed in the annual report of the SICAV.

SUMMARY DESCRIPTION OF THE PROCESS FOR SELECTING INTERMEDIARIES

A rigorous selection process is applied for brokers and financial intermediaries.

The selection :

- only concerns financial institutions of OECD countries whose minimum rating ranges between AAA to BBB- by Standard and Poor's, at the moment of transaction's, or considered to be equivalent by the Management Company according its own criteria and.
- is made from among reputable financial intermediaries on the basis of multiple criteria related to the provision of research services (fundamental financial analysis, company information, value added by partners, solid basis for recommendations, etc.) or execution services (access to market information, Transaction costs, execution prices, good transaction settlement practices, etc.).

In addition, each of the counterparties retained will be analysed using the criteria of the Risk Department, such as country, financial stability, rating, exposure, type of activity, past performance, etc.

The selection procedure, implemented annually, involves the different parties of the front office and support departments. The brokers and financial intermediaries selected through this procedure will be monitored regularly in accordance with the Execution Policy of the Management Company.

Regarding the counterparties selection for the TRS of the sub-funds using an indirect replication method, a comprehensive Request For Proposal ("RFP") was issued for the equity index sub-funds on a one hand and for the fixed-income index sub-funds on the other hand. A counterparty has been selected for providing the total return swap and market making for each range of sub-funds. At the date of this Prospectus, for equity index sub-funds, BNP Paribas SA or any other company of the BNP Paribas SA group has been selected, whereas Société Générale Corporate and Investment Banking or any other company in the Société Générale group as counterparties or intermediaries has been chosen for bond index sub-funds.

USE OF SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS

The sub-funds will not use buy-sell back transactions or sell-buy back transactions, repurchase agreements or reverse repurchase agreements, securities borrowing and margin lending transactions in the meaning of Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse (SFTR).

As precised in the below table, the sub-funds use securities financing transactions and total return swaps on continuous basis and/or temporary basis.

The sub-funds applying an indirect replication will use TRS in order to gain exposure to the index performance.

The sub-funds applying a direct replication may enter into securities lending in order to generate additional income. By way of illustration in reference to the table below, the use of techniques and instruments on securities financing transactions by any sub-fund may be guided by market circumstances or specific opportunities which are less predictable. Estimate percentages are therefore absent in limited cases or, when present, are more likely to fluctuate over time.

Sub-funds that enter into securities lending may likely be affected by strong variations in context of market opportunities. The volume of use of this technique with a view to optimizing revenues is likely to be impacted by the expected return in consideration of market appetite. During periods of high demand (e.g. borrower demand to borrow stocks from the underlying market), the proportion of the sub-fund's net assets subject to securities lending transactions may approach the maximum percentage, while there may also be periods in which there is little or no demand from the market to borrow the underlying securities, in which case this proportion could be 0%. Furthermore, sub-funds may be also affected by on-going adaptation of the market against new regulatory framework implementation. Maximum of use of securities lending will not be above 45%, such maxima are determined by management constraints.

Also and subject to the above, a sub-fund that indicates a continuous use of a given technique or instrument, is generally considering them as part of a permanent program and/or as a component of the deployed management process and will have estimates less likely to fluctuate (although at times the sub-funds may not have any outstanding trades in its books).
