Term
The fund is established for an unlimited duration.
The Board of Directors may compulsorily redeem or merge all the shares of the fund or share class. Circumstances under which such decision would occur are available in the fund's prospectus and accessible via www.nordea.lu. "Legal" section.

Objectives
Investment Objective The fund's objective is to provide shareholders with investment growth in the long term.
Investment Strategy In actively managing the fund's portfolio, the management team focuses on companies across market capitalizations that benefit from an increased focus on energy resilience, industrial production reshoring, and defence and cyber security, and that appear to offer superior growth prospects and investment characteristics.
Investment Policy The fund mainly invests in equities of European companies. Specifically, the fund invests at least 75% of total assets in equities and equity-related securities issues by companies that are domiciled, or conduct the majority of their business, in Europe. The fund may be exposed (through investments or cash) to other currencies than the base currency.
Derivatives: The fund may use derivatives for hedging (reducing risks), efficient portfolio management and to seek investment gains.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.
The actual risk can vary significantly if you cash in at an early stage and you might get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you.
Be aware of currency risk. In some circumstances you will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
For more information on risks the fund is exposed to, please refer to the section "Risk Descriptions" of the prospectus.
Other risks materially relevant to the PRIIP not included in the summary risk indicator:
Concentration risk, Derivatives risk.
This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years Example Investment: EUR 10 000 Scenarios		If you exit after 1 year	If you exit after 5 years

What happens if Nordea Investment Funds S.A. is unable to pay out?

In the event of our insolvency, the fund's assets in the safekeeping of the depositary will not be affected. However, in the event of the insolvency of the depositary, or someone acting on its behalf, the Fund may suffer a financial loss, which will not be covered by any investor compensation or a guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: - In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.
EUR 10 000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 107	EUR 709
