# DNCA Invest - Eurose - Class A - EUR

A sub-fund of the SICAV DNCA INVEST - ISIN: LU0284394235

This fund is managed by DNCA FINANCE Luxembourg

## Objectives and Investment Policy

### Essential management characteristics:

Multi-Asset Fund

The Sub-Fund seeks to outperform the 20% Eurostoxx 50 + 80% FTSE MTS Global composite index calculated with dividends reinvested, over the recommended investment period.

The overall investment strategy of the Sub-Fund is to seek to enhance the return on a wealth investment through active management of the portfolio of Euro denominated equities and fixed income products. It aims to provide an alternative to investments in bonds and convertibles bonds (directly or through mutual funds) as well as an alternative to Euro denominated funds benefitting from a capital guarantee. The Sub-Fund however does not benefit from a guarantee on capital invested.

The Sub-Fund may invest at any time within the following limits in:

- Up to 100% of its total assets may be exposed to fixed income securities denominated in Euro, composed of securities issued by public or private sector-issuers, without any rating constraint including non-rated issues.
- At least 50% of the Sub-Fund's fixed income portfolio should be composed of securities belonging to the "investment grade" category (i.e. have a Standard & Poor's minimum A-3 short-term rating or BBB- long-term rating or equivalent). The Investment Manager shall not solely base its investment decisions on ratings assigned by independent rating agencies and can proceed to its own credit risk assessment. The Sub-Fund's fixed income portfolio may be composed of securities belonging to the "speculative grade" category (i.e. not belonging to the "investment grade" category) or non-rated. The Investment Manager may invest in securities which qualify as distressed securities up to 5% of its net assets.
- Up to 35% of its net assets in equities from issuers belonging to all market capitalisation categories, headquartered in OECD countries and denominated in Euro. Investment in equities issued by issuers which capitalisation is under 1 billion Euros may not exceed 5% of the net assets of the Sub-Fund.

The duration of the Sub-Fund's portfolio will be limited to 7 years.

The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and/or AIFs.

In order to achieve the investment objective, the Sub-Fund may also invest in equities or related financial derivative instruments as well as in convertible bonds, warrants and rights which may embed derivatives, for the purpose of hedging or increasing interest rate risk without seeking overexposure

**Benchmark Information :** The Sub-Fund is actively managed and uses the benchmark for performance comparison purposes. This means the Investment Manager is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Investment Manager is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

### Other important information:

Income is accumulated

The redemption of units/shares may be requested each day.

### Recommended investment period:

This sub-fund may not be appropriate for investors who plan to withdraw their money within 3 years.

## Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to equity and/or fixed income markets. The fund does not benefit from any capital protection or guarantee.

### Material risks not taken into account in this indicator:

**Credit risk:** in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the sub-fund's net asset value.

**Counterparty risk:** the use of CFD may expose the investor to the risk of default by the counterparty.

**Risk of using derivative products:** the use of derivative instruments may reduce the net asset value in case of exposure in a direction opposite to that of the market trend.

**Liquidity risk:** on certain markets and in given market situations, the manager may find it difficult to sell certain financial assets.

The occurrence of one of these risks may lead to a reduction in the net asset value.

## Charges

The charges paid serve to cover the operating costs of the UCITS, including those of marketing and distributing the shares or units. These costs reduce the potential growth of the investments.

One-off charges taken before or after you invest	
Entry charge	1.00%
Exit charge	0.00%

The percentage indicated is the maximum that may be taken out of your capital before it is invested. In certain cases the investor pays less. You can obtain the actual amount of entry and exit charges from your financial advisor or the establishment with which you place your order.
