DWS Invest ESG Top Euroland

Share class: NC, ISIN: LU0145647300, Security code: 552518, Currency: EUR

a sub-fund of DWS Invest. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is managed in reference to a benchmark. The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (EURO STOXX 50 (RI)). In order to achieve this, the fund invests primarily in equities of issuers with a high market capitalization and who have their headquarters in a member state of the European Economic and Monetary Union. In addition, the fund manager endeavors to manage a concentrated portfolio e.g. comprising 40 to 60 different securities. Depending on the market situation, the management may deviate from the above-mentioned diversification target. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG aspects) are taken into consideration alongside the financial performance. In this context, the selection of individual investments is the responsibility of the fund management. The majority of the fund's securities or their issuers are expected to be components of the benchmark. The fund management will use its discretion to invest in securities and sectors that are not included in the benchmark in order to take

advantages of specific investment opportunities. The portfolio is not necessarily expected to have a similar weighting to the benchmark. In regard to its benchmark, the sub-fund positioning can deviate significantly (e.g. by a positioning outside of the benchmark as well as a significant underweighting or overweighting) and the actual degree of freedom is typically relatively high. A deviation generally reflects the fund manager's evaluation of the specific market situation, which may lead to a defensive and closer or a more active and wider positioning compared to the benchmark. Despite the fact that the fund aims to outperform the benchmark, the potential outperformance might be limited depending on the prevailing market environment (e.g. less volatile market environment) and actual positioning versus the benchmark. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis. The Company may, however, suspend or restrict the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk

profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high.
