

KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

MAINFIRST - GLOBAL EQUITIES FUND (R)

MainFirst - Global Equities Fund is a sub fund of MainFirst SICAV.
MainFirst Affiliated Fund Managers S.A. is the Management Company of the Fund.
ISIN LU1004824790

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the sub-fund is to outperform the index MSCI World Net Total Return EUR Index (the "Benchmark Index"). An active investment approach is pursued, although without any restriction to the target investments included within the benchmark, with the result that portfolio composition may differ significantly from the benchmark. Investments are made in shares and other equity securities worldwide. Depending on the situation, the investment focus may be on large caps or small and mid caps. In addition, up to 25% of the Sub-fund's assets may be invested in: Bonds, convertible bonds and bonds with warrants on securities issued by com-

panies worldwide and denominated in a freely convertible currency. Irrespective of the desired risk diversification, the investments of the sub-fund may be concentrated in specific countries and sectors from time to time. The sub-fund may hold a higher volume of liquid assets on a temporary basis. The sub-fund does not acquire units or shares in funds, regardless of their legal form. Income generated by this sub-fund's share class is reinvested rather than distributed. Shares of this sub-fund's share class can be redeemed on any business day.

RISK AND REWARD PROFILE

The data used to calculate the synthetic indicator is based on the historical performance of unit class R and cannot be used as a basis for the future risk and reward profile of this unit class. The sub-fund is primarily subject to the price volatility of the global stock markets. Unit class R has been assigned to the aforementioned risk and reward category, because its value may vary due to the investment policy described above. The factors underlying the risk and reward classification may be subject to change, resulting in the R unit class being assigned to a new category. Even the lowest risk and reward category does not correspond to a risk-free investment. A detailed des-

cription of risks can be found in the "Risk profile" section of the respective sub-fund annex to the prospectus. The following risks have no direct influence on this classification, but may nevertheless be of significance: Investments in the stocks of smaller and less well-known companies are associated with greater risks and the potential for greater price volatility than investments in larger, more mature and better-known companies. Investments outside the eurozone are subject to currency risk.
